**The Crucible of Desegregation** R. Shep Melnick, 2023-04-28 Examines the patchwork evolution of school desegregation policy In 1954 the Supreme Court delivered the landmark decision of *Brown v Board of Education* establishing the right to attend a desegregated school as a national constitutional right but the decision contained fundamental ambiguities The Supreme Court has never offered a clear definition of what desegregation means or laid out a framework for evaluating competing interpretations In *The Crucible of Desegregation* R Shep Melnick examines the evolution of federal school desegregation policy from 1954 through the termination of desegregation orders in the first decades of the twenty first century combining legal analysis with a focus on institutional relations particularly the interactions between federal judges and administrators Melnick argues that years of ambiguous inconsistent and meandering Court decisions left lower court judges adrift forced to apply contradictory Supreme Court precedents in a wide variety of highly charged political and educational contexts As a result desegregation policy has been a patchwork with lower court judges playing a crucial role and with little opportunity to
