France Since 1945:

France Since 1945 Robert Gildea, 2002-03-14 The last fifty years of French history have seen immense challenges for the French constructing a new European order building a modern economy searching for a stable political system It has also been a time of anxiety and doubt The French have had to come to terms with the legacy of the German Occupation the loss of Empire the political and social implications of the influx of foreign immigrants the rise of Islam the destruction of rural life and the threat of Anglo American culture to French language and civilization Robert Gildea's account examines the French political system and France's role in the world from 1945 to 2000 He looks at France's attempt to recover national greatness after the Second World War its attempt to deal with the fear of German resurgence by building the European Community and its struggle to preserve its Empire He also discusses the Algerian War and its legacy and the later development of a neo colonialism to preserve its influence in Africa and the Pacific Gildea also examines the rise and fall of the two Republics the rise of and fall of De Gaulle and the revolution of 1968 along with topics such as the construction of the myth of the Resistance the painful truths of French involvement in anti Semitic persecution and France's continuing obsession with national identity France Since 1945 ,2010 Contemporary France D. L. Hanley, A. P. Kerr, Miss A P Kerr, N. H. Waites, 2005-08-17 Many recent studies of French politics have tended to concentrate on the French political system in isolation Contemporary France aims to set the working of the French political system into its historical social and economic context The first section gives a succinct description of the main developments since 1944 in all major contexts economy society domestic politics and foreign relations The authors then analyse the economic social and cultural structures of present day France and discuss the institutional framework of decision making and the major political forces involved in it There are also chapters on French external and defence policy and on the education system all of which are set in the context of the political system as a whole Aimed primarily at students of European history and politics or of French society and culture the book assumes little knowledge in the social sciences and will be readily accessible to beginners in this field

The relationship between France and her European partners is analysed in greater depth and there are new sections explicitly situating France and the French within a wider transnational global perspective France and Its Empire Since 1870 Alice L. Conklin, Sarah Fishman, Robert Zaretsky, 2015 Providing an up to date synthesis of the history of an extraordinary nation one that has been shrouded in myths many of its own making France and Its Empire Since 1870 seeks both to understand these myths and to uncover the complicated and often contradictory realities that underpin them It situates modern French history in transnational and global contexts and also integrates the themes of imperialism and immigration into the traditional narrative Authors Alice L Conklin Sarah Fishman and Robert Zaretsky begin with the premise that while France and the U S are sister republics they also exhibit profound differences that are as compelling as their apparent similarities. The authors frame the book around the contested emergence of the French Republic a form of government that finally appears to have a permanent status in France but whose birth pangs were much more protracted than those of the American Republic Presenting a lively and coherent narrative of the major developments in France's tumultuous history since 1870 the authors organize the chapters around the country's many turning points and confrontations. They also offer detailed analyses of politics society and culture considering the diverse viewpoints of men and women from every background including the working class and the bourgeoisie immigrants Catholics Jews and Muslims Bretons and Algerians rebellious youth and gays and lesbians France Since the <u>Liberation</u> Gino Raymond, 2024-02-20 This book focuses on the tension between the modernising thrust that places France on a trajectory of convergence with comparable liberal democracies and the defence of a national specificity that can act as a brake complicating France's relationship with its neighbours its present and its past This ambivalence in French political and social life stems from the conscious attempt to rebuild the nation after the trauma of Occupation during World War II and the new beginning provided by the Liberation The government of the Fourth Republic embraced the pursuit of a modernisation that would enable it to regain its place among the world's leading democratic states However this modernising ambition co exists with the belief in a specific destiny and a unique sense of mission that are intrinsic to the emergence of a sense of nationhood after the revolution of 1789 Raymond defines a critical perspective that draws together historical economic social and political issues into a coherent understanding of what makes France the way it is today Written with both academic rigour and a highly accessible clarity of style this volume is a valuable resource for students educators and researchers in French and European Studies France Since 1800 D. L. L. Parry, Pierre Girard (professor of contemporary history.), 2002 In this concise history of France since 1815 David Parry and Pierre Girard examine distinctive features of contemporary

Lee, 2008-01-28 Stephen Lee charts the most commonly encountered topics of nineteenth and twentieth century European history from the origins of the French Revolution through the social and political reforms of the last two centuries to the present France in the Age of the Scientific State Robert G. Gilpin, 2015-12-08 Charles de Gaulle has often warned France and other European nations of the threat they face from advanced scientific and technological countries such as the United States and the Soviet Union Robert Gilpin examines this technological gap which France fears and the efforts France is making to introduce change and efficiency into her science administration He discusses the gap as it affects all of Europe and suggests that if western European nations are unable to form a common European administration of science policy and remain the main world importers of discoveries and exporters of brains they may become steadily weaker in international affairs Originally published in 1968 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
