important topic to understand thoroughly because of its many applications in real life The goal of this chapter is to develop a basic understanding of percent to see percentages as decimals and to learn to calculate discounts This curriculum is essentially the same as the U S version of Math Mammoth only customized for the Canadian audience in these aspects The curriculum uses the metric measurement units Since Canadians do use imperial units such as inches and pounds in some contexts the curriculum does mention them but not often The spelling conforms mostly to American English taking into account a few key differences where Canadian English follows British English Numbers are formatted with a space as a thousands separator and a point as a decimal separator Page paper size is Letter The US version of the curriculum is aligned to the Common Core Standards which means this curriculum may not be properly aligned to the sixth grade standards in any Canadian province However you can probably find material for any missing topics in the neighbouring grade levels of Math Mammoth materials Available separately Math Mammoth Grade 6 B worktext covers the second half of 6th grade math Also available are the answer keys and a book containing cumulative reviews and chapter tests
