**Kartographische Oberflächen** Wolf-Dieter Rase, 2016-02-22 Der Text wendet sich an Nutzer von Geoinformationssystemen die kontinuierliche Oberflächen aus unregelmäßig verteilten Datenpunkten oder aus Polygonen mit einem aufsummierten Datenwert erzeugen wollen Die überwiegende Mehrzahl der Anwender wird dafür die gängigen GIS Pakete nutzen Das sind vor allem ArcGIS for Desktop mit Erweiterungen oder das Programm Surfer In anderen Software Paketen sind ebenfalls Optionen für die Interpolation und Visualisierung von Oberflächen enthalten auch in Open Source Programmen Viele der Optionen in der freien Software sind mit den hier diskutierten Verfahren identisch Für die Experten die noch selbst programmieren und sich damit die Werkzeuge anfertigen die in den Standardprogrammen fehlen stellt der Text einige Grundlagen und weiterführende Referenzen zur Verfügung Für die Visualisierung von 2D Oberflächen ist die Wahrscheinlichkeit geringer als bei den Interpolationsmethoden dass sich Anwender ihre eigene Software schreiben werden Das Angebot an freier und kommerzieller Computergraphik Software ist sehr groß zumindest für die gängigen Visualisierungsverfahren Für manche Methoden die etwas weiter von den häufig angewendeten Techniken entfernt sind ist manchmal die Programmierung eigener Software notwendig zumindest aber von Brücken für den Übergang zwischen unterschiedlichen Programmen und Datenformaten

From Science to Society Benoît Otjacques, Patrik Hitzelberger, Stefan Naumann, Volker Wohlgemuth, 2017-08-23 This book presents the latest findings and ongoing research in connection with green information systems and green information communication technology ICT It provides valuable insights into a broad range of cross cutting concerns in ICT and the environmental sciences and showcases how ICT can be used to effectively address environmental and energy efficiency issues Offering a selection of extended contributions to the 31st International Conference EnviroInfo 2017 it is essential reading for anyone looking to expand their expertise in the area

*Extracting Spatial Information from Historical Maps* Benedikt Budig, 2018-11-23 Historical maps are fascinating documents and a valuable source of information for scientists of various disciplines Many of these maps are available as scanned bitmap images but in order to make them searchable in useful ways a structured representation of the contained information is desirable This book deals with the extraction of spatial information from historical maps This cannot be expected to be solved fully automatically since it involves difficult semantics but is also too tedious to be done manually at scale The methodology used in this book combines the strengths of both computers and humans it describes efficient algorithms to largely automate information extraction tasks and pairs these algorithms with smart user interactions to handle

what is not understood by the algorithm The effectiveness of this approach is shown for various kinds of spatial documents from the 16th to the early 20th century *Grave Disturbances* Edeltraud Aspöck, Alison Klevnäs, Nils Müller-Scheeßel, 2020-07-31 Archaeologists excavating burials often find that they are not the first to disturb the remains of the dead Graves from many periods frequently show signs that others have been digging and have moved or taken away parts of the original funerary assemblage Displaced bones and artefacts traces of pits and damage to tombs or coffins can all provide clues about post burial activities The last two decades have seen a rapid rise in interest in the study of post depositional practices in graves which has now developed into a new subfield within mortuary archaeology This follows a long tradition of neglect with disturbed graves previously regarded as interesting only to the degree they revealed evidence of the original funerary deposit This book explores past human interactions with mortuary deposits delving into the different ways graves and human remains were approached by people in the past and the reasons that led to such encounters The primary focus of the volume is on cases of unexpected interference with individual graves soon after burial re encounters with human remains not anticipated by those who performed the funerary rites and constructed the tombs However a first step is always to distinguish these from natural and accidental processes and methodological approaches are a major theme of discussion Interactions with the remains of the dead are explored in eleven chapters ranging from the New Kingdom of Egypt to Viking Age Norway and from Bronze Age Slovakia to the ancient Maya Each discusses cases of re entries into graves including desecration tomb re use destruction of grave contents as well as the removal of artefacts and human remains for reasons from material gain to commemoration symbolic appropriation ancestral rites political chicanery and retrieval of relics The introduction presents many of the methodological issues which recur throughout the contributions as this is a developing area with new approaches being applied to analyze post depositional processes in graves **Innovations and challenges of the energy transition in smart city districts** Sven Leonhardt, Tobias Nusser, Jürgen Görres, Sven Rosinger, Gerhard Stryi-Hipp, Martin Eckhard, 2023-12-31 As living economic and cultural spaces cities require a sustainable energy system and must be designed to be highly energy efficient The book provides a framework for practitioners and scientists on how the energy transition can contribute to achieving climate goals in the building sector Innovations and creative approaches for solutions from the lighthouse projects of the Solar Building Energy Efficient City funding initiative are presented **Citizen Science in den Geschichtswissenschaften** René Smolarski, Hendrikje Carius, Martin Prell, 2023-06-12 Die Digitalisierung des Wissenschaftsprozesses ist mit der Öffnung der Wissenschaften für partizipative Formate auf verschiedenen Beteiligungsebenen eng verbunden Citizen Science bzw bürgerwissenschaftliche Ansätze gewinnen dabei auch in den Geschichtswissenschaften zunehmend an Bedeutung Der Band gibt einen praxisorientierten Einblick in vorhandene Infrastrukturen sowie unterschiedliche Projektansätze in den Kernbereichen zivilgesellschaftlicher Beteiligung an historischer Forschung Dabei werden exemplarisch Potenziale und Herausforderungen bei der Konzeption

Implementierung und Durchführung von historisch orientierten Citizen Science Projekten beleuchtet sowie Erfolgskriterien und künftige Perspektiven herausgearbeitet Der Band möchte somit zur Debatte um die Nutzung von Citizen Science als Methode innerhalb der historischen Forschung beitragen **Innovative Produkte und Dienstleistungen in der Mobilität** Heike Proff, Thomas Martin Fojcik, 2017-06-02 Beim 8. Wissenschaftsforum Mobilität an der Universität Duisburg-Essen wurde im Juni 2016 darüber diskutiert, wie innovative Mobilitätsprodukte und -dienstleistungen ausgestaltet sein können, um eine individuelle und integrierte Kundenansprache sicherzustellen Der Tagungsband präsentiert Lösungsansätze, die an den Schnittstellen der betriebswirtschaftlichen und ingenieurwissenschaftlichen Forschung entstanden sind Neben vernetzten Informationsangeboten, intermodalen Verkehrskonzepten und innovativen Fahrerassistenzsystemen können fortschrittliche Car-Sharing-Modelle und ergänzende digitale Leistungsangebote den Wert von Mobilitätsleistungen steigern
