Agonistic Democracy Mark Wenman, 2013 A pioneering analysis of agonistic democracy its history central thinkers and contribution to contemporary political theory

Constituent Power and the Law Joel I. Colón-Ríos, 2020 Constituent power is the power to create new constitutions Since it is frequently exercised during or after political revolutions it has been historically associated with extra legality and violations of the established legal order This book examines the relationship between constituent power and the law and the place of constituent power in constitutional history focusing on the legal and institutional implications that theorists politicians and judges have derived from it Since the 18th and 19th centuries commentators and citizens have relied on the concept of constituent power to defend the idea that electors have the right to instruct representatives and that the creation of new constitutions must take place through extra legislative entities such as primary assemblies open to all citizens More recently several Latin American constitutions explicitly incorporate the theory of constituent power and allow citizens acting through popular initiative to trigger constitution making episodes that may result in the replacement of the entire constitutional order Constitutional courts have employed constituent power to justify their jurisdiction to invalidate constitutional amendments that alter the fundamental structure of the constitution and thus amount to a constitution making exercise Some governments have reverted to it to defend the legality of transforming the constitutional order through procedures not contemplated in the constitution s amendment rule but considered participatory enough to be equivalent to the people in action and these attempts have sometimes been sanctioned by courts Building on these findings **Constituent Power and the Law** argues that the exercise of constituent power unlike sovereignty should be understood as ultimately based on a popular mandate to produce a particular type of legal content In practice this makes it possible for a constitution making body to be understood as legally subject to the conditions arising from a constituent referendum

Constitutional Change in the Contemporary Socialist World Ngoc Son Bui, 2020 Comparative constitutional law has a long and distinguished history in intellectual thought and in the construction of public law As political actors and the people who create or modify their constitutional orders they often wish to learn from the experience and learning of others This cross fertilization and mutual interaction has only accelerated with the onset of globalization which has transformed the world into an interconnected web that facilitates dialogue and linkages across international and regional structures Oxford Comparative Constitutionalism seeks to publish scholarship of the highest quality in constitutional law that deepens our knowledge of local national regional and global phenomena through the lens of comparative public law

Smith,2014-06-19 Can secularism continue to provide a foundation for political legitimacy It is often claimed that one of the cultural achievements of the West has been its establishment of secular democracy wherein religious belief is respected but confined to the sphere of private belief In more recent times however political secularism has been increasingly called into question Religious believers in numerous traditions have protested against the distortion and confinement that secularism imposes on their faith Others have become uneasily aware of the way in which secularism no longer commands universal assent in the way it once did *Confronting Secularism in Europe and India* adds to this debate by staging a creative encounter between European and Indian conceptions of secularism with a view to continuing new and distinctive trajectories of thought about the place and role of secularism in contemporary times Looking at political secularism the relationship between secularism and religion and religious and secular violence this book considers whether there are viable alternatives to secularism in Europe and in India *Political Ethics* Edward Hall,Andrew Sabl,2022-08-30 A comprehensive introduction to contemporary political ethics What is the relationship between politics and morality May politicians bend moral constraints in the name of political necessity Is it always wrong for leaders to lie How much political compromise is too much or too little In *Political Ethics* some of the world's leading thinkers in politics philosophy and related fields offer a comprehensive and accessible introduction to key issues in this rapidly growing area of political theory In a series of original essays the contributors examine a range of urgent political problems lies and deception compromise and refusal to compromise the meaning and limits of political integrity representation and failures of representation good and bad democratic leadership the virtues and excesses of partisanship administrative ethics political corruption whistleblowing legitimate and illegitimate claims of political emergency and lobbying What emerges are realistic but demanding ethical standards and a clear eyed understanding of the ethical challenges of political life in the twenty first century With contributions by Richard Bellamy Alin Fumurescu Edward Hall Suzanne Dovi and Jesse McCain Eric Beerbohm Russell Muirhead and Nancy Rosenblum Joseph Heath Elizabeth David Barrett and Mark Philp Michele Bocchiola and Emanuela Ceva Nomi Lazar Phil Parvin and Andrew Sabl *Phenomenologies of the City* Henriette Steiner,Maximilian Sternberg,2016-03-09 *Phenomenologies of the City* Studies in the History and Philosophy of Architecture brings architecture and urbanism into dialogue with phenomenology Phenomenology has informed debate about the city from social sciences to cultural studies Within architecture however phenomenological inquiry has been neglecting the question of the city Addressing this lacuna this book suggests that the city presents not only the richest but also the politically most urgent horizon of reference for philosophical reflection on the

cultural and ethical dimensions of architecture The contributors to this volume are architects and scholars of urbanism Some have backgrounds in literature history religious studies and art history The book features 16 chapters by younger scholars as well as established thinkers including Peter Carl David Leatherbarrow Alberto Perez Gomez Wendy Pullan and Dalibor Vesely Rather than developing a single theoretical statement the book addresses architecture's relationship with the city in a wide range of historical and contemporary contexts The chapters trace hidden genealogies and explore the ruptures as much as the persistence of recurrent cultural motifs Together these interconnected phenomenologies of the city raise simple but fundamental questions What is the city for how is it ordered and how can it be understood The book does not advocate a return to a naive sense of unity or order Rather it investigates how architecture can generate meaning and forge as well as contest social and cultural representations

Public Reason Confucianism Sungmoon Kim, 2016-04-21 Public reason Confucianism is a particular style of Confucian democratic perfectionism in which comprehensive Confucianism is connected with perfectionism

Postnational Constitutionalism Paul Linden-Retek, 2023-03-29 At a time when the integration of the European Union's peoples through the rule of law is faltering this book develops a critical theory of postnational constitutionalism Today widely held conceptions of EU law continue to mislead citizens about the nature of political identity sovereignty and agency They lose sight of a critical idea on which post nationalism depends that constitutional self authorship is narrative and the polity is a subject whose identity history and legacy are still in formation Absent this vision EU law reproduces crises of legitimacy the depoliticization of public life emergency rule by executive decree a collapse of solidarity and the rise of nativist movements The book diagnoses this impasse as the product of a problem familiar to modernity reification a process in which social and historical relationships are misattributed as timeless relations among things Reification's shrinking of social dilemmas moral principles and political action to narrow perceptions of the present explains law's role in perpetuating crisis But this diagnosis also points to a remedy It suggests that to sustain the emancipatory potential of EU constitutionalism we must recover law's relationship to time Postnational Constitutionalism Europe and the Time of Law proposes a temporally attuned constitutional theory with principles of anti reification narrative interpretation and non sovereign agency at its centre These principles reimagine essential domains of constitutional order social integration constitutional adjudication and constituent power Spanning various bodies of EU jurisprudence the book devotes particular attention to migration and asylum struggles where questions of solidarity law and belonging are most generative and acute

The Routledge Handbook of Nonprofit Communication Gisela Gonçalves, Evandro Oliveira, 2022-10-12 This handbook brings together multidisciplinary and internationally diverse contributors to provide an overview of theory research and practice in the nonprofit and nongovernmental organization NGO communication field It is structured in four main parts the first introduces metatheoretical and multidisciplinary approaches to the nonprofit sector the second offers distinctive structural approaches to communication and their models of reputation marketing and

communication management the third focuses on nonprofit organizations strategic communications strategies and discourses and the fourth assembles campaigns and case studies of different areas of practice causes and geographies The handbook is essential reading for scholars educators and advanced students in nonprofit and NGO communication within public relations and strategic communication organizational communication sociology management economics marketing and political science as well as a useful reference for leaders and communication professionals in the nonprofit sector *The Federal Contract* Stephen Tierney, 2022-05-26 Federalism is a very familiar form of government It characterises the first modern constitution that of the United States and has been deployed by constitution makers to manage large and internally diverse polities at various key stages in the history of the modern state Despite its pervasiveness in practice this book argues that federalism has been strangely neglected by constitutional theory It has tended either to be subsumed within one default account of modern constitutionalism or it has been treated as an exotic outlier a sui generis model of the state rather than a form of constitutional ordering for the state This neglect is both unsatisfactory in conceptual terms and problematic for constitutional practitioners obscuring as it does the core meaning purpose and applicability of federalism as a specific model of constitutionalism with which to organise territorially pluralised and demotically complex states In fact the federal contract represents a highly distinctive order of rule which in turn requires a particular territorialised approach to many of the fundamental concepts with which constitutionalists and political actors operate constituent power the nature of sovereignty subjecthood and citizenship the relationship between institutions and constitutional authority patterns of constitutional change and ultimately the legitimacy link between constitutionalism and democracy In rethinking the idea and practice of federalism this book adopts a root and branch recalibration of the federal contract It does so by analysing federalism through the conceptual categories that characterise the nature of modern constitutionalism foundations authority subjecthood purpose design and dynamics This approach seeks to explain and in so doing revitalise federalism as a discrete capacious and adaptable concept of rule that can be deployed imaginatively to facilitate the deep territorial variety that characterises so many states in the 21st century Transitional Justice for Foxes Frank Haldemann, 2022-12-08 Offers a pluralist reading of transitional justice to deal with conflicts constructively and to enable diversity in approaches **Liberal Realism: Politics of Difference Beyond the Universalist-Contextualist Debate** Ivane Lomidze, 2025-05-06 The central issue explored in this book is the problem of difference in democratic theory focusing on the debates between liberalism and realism Realist theories critique liberal models for ignoring community specific differences and reducing plural forms of life to a homogeneous political project This book argues that while realist models challenge the universalism of liberalism they fail to normatively ground the adjudication of differences and cannot distinguish between legitimate and illegitimate political practices The core argument proposes the development of particularist political principles as a solution providing an ethical framework for adjudicating difference without relying on universal norms Drawing on moral particularism the book

demonstrates how contingent context dependent reasoning can resolve issues of representation and pluralism in democracy while avoiding the pitfalls of both universalism and discriminatory practices This research is relevant for scholars of political theory exploring new approaches to grounding pluralism and difference in contemporary democratic thought **The**

Politics of Referendum Use in European Democracies Saskia Hollander,2019-04-02 This book demonstrates that the generally assumed dichotomy between referendums and representative democracy does not do justice to the great diversity of referendum types and of how referendums are used in European democracies Although in all referendums citizens vote directly on issues rather than letting their political representatives do this for them some referendums are more direct than others Rather than reflecting the direct power of the People most referendums in EU countries are held by and serve the interests of the political elites most notably the executive The book shows that these interests rarely match the justifications given in the public debate Instead of being driven by the need to compensate for the deficiency of political parties decision makers use referendums primarily to protect the position of their party In unravelling the strategic role played by national referendums in decision making this book makes an unconventional contribution to the debate on the impact of referendums on democracy *The Routledge International Handbook of Heritage and Politics* Gönül Bozoğlu,Gary Campbell,Laurajane Smith,Christopher Whitehead,2024-04-02

The Routledge International Handbook of Heritage and Politics surveys the intersection of heritage and politics today and helps elucidate the political implications of heritage practices It explicitly addresses the political and analyses tensions and struggles over the distribution of power Including contributions from early career scholars and more established researchers the Handbook provides global and interdisciplinary perspectives on the political nature significance and consequence of heritage and the various practices of management and interpretation Taking a broad view of heritage which includes not just tangible and intangible phenomena but the ways in which people and societies live with embody experience value and use the past the volume provides a critical survey of political tensions over heritage in diverse social and cultural contexts Chapters within the book consider topics such as neoliberal dynamics terror and mobilisations of fear and hatred old and new nationalisms public policy recognition denials migration and refugeeism crises colonial and decolonial practice communities self and personhood as well as international relations geopolitics soft power and cooperation to address global problems The Routledge International Handbook of Heritage and Politics makes an intervention into the theoretical debate about the nature and role of heritage as a political resource It is essential reading for academics and students working in heritage studies museum studies politics memory studies public history geography urban studies and tourism **Communal Medicine** Pierre Morin,2023-08-03

Paradox and the School Leader Chris Dolan,2020-03-24 This book proposes that paradox as a theoretically rich and historically enduring concept has significant potential for researchers in the field of critical leadership studies By enriching its general form and infusing it with added complexity and theoretical influence it is argued that paradox can be legitimately applied as a lens for examining and as a pedagogy for realising new learning possibilities The book takes paradoxes as formed out of the constitutive practices of discourse rather than as representations of conflict or complexity Using fifteen paradoxes derived from theoretical and empirical analysis it provides insights into the competing forces that contradict simplistic positivist accounts of contemporary school leadership and reveal the presence of a political struggle for the soul of the principal in the neoliberal era It considers these paradoxes in three categories 1 principal subjectivity and authority 2 neoliberal policy and 3 managerial practice The book advocates critique counter conduct and agonistic thought and practice as resources for principals participating in such a struggle and employs Foucault s care of the self and practices of freedom to promote more active involvement of principals in authoring their ethical and political selves

The Complex City: Social and Built Approaches and Methods Caroline Donnellan,2022-10-31 The Complex City Social and Built Approaches and Methods explores different ways of understanding the city The social city approach proceeds from the ground up it focuses on human interactions shaped by economic and environmental processes The built city method looks through a top down lens examining policy and planning for buildings and infrastructure including utilities and energy networks This volume is different from other city anthologies in that it

explores them through their differences by presenting each chapter in one of the two categories While there is invariably an overlap between the two areas they are distinct positions In doing so the book identifies how despite their often adversarial approaches they both belong to the same city As essential components of the city they should not necessarily be resolved as it is in this friction where creativity and innovation happens The Complex City Social and Built Approaches and Methods is concerned about the ideas and solutions that they both offer The book s originality stems from this duality and from its recognition that cities are living organic protean places of opportunity crisis conflict and challenge The chapters demonstrate the complexity of cities as a set of ideas concerning what they engender how they function and why they continue to act as a catalyst for different kinds of human activity They explore issues of socio political import and questions of the city as a physically constructed space The themes are diverse and include the inception of the city as a place of competition to centres of regeneration and urban withdrawal They cover a range of city and urban regions from Athens to Wellington from site specific singular perspectives to comparative assessments The questions they raise include how do we inhabit urban areas how do we make plans for them and how do we at times ignore them entirely
