Images of the Byzantine World Angeliki Lymberopoulou, 2016-12-05 The main themes of this volume are the identification of visions messages and meanings in various facets of Byzantine culture and the possible differences in the perception of these visions messages and meanings as seen by their original audience and by modern scholars The volume addresses the methodological question of how far interpretations should go whether there is a tendency to read too much into too little or whether not enough attention is paid to apparent minutiae that may have been important in their historical context As the essays span a wide chronological era they also present a means of assessing the relative degrees of continuity and change in Byzantine visions messages and meanings over time Thus as highlighted in the concluding section the book discusses the validity of existing notions regarding the fluidity of Byzantine culture when continuity was a matter of a rigid adherence to traditional values and when a manifestation of the ability to adapt old conventions to new circumstances and it shows that in some respects Byzantine cultural history may have been less fragmented than is usually assumed Similarly by reflecting not just on new interpretations but also on the process of interpreting itself the contributors demonstrate how research within Byzantine studies has evolved over the past thirty years from a set of narrowly defined individual disciplines into a broader exploration of interconnected cultural phenomena

It presents the finds from the Babylonian/Persian pit, one of the most dramatic find spots at Ramat Ra el. The pit yielded a rich assemblage of pottery vessels and a lion and sixth-century private stamp impressions, including for the first time complete restored stamped jars bearing two handles stamped with different lion impressions and jars bearing both lion and private stamp impressions on their bodies. Residue analysis was conducted on many of the vessels excavated from the pit to analyze their contents, yielding surprising results. The finds contribute to our understanding of the pottery of the Babylonian and early Persian periods (6th-5th centuries BCE) and to the study of the development of the stamped jar administration in the province of Yehud under Babylonian and Persian rule.
