*Aging with HIV* Janice E. Nichols, 2002-08-13 In 1998 approximately 30 million people worldwide were living with HIV AIDS about 5 million of whom became infected that year The epidemic continues to expand with an estimated doubling time of 10 years making AIDS the leading infectious cause of death ahead of tuberculosis and malaria Even in the U S A where the death rate from AIDS is declining as a result of effective drug therapies HIV infection rates continue to climb in several population groups The prevalence of AIDS among people over the age of 50 is steadily increasing and most older people are unprepared to address it for a number of reasons including the widespread discomfort with matters sexual and homosexual and the belief that elderly people are not sexually active and therefore not at risk This guide for care providers seeks to educate and inform readers about the difficulties and complications that accompany the disease in older people Thus while the appendix includes technical descriptions of methodology data and results the narratives in the chapters describing the findings and their practical implications are written in layman s language Topics covered include biomedical aspects demographics sexuality stressors mental health older women and patient care all of which are supported by case studies

**Aging with HIV** Janice E. Nichols, David C. Speer, Betty J. Watson, Mary Watson, Tiffany L. Vergon, Colette M. Vallee, Joan M. Meah, 2002-09-15 In 1998 approximately 30 million people worldwide were living with HIV AIDS about 5 million of whom became infected that year The epidemic continues to expand with an estimated doubling time of 10 years making AIDS the leading infectious cause of death ahead of tuberculosis and malaria Even in the U S A where the death rate from AIDS is declining as a result of effective drug therapies HIV infection rates continue to climb in several population groups The prevalence of AIDS among people over the age of 50 is steadily increasing and most older people are unprepared to address it for a number of reasons including the widespread discomfort with matters sexual and homosexual and the belief that elderly people are not sexually active and therefore not at risk This guide for care providers seeks to educate and inform readers about the difficulties and complications that accompany the disease in older people Thus while the appendix includes technical descriptions of methodology data and results the narratives in the chapters describing the findings and their practical implications are written in layman s language Topics covered include biomedical aspects demographics sexuality stressors mental health older women and patient care all of which are supported by case studies *Aging with HIV* James Masten Ph.D., LCSW, 2010-12-01 This gay man s guide to aging with HIV offers a realistic optimistic model for adapting to change whether driven by age AIDS or some combination thereof Its unique three part model identifies the changes and challenges men struggle with and lays out a roadmap of 10 strategies for optimal aging with HIV **HIV and Aging** M. Brennan-Ing, R. F. DeMarco, 2016-11-22 Despite decades of attention on building a global HIV research and programming agenda HIV in older populations has generally been neglected until recently This new book focuses on HIV and aging in the context of ageism with regard to prevention treatment guidelines funding and the engagement of communities and health

and social service organizations The lack of perceived HIV risk in late adulthood among older people themselves as well on the part of providers and society in general has led to a lack of investment in education testing and programmatic responses Ageism perpetuates the invisibility of older adults and in turn renders current medical and social service systems unprepared to respond to patients needs While ageism may lead to some advantages discounts for services for example it is the negative aspects that must be addressed when determining the appropriate community level response to the epidemic *Aging with HIV in Sub-Saharan Africa* Mark Brennan-Ing, Kristen E. Porter, Jennifer E. Kaufman, Catherine MacPhail, Janet Seeley, 2022-06-16 With the development of effective antiretroviral therapies ART in the mid 1990s HIV became a treatable although serious condition and people who are adherent to HIV medications can attain normal or near normal life expectancies Because of the success of ART people 50 and older now make up a majority of people with HIV in high income countries and other places where ART is accessible The aging of the HIV epidemic is a global trend that is also being observed in low and middle income countries including countries in sub Saharan Africa where the greatest number of older people with HIV reside 3 7 million While globally over half of older adults with HIV are in sub Saharan Africa we have little information about the circumstances needs and resiliencies of this population which limits our ability to craft effective policy and programmatic responses to aging with HIV in this region At present our understanding of HIV and aging is dominated by information from the U S and Western Europe where the epidemiology of HIV and the infrastructure to provide social care are markedly different than in sub Saharan Africa *Aging with HIV in Sub Saharan Africa* addresses this gap in our knowledge by providing current research and perspectives on a range of health and psychosocial topics concerning these older adults from across this region This volume provides a unique and timely overview of growing older with HIV in a sub Saharan African context covering such topics as epidemiology health and functioning and social support as well as policy and program implications to support those growing older with HIV There are very few published volumes that address HIV and aging and this is the first book to consider HIV and aging in sub Saharan Africa Most publications in this area focus on HIV and aging in Uganda and South Africa This volume broadens the scope with contributions from authors working in West Africa Botswana and Kenya The range of topics covered here will be useful to professionals in a range of disciplines including psychology epidemiology gerontology sociology health care public health and social work *HIV and Aging* Sharon Dian Lee, 2008-03-27 More than two decades into the global HIV epidemic many HIV positive patients who have access to antiretroviral medications are graying These patients and their clinicians now face another set of complex health issues related to aging HIV and Aging examines the known effects of HIV and HIV medications on older patients and on their immune system *Older Americans: The Changing Face of HIV/AIDS*, S.HRG. 113-863, Serial No. 113-9, September 18, 2013, 113-1, 2017 *HIV Plus*, 2007-11 HIV Plus offers the latest stories on research economics and treatment The magazine raises awareness of HIV related cultural and policy developments in the United States and throughout the world

Aging with HIV James Masten Ph.D., LCSW, 2010-12-01 With improvements in the treatment of HIV disease gay men in great numbers are surviving and thriving into middle and older age While increased longevity brings new hope it also raises unanticipated challenges particularly for gay men who never thought they would live this long How do I deal with all the physical changes Who can I rely on as I get older Is a relationship still in the cards for me What about sex How should I prepare for old age A one of a kind guide for gay men aging with HIV Aging with HIV offers an upbeat down to earth approach for adapting to change whether driven by age AIDS or both Psychotherapist James Masten and physician James Schmidtberger shed light on the many common assumptions and fears of aging with HIV Aging with HIV provides concrete solutions for facing midlife with a positive outlook offering a wealth of advice for breaking unhealthy habits and coping mechanisms The book describes the nine changes common to gay men as they age with HIV discusses the four challenges of aging and offers a unique ten step path to optimal aging with HIV helping the reader to tailor the book's suggestions to the realities of their lives Woven throughout the book are first person narratives from men who recount what worked and did not work for them In addition Rapid Research Fast Fact and Self Reflection boxes highlight the latest research and challenge readers to take stock of the present and plan for the future An invaluable tool to keep handy and to refer to often Aging with HIV is an inviting confident companion to navigating midlife and beyond with HIV **HIV/AIDS in Rural Communities**

Settersten, Jr., Jacqueline L. Angel, 2011-05-11 The Handbook of Sociology of Aging is the most comprehensive engaging and up to date treatment of developments within the field over the past 30 years The volume represents an indispensable source of the freshest and highest standard scholarship for scholars policy makers and aging professionals alike The Handbook of Sociology of Aging

contains 45 far reaching chapters authored by nearly 80 of the most renowned experts on the most pressing topics related to aging today With its recurring attention to the social forces that shape human aging and the social consequences and policy implications of it the contents will be of interest to everyone who cares about what aging means for individuals families and societies The chapters of the Handbook of Sociology of Aging illustrate the field s extraordinary breadth and depth which has never before been represented in a single volume Its contributions address topics that range from foundational matters such as classic and contemporary theories and methods to topics of longstanding and emergent interest such as social diversity and inequalities social relationships social institutions economies and governments social vulnerabilities public health and care arrangements The volume closes with a set of personal essays by senior scholars who share their experiences and hopes for the field and an essay by the editors that provides a roadmap for the decade ahead The Handbook of Sociology of Aging showcases the very best that sociology has to offer the study of human aging     *The Person with HIV/AIDS* Felissa R.

Lashley, Jerry D. Durham, 2009-09-08 This is an excellent reference for those caring for clients with HIV AIDS I strongly recommend this book Doody s HIV AIDS is no longer a certain death sentence Patients fighting the chronic symptoms of HIV AIDS are now living longer fuller lives due to recent scientific and pharmaceutical breakthroughs As a result the new generation of caregivers must keep pace with cutting edge evidence based practices to better serve patients who may live with HIV AIDS for several decades This updated edition is a vital resource for nurses and other health care professionals providing care to HIV positive persons in the 21st century The contributors present essential information on the medical assessment and management of symptoms the prevention of infection ethical and legal dimensions of care and much more With a greater emphasis on the international dimensions of the HIV pandemic and the treatment of minority populations this book serves as an essential guide for nurses and health care practitioners serving patients with HIV AIDS Key topics include HIV screening testing and counseling HIV AIDS nursing case management within the global community HIV and gay lesbian bisexual and transgender persons Children and HIV prevention and management HIV in corrections facilities and the care of incarcerated patients Sex workers and the transmission of HIV     **Aging and Lung Disease** Margaret Pisani, 2011-10-14

People age 65 and older are the fastest growing segment of the U S population In the 2010 census 16% of the population 50 million people were age 65 and older That number is projected to increase to 66 million by the year 2050 Life expectancy has also increased with recent CDC reports indicating life expectancy at 77 9 years Age adjusted death rates have decreased significantly with the largest changes occurring in older patients Despite these trends the 10 leading causes of death include several pulmonary etiologies including lung cancer chronic respiratory diseases influenza and pneumonia Aging and Lung Disease A Clinical Guide is devoted to understanding the impact of respiratory diseases in older patients It includes reviews of physiology of the aging lung allergy and immunology of the aging as well as sleep changes over the life cycle There are also comprehensive reviews on specific disease topics including chronic obstructive lung disease lung cancer atypical

mycobacteria interstitial lung disease pulmonary hypertension pulmonary embolism obstructive sleep apnea sleep disorders in older patients Two chapters focus on unique issues in older patients HIV and lung transplant Included also are important chapters on assessing functional and cognitive status and end of life issues in older patients with lung disease In addition to outlining the current state of knowledge each chapter focuses on special considerations when caring for older patients Of particular interest to pulmonologists internists and gerontologists other readers such as pulmonary and geriatric nurse practitioners as well as clinical researchers interested in both pulmonary and aging issues will find *Aging and Lung Disease A Clinical Guide* to be a vital resource for improving their care of older patients with lung disorders **Handbook of Social**

**Work in Health and Aging** Barbara Berkman, 2006-02-09 The *Handbook of Social Work in Health and Aging* is the first reference to combine the fields of health care aging and social work in a single authoritative volume These areas are too often treated as discrete entities while the reality is that all social workers deal with issues in health and aging on a daily basis regardless of practice specialization As the baby boomers age the impact on practice in health and aging will be dramatic and social workers need more specialized knowledge about aging health care and the resources available to best serve older adults and their families The volume's 102 original chapters and 13 overviews written by the most experienced and prominent gerontological health care scholars in the United States and across the world provide social work practitioners and educators with up to date knowledge of evidence based practice guidelines for effectively assessing and treating older adults and their families new models for intervention in both community based practice and institutional care and knowledge of significant policy and research issues in health and aging A truly monumental resource this handbook represents the best research on health and aging available to social workers today **Individualized Assessment of Brain**

**Aging across the Lifespan: Applications in Health and Disease** Katja Franke, Christian Gaser, Nicolas Cherbuin, James H. Cole, 2020-08-10 *HIV/AIDS and the Older Adult* Kathleen Mary Nokes, 1996 Twenty nine collected essays represent a critical history of Shakespeare's play as text and as theater beginning with Samuel Johnson in 1765 and ending with a review of the Royal Shakespeare Company production in 1991 The criticism centers on three aspects of the play the love friendship debate *Aging in Comparative Perspective* Ian Gillespie Cook, Jamie Halsall, 2012-02-03 This book examines the key aging processes in seven countries United States United Kingdom Sweden Japan China Nepal and South Africa and the main policies that have been and are being developed to deal with this rapid change in the demographic profile It addresses the problems that are identified as well as the positive aspects of aging within each of these contrasting societies Thus it makes a significant contribution to the major debates about growing old across the globe **Managing the Older Adult Patient**

**with HIV** Giovanni Guaraldi, Julian Falutz, Chiara Mussi, Ana Rita Silva, 2016-04-12 This concise clinically focused pocket guide offers a complete overview of HIV in the older patient and reviews the latest guidelines treatment options clinical trials and management of HIV within this subgroup The easily accessible text offers infectious disease specialists and other health

care professionals with an excellent quick reference tool with full color tables and figures enhancing the text further HIV is a chronic disease that affects the immune system leading to AIDS As treatments have progressed and patients with HIV are living longer a new aspect has to be taken in to consideration when treating HIV and other conditions Comorbidities are rife within older adults with HIV as many of the treatments for HIV cause long term side effects such as heart conditions and cancer Special consideration must be taken to ensure no toxic drug drug interactions between treatments *The Collective Spirit of Aging Across Cultures* Halaevalu F.Ofahengaue Vakalahi, Gaynell M. Simpson, Nancy Giunta, 2014-01-28 The collective inclusive and intersectional framework used in this book speaks to the significance of understanding aging across diverse cultures from multiple perspectives but still as a shared human experience The underlying message of the book is that although we are unique and different in our aging processes we are ultimately connected through this physical mental and spiritual experience of aging Thus regardless of whether we are service providers service recipients educators or merely fellow human beings it is important that we approach the aging experience through a collective lens for discovering and sharing resources as we age honoring the past while simultaneously accepting that the future is here A few select examples of key findings from this collaborative work are as follows First despite progress in the field certain issues remain to be addressed including the challenges of racism and sexism mistreatment the digital divide poverty and other social and economic crises in urban and rural communities as they relate to our aging population Second the need for sustaining a sense of independence among the aged and interdependence among supportive systems is warranted Third our elders continue to benefit from culturally competent services community based health interventions and social services that addresses normative and emerging challenges for them Fourth spirituality in both indigenous and contemporary perspectives remains important for our elders development and quality of life *Fundamentals of HIV Medicine 2023* ,2023 Featuring overlapping recommendations for HIV and COVID 19 *Fundamentals of HIV Medicine 2023* is the AAHIVM s end to end clinical resource for the treatment of individuals with HIV AIDS now updated to include injectable antiretroviral treatment and long term viral remission
