AIDS and the Policy Struggle in the United States Patricia D. Siplon, 2002 Siplon political science Saint Michael s College identifies the three key factors of any policy formation analysis as the role of organization the role of values and the problem of changing distributions and inflicting costs on affected groups and society in general She applies this understanding to an exploration of several policy areas and their defining struggles related to the AIDS epidemic in the United States The actions and impacts of actors inside and outside of government are explored in the cases of new drug policy blood policy harm reduction versus abstinence as AIDS prevention models the Ryan White CARE Act and AIDS as a foreign policy issue Annotation copyrighted by Book News Inc Portland OR The Life and Death of Ryan White Paul M. Renfro, 2024-10-22 In the 1980s as HIV AIDS ravaged queer communities and communities of color in the United States and beyond a straight white teenager named Ryan White emerged as the face of the epidemic Diagnosed with hemophilia at birth Ryan contracted HIV through contaminated blood products In 1985 he became a household name after he was barred from attending his Indiana middle school As Ryan appeared on nightly news broadcasts and graced the covers of popular magazines he was embraced by music icons and well known athletes achieving a curious kind of stardom Analyzing his struggle and celebrity Paul M Renfro s powerful biography grapples with the contested meanings of Ryan s life death and afterlives As Renfro argues Ryan's fight to attend school forced the American public to reckon with prevailing misconceptions about the AIDS epidemic Yet his story also reinforced the hierarchies at the heart of the AIDS crisis Because the innocent Ryan had contracted HIV through no fault of his own as many put it his story was sometimes used to blame presumably quilty populations for spreading the virus Reexamining Ryan's story through this lens Renfro reveals how the consequences of this stigma continue to pervade policy and cultural understandings of HIV AIDS today Pharmaceutical Autonomy and **Public Health in Latin America** Matthew B. Flynn, 2014-12-05 Brazil has occupied a central role in the access to medicines movement especially with respect to drugs used to treat those with the human immunodeficiency virus HIV that causes the acquired immune deficiency syndrome AIDS How and why Brazil succeeded in overcoming powerful political and economic interests both at home and abroad to roll out and sustain treatment represents an intellectual puzzle In this book Matthew Flynn traces the numerous challenges Brazil faced in its efforts to provide essential medicines to all of its citizens Using dependency theory state theory and moral underpinnings of markets Flynn delves deeper into the salient factors contributing to Brazil's successes and weaknesses including control over technology creation of political alliances and instrumental use of normative frameworks and effectively explains the ability of countries to fulfill the prescription drug needs of its population versus the interests and operations of the global pharmaceutical industry Pharmaceutical Autonomy and Public Health in Latin America is one of the only books to provide an in depth account of the challenges that a developing country like Brazil faces to fulfill public health objectives amidst increasing global economic integration and new international trade agreements

Scholars interested in public health issues HIV AIDS and human rights but also to social scientists interested in Latin America and international political economy will find this an original and thought provoking read **Political Institutions** and Lesbian and Gay Rights in the United States and Canada Miriam Smith, 2008-08-18 Lesbian and gay citizens today enjoy a much broader array of rights and obligations and a greater ability to live their lives openly in both the U S and Canada However while human rights protections have been exponentially expanded in Canada over the last twenty years even basic protections in areas such as employment discrimination are still unavailable to many in the United States This book examines why these similar societies have produced such divergent policy outcomes focusing on how differences between the political institutions of the U S and Canada have shaped the terrain of social movement and counter movement mobilization It analyzes cross national variance in public policies toward lesbians and gay men especially in the areas of the decriminalization of sodomy the passage of anti discrimination laws and the enactment of measures to recognize same sex relationships For political science sociology and queer studies alike this book will prove vital as movements for lesbian and gay rights continue to recast the social landscape in North America and beyond Fighting for Our Lives Susan Maizel Chambré, 2006 Fighting for Our Lives is the first comprehensive social history of New York's AIDS community a diverse array of people that included not only gay men but also African Americans Haitians Latinos intravenous drug users substance abuse professionals elite supporters and researchers Looking back over twenty five years Susan Chambr focuses on the ways that these disparate groups formed networks of people and organizations that both together and separately supported persons with AIDS reduced transmission funded research and in the process gave a face to an epidemic that for many years whether because of indifference homophobia or inefficiency received little attention from government or health care professionals The Politics of Blood Anne-Maree Farrell, 2012-05-24 How best to manage risk involving multi valued human biological materials is the overarching theme of this book which draws on the sourcing and supply of blood as a case study Blood has ethical social scientific and commercial value This multi valuing process presents challenges in terms of managing risk therefore making it ultimately a matter for political responsibility. This is highlighted through an examination of the circumstances that led to HIV blood contamination episodes in the US England and France as well as their consequences The roles of scientific expertise and innovation in managing risks to the blood system are also analysed as is the increased use of precautionary and legal strategies in the post HIV blood contamination era Finally consideration is given to a range of policy and legal strategies that should underpin effective risk governance involving multi valued human biological materials The AIDS Pandemic Lawrence O. Gostin, 2005-11-16 In this collection of essays Lawrence O Gostin an internationally recognized scholar of AIDS law and policy confronts the most pressing and controversial issues surrounding AIDS in America and around the world He shows how HIV AIDS affects the entire population infected and uninfected by influencing our social norms our economy and our country's role as a world leader Now in the third decade of

this pandemic the nation and the world still fail to respond to the needs of persons living with HIV AIDS and continue to tolerate injustice in their treatment Gostin argues AIDS both in the United States and globally deeply affects poor and marginalized populations and many U S policies are based on conservative moral values rather than public health and social justice concerns Gostin tackles the hard social legal political and ethical issues of the HIV AIDS pandemic privacy and discrimination travel and immigration clinical trials and drug pricing exclusion of HIV infected health care workers testing and treatment of pregnant women and infants and needle exchange programs This book provides an inside account of AIDS policy debates together with incisive commentary It is indispensable reading for advocates scholars health professionals lawyers and the concerned public Thinking Politically about HIV Kent Buse, Dennis Altman, 2016-04-08 AIDS has a unique political history As fears grew of a global pandemic on the scale of AIDS in sub Saharan Africa AIDS was briefly treated as an issue of high politics in the international arena and generated significant resources for country programmes That initial commitment is now declining and if AIDS is to maintain its visibility and contribution to global solidarity human rights and dignity its politics will have to evolve to reflect the profound geo political economic and social transformations underway today This volume brings together leading scholars from a variety of disciplines who work at the intersection of politics and HIV They reflect on the lessons learned from the past thirty years of the politics of AIDS and how political science writ large can further contribute to the understanding and practice of political mobilization around AIDS Through case studies and analysis new insights into identity politics and social movements in countries as diverse as Brazil Switzerland Vietnam and Zambia are offered alongside new approaches to understanding the determinants and incentives which generate political will and commitment This book was published as a special issue of Contemporary Politics The HIV Pandemic Peter Piot, 2007-12-14 As we approach the 25th anniversary of the first recognition of HIV AIDS in 1981 this book reflects on the international impact of the disease It has persistently remained a global issue with more than 50 million people worldwide estimated to have been infected since that date This ambitious book written by 165 authors from 30 countries offers a multi country comparative study that examines how the response to the common global threat of HIV is shaped by the history culture institutions and health systems of the individual countries affected Increasingly the shift of health systems has been from prevention only as the main containment strategy to a strategy that includes scaling up HIV treatment and care and prevention services including antiretroviral therapy Thus all parts of the health system must be involved policy makers healthcare professionals and users of the services have been forced to think differently about how services are financed how resources are allocated how systems are structured and organized how services are delivered to patients and how the resulting activity is monitored and evaluated in order to improve the effectiveness efficiency equity and acceptability of the response This book is unique in attempting to describe and assess a range of responses across the globe by situating them within the characteristics of each country and its health system Most chapters combine a health policy expert with an HIV

specialist allowing both a top down health system approach and a bottom up HIV specific perspective There are thematic and analytical sections which provide an overview and some suggestions for solutions to the most serious outstanding issues and chapters which analyse specific country and organisational responses There is no perfect health system but the evidence provided here allows the sharing of knowledge and a opportunity to assess the impact and reactions to an epidemic that must be considered a long term issue Understanding Securitisation Theory Thierry Balzacq, 2010-09-13 This volume aims to provide a new framework for the analysis of securitization processes increasing our understanding of how security issues emerge evolve and dissolve Securitisation theory has become one of the key components of security studies and IR courses in recent years and this book represents the first attempt to provide an integrated and rigorous overview of securitization practices within a coherent framework To do so it organizes securitization around three core assumptions which make the theory applicable to empirical studies the centrality of audience the co dependency of agency and context and the structuring force of the dispositif These assumptions are then investigated through discourse analysis process tracing ethnographic research and content analysis and discussed in relation to extensive case studies This innovative new book will be of much interest to students of securitisation and critical security studies as well as IR theory and sociology Thierry Balzacq is holder of the Tocqueville Chair on Security Policies and Professor at the University of Namur He is Research Director at the University of Louvain and Associate Researcher at the Centre for European Studies at Sciences Po Paris Pandemic in Latin America Shawn C. Smallman, 2007 Examines the growing problem of HIV infection and AIDS in Latin America revealing the various factors within each country including cultural issues and public policies that affect the spread of AIDS and analyzes the issues of gender race sexuality poverty politics and international relations in both Latin America and the Caribbean in terms of the AIDS pandemic Simultaneous United States International Strategy on HIV/AIDS. ,1995 Remaking a Life Celeste Watkins-Hayes, 2019-08-20 In the face of life threatening news how does our view of life change and what do we do it transform it Remaking a Life uses the HIV AIDS epidemic as a lens to understand how women generate radical improvements in their social well being in the face of social stigma and economic disadvantage Drawing on interviews with nationally recognized AIDS activists as well as over one hundred Chicago based women living with HIV AIDS Celeste Watkins Hayes takes readers on an uplifting journey through women s transformative projects a multidimensional process in which women shift their approach to their physical social economic and political survival thereby changing their viewpoint of dying from AIDS to living with it With an eye towards improving the lives of women Remaking a Life provides techniques to encourage private nonprofit and government agencies to successfully collaborate and shares policy ideas with the hope of alleviating the injuries of inequality faced by those living with HIV AIDS everyday The African State and the AIDS Crisis Amy S. characterized as inefficient corrupt and illegitimate The volume questions how aspects of the African state have affected policy responses to AIDS It highlights how African states must initiate develop and or implement the long term policy solutions necessary to combat AIDS It employs empirical studies from the international and national arena to illustrate why some African states have been able and willing to address AIDS while others have not Contributions analyze how international actors civil society organizations state ideology patriarchy and state capacity have influenced policies to fight AIDS Examining AIDS policies through the prism of African state development and linkages to domestic and international actors this book provides a nuanced understanding of the variety of responses to AIDS in Africa Africa and Global **Health Governance** Amy S. Patterson, 2018-03 A timely inquiry into how domestic politics and global health governance interact in Africa Global health campaigns development aid programs and disaster relief groups have been criticized for falling into colonialist patterns running roughshod over the local structure and authority of the countries in which they work Far from powerless however African states play complex roles in health policy design and implementation In Africa and Global Health Governance Amy S Patterson focuses on AIDS the 2014 2015 Ebola outbreak and noncommunicable diseases to demonstrate why and how African states accept challenge or remain ambivalent toward global health policies structures and norms Employing in depth analysis of media reports and global health data Patterson also relies on interviews and focus group discussions to give voice to the various agents operating within African health care systems including donor representatives state officials NGOs community based groups health activists and patients Showing the variety within broader patterns this clearly written book demonstrates that Africa's role in global health governance is dynamic and not without agency Patterson shows how for example African leaders engage with international groups attempting to maintain their own leadership while securing the aid their people need Her findings will benefit health and development practitioners scholars and students of global health governance and African politics **International Perspectives on Women and** HIV Samuel A MacMaster, Brian E Bride, CINDY DAVIS, 2013-09-13 Throughout the world the threat of HIV AIDS to women s health has become the focus of increased concern The Joint United Nations Programme on HIV AIDS 2004 reports that almost 20 million women and girls are living with HIV globally accounting for nearly half of all people living with HIV worldwide Infection rates among women are rising in every region worldwide including high income countries in which heterosexual intercourse may now be the most common mode of transmission Although there are many contributing factors to the current trends in HIV most women who become HIV infected do not practice high risk behaviour Women worldwide may individually view themselves as less susceptible than men and may pay less attention about how HIV is transmitted and how to prevent infection There are also gender inequalities stemming from sexual double standards that constrain women s access to care treatment and support This work focuses on international perspectives on women and HIV casting a deliberately wide net addressing the issue of the interaction between HIV and gender in a specific geographic area Our
