

## Chapter 5 -- Elasticity and Its Application

In this chapter, look for the answers to these questions:

- What is elasticity? What kinds of factors can elasticity help us understand?
- What is the price elasticity of demand? How is it related to the demand curve? How is it related to demand's responsiveness?
- What is the price elasticity of supply? How is it related to the supply curve?
- What are the income and cross-price elasticities of demand?

It interests...

How things respond to some phenomena.

How change in price for someone, and quantity sold for someone else, varies.

How price is related to the opportunity cost of your time, to your thinking, to your good (good or bad).

How far it is from your point that you are willing to move without it you have your good. How many more utilities? How much will your demand fall, or might it even increase?

Examples:

- Some good. Quantity measured that much. The variable response changes in another variable.
  - One type of elasticity measures how much demand for other variables and that of other than price.
- Definition: The change in a particular measure of the responsiveness of  $Q^D$  to  $Q^D$  to price of the commodity.

Price Elasticity of Demand

- Price elasticity of demand measures how much  $Q^D$  responds to a change in  $P$ .
- Formula: the price elasticity of demand is defined:

$$\text{Price elasticity of demand} = \frac{\text{Percentage change in } Q^D}{\text{Percentage change in } P}$$

Along a demand curve,  $P$  and  $Q$  move in opposite directions, which means that price elasticity is negative. Use this fact to check your work and report all price elasticities as positive numbers.

Example:

The price elasticity of demand for a commodity is -0.5. If the price of the commodity falls by 10%, the quantity demanded will increase by 5%.

Calculating Percentage Changes

Example: If the price of a commodity falls from \$10 to \$9, the percentage change in price is:

Percentage change =  $\frac{\text{New Price} - \text{Old Price}}{\text{Old Price}} \times 100$
