Encyclopedia of Production and Manufacturing Management Paul M. Swamidass,2006-09-21 The Encyclopedia of Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the fundamental reference work Over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all directions For example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production and mass customization to name a few This explosive growth makes the need for this volume abundantly clear The manufacturing industry thinks and acts more broadly than it did several decades ago The most notable change has been the need for manufacturing managers to think in technological strategic and competitive terms This is a very favorable development and it leads to manufacturing success The entries in this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management The encyclopedia consists of articles of varying lengths The longer articles on important concepts and practices range from five

to fifteen pages There are about 100 such articles written by nearly 100 authors from around the world In addition there are over 1000 shorter entries on concepts practices and principles The range of topics and depth of coverage is intended to suit both student and professional audiences The shorter entries provide digests of unfamiliar and complicated subjects Difficult subjects are made intelligible to the reader without oversimplification The strategic and technological perspectives on various topics give this Encyclopedia its distinctiveness and uniqueness The world of manufacturing today is increasingly competitive It is apparent that manufacturers must respond to these competitive pressures with technical and strategic innovation This encyclopedia has been developed to help researchers students and those in the manufacturing industry to understand and implement these ongoing changes in the field

Management Scholarship and Organisational Change

Miriam Green,2019-01-08 Change is a crucial and inescapable process for many organisations It remains a constant challenge for managers and many change management initiatives fail Burns and Stalker s seminal text on managing change The Management of Innovation has often been used as a basis for research in mainstream management journals and has been represented as an important theory in popular and long established management textbooks The issues raised in that book are still being grappled with by academics and practitioners today Miriam Green provides a critical analysis of the mainstream construction of knowledge on change management through an examination of representations of that text The main thesis of her book is that this literature though valuable does not provide a full picture Its objectivist approach ignores the role of other factors raised in the original study These factors include the effects of power politics resistance and employee influence on the outcomes of managerial change strategies and on other organisational processes with important consequences for the understanding of change initiatives by both academics and practitioners This is part of an ongoing debate in management studies and more widely in the social sciences about theoretical approaches and research methods The originality of this book lies in its in depth comparison of an entire monograph on organisations facing technological and commercial change with an equally in depth analysis of the ways this work has been represented and used as a basis for teaching and research It highlights the limitations of the exclusive use of one approach to explain the complications arising from organisational change It challenges the scientific justification offered for that approach and supports arguments for more inclusive and sustainable scholarship of greater relevance to academics managers and other organisational stakeholders

Planning the Development of Builders, Leaders and Managers for 21st-Century Business: Curriculum Review at Columbia Business School N. Capon,2012-12-06 Business and management education has an important impact on business practice throughout the world To a very large extent possession of the MBA degree is a passport into the upper reaches of management and CEOs of many major corporations have earned an MBA It is a reasonable inference that the education received by these leaders and managers during their MBA experience has an important impact on the way that businesses throughout the world are led and managed and that major corporate decisions are made The heart of the MBA education is the curriculum and curriculum design is perhaps the most important strategic function for a business school faculty to undertake In order to understand the many issues concerning this contemporary curriculum review this book examines three related contextual domains First it details the long term growth of business and management education Second it examines

the major theoretical and empirical literatures on organizational evolution and decision making paying special attention to decision making in institutions of higher education Finally the book describes the previous major curriculum review at Columbia Business School in the late 1950s and the subsequent changes that formed the curriculum that was changed in 1992 This book demonstrates what can be achieved by an institution that sets high standards for its business education and assists faculty and administrators in other schools of business and management as they contemplate revision of their curricula In addition it provides a prime example of curriculum design effort in one of the leading institutions worldwide Finally it will be of interest to scholars in several different fields notably higher education curriculum review organizational decision making and long run organizational evolution

Public Administration Reformation Yogesh Dwivedi, Mahmud Shareef, Sanjay K Pandey, Vinod Kumar, 2013-11-12 In an attempt to instill trust in their performance credibility integrity efficiency cost effectiveness and good governance many public organizations are in effect viewing tax paying citizens as consumers Little research exists to explore synergies between the market economy public administration reformation and their complex bilateral effects This book takes a timely look at the heightened need for public

administration reform as a result of the economic challenges currently faced by nations across the globe. In particular, it explores the roles of eGovernment and a citizen-centric focus in this transformation. Public Administration Reform examines several commonly held assumptions about public administration: the public sector is slow and bureaucratic; government employees are frequently disengaged; and government agencies are sometimes wasteful. eGovernment is proposed as a key tool in the improvement of both public services and reputations of public organizations. **STRATEGIC FINANCIAL**
