Equity & Cultural Responsiveness in the Middle Grades Kathleen M. Brinegar, Lisa M. Harrison, Ellis Hurd, 2019-04-01 While developmental responsiveness is a deservedly key emphasis of middle grades education this emphasis has often been to the detriment of focusing on the cultural needs of young adolescents This Handbook volume explores research relating to equity and culturally responsive practices when working with young adolescents Middle school philosophy largely centers on young adolescents as a collective group This lack of focus has great implications for young adolescents of marginalized identities including but not limited to those with culturally and linguistically diverse backgrounds LGBTQ youth and those living in poverty If middle level educators claim to advocate for young adolescents we need to mainstream conversations about supporting all young adolescents of marginalized identities It empowers researchers educators and even young adolescents to critically examine and understand the intersectionality of identities that historically influenced and continue to affect young adolescents and why educators might perceive marginalized youth in certain ways It

is for these reasons that researchers teachers and other key constituents involved in the education of young adolescents must devote themselves to the critical examination and understanding of the historical and current socio cultural factors affecting all young adolescents The chapters in this volume serve as a means to open an intentional and explicit space for providing a critical lens on early adolescence a lens that understands that both developmental and cultural needs of young adolescents need to be emphasized to create a learning environment that supports every young adolescent learner

John H Clarke Professor Emeritus University of Vermont

Students at the Center Bena Kallick, Allison Zmuda, 2017-01-30 Educators most important work is to help students develop the intellectual and social strength of character necessary to live well in the world The way to do this argue authors Bena Kallick and Allison Zmuda is to increase the say students have in their own learning and prepare them to navigate complexities they face both inside and beyond school This means rethinking traditional teacher and student roles and re examining goal setting lesson planning

assessment and feedback practices It means establishing classrooms that prioritize Voice Involving students in the what and the how of learning and equipping them to be stewards of their own education Co creation Guiding students to identify the challenges and concepts they want to explore and outline the actions they will take Social construction Having students work with others to theorize pursue common goals build products and generate performances Self discovery Teaching students to reflect on their own developing skills and knowledge so that they will acquire new understandings of themselves and how they learn Based on their exciting work in the field Kallick and Zmuda map out a transformative model of personalization that puts students at the center and asks them to employ the set of dispositions for engagement and learning known as the Habits of Mind They share the perspectives of educators engaged in this work highlight the habits that empower students to pursue aspirations investigate problems design solutions chase curiosities and create performances and provide tools and recommendations for adjusting classroom practices to facilitate learning that is self directed dynamic sometimes messy and always meaningful

Jennifer S. Dail,Shelbie Witte,Steven T. Bickmore,2018-04-26 This book considers the practical intersection between digital media and young adult texts In these books teachers and teacher educators offer practical examples for engaging students with crafting critical responses to young adult literature through digital spaces It examines how teachers can use these spaces to help students encounter evaluate and engage in the world in which they live Young adult literature offers a vehicle through which students can discuss and explore the world in a more removed manner while digital media offers a paradigm for helping students craft multimodal responses that extend beyond the traditional literary essay This intersection asks teachers to consider how they are asking students to interact with the texts they read It asks them to invite students to enter and contribute to broader conversations through the production of their own texts This book illustrates pedagogical principles in practice showing what is possible in literature study in classrooms **Middle Grades Research Journal** Larry

G. Daniel,2017-06-01 Middle Grades Research Journal MGRJ is a refereed peer reviewed journal that publishes original studies providing both empirical and theoretical frameworks that focus on middle grades education A variety of articles are published quarterly in March June September and December of each volume year *Over-Tested and Under-Prepared* Bob

Sornson,2022-11-23 Pressured by standardized testing and rigid pacing guidelines many schools are forced to cover too much content too quickly without being able to meet the needs of individual students In this powerful book from acclaimed author and presenter Bob Sornson you ll learn how shifting from curriculum based instruction to competency based personalized learning can help students become more successful confident and engaged learners Each chapter is easy to digest and provides compelling research strategies and anecdotes to inspire conversation and action This second edition provides updated statistics and examples of schools successfully using competency based learning models to help you bring about meaningful change Teachers administrators and community leaders will all find practical resources and a clear rationale for transforming our current educational system into a new dynamic model of teaching and learning The Impact

of Innovative ICT Education and AI on the Pedagogical Paradigm Boris Aberšek,2019-04-25 To be a good teacher one must acquire a large set of different kinds of interdisciplinary knowledge Education for teachers and trainers consists in part of learning the language of education and the appropriate associated skills A deeper understanding of judgments and choices also requires a richer vocabulary than is available in everyday language On a systemic level the education system needs to consider the individual as the basic building block of society and further take into consideration the individual s consciousness related to their emotional intelligence Because a person s consciousness is something entirely singular and

inherent to the individual some kind of generalization will have to be constructed which will contribute enough in terms of novelty and progress to make it innovative enough for the purposes of teaching and learning This volume will serve to provoke cognitive dissonance and intellectual unease as it explores cognitive theories and inspires researchers and teachers to update and invigorate some of the theories that have been embedded in their minds since their own school years In order for this to happen the book provides readers with many valuable insights and introduces new experiences resulting from alternative teaching practices
