When it comes to their personal transportation today's youth have shunned the large heavy performance cars of their parents' generation and instead embraced what has become known as the sport compact smaller lightweight modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology laden high revving engines. And by far the most sought after and modified cars are the Hondas and Acuras of the mid 80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic Accord and Prelude as well as the Acura Integra.
