Improved Seismic Monitoring - Improved Decision-Making National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on Seismology and Geodynamics, Committee on the Economic Benefits of Improved Seismic Monitoring, 2006-01-04 Improved Seismic Monitoring Improved Decision Making describes and assesses the varied economic benefits potentially derived from modernizing and expanding seismic monitoring activities in the United States These benefits include more effective loss avoidance regulations and strategies improved understanding of earthquake processes better engineering design more effective hazard mitigation strategies and improved emergency response and recovery The economic principles that must be applied to determine potential benefits are reviewed and the report concludes that although there is insufficient information available at present to fully quantify all the potential benefits the annual dollar costs for improved seismic monitoring are in the tens of millions and the potential annual dollar benefits are in the hundreds of millions Earthquake Monitoring, Research, and Preparation United States. Harmonization of Seismic Hazard in Vrancea Zone Anton Zaicenco, Iolanda Craifaleanu, Ivanka Paskaleva, 2008-11-14 The NATO Science for Peace Project SfP 980468 Harmonization of Seismic Hazard and Risk Reduction in Countries Influenced by Vrancea Earthquakes was an ambitious attempt to harmonize the seismic hazard assessment in Bulgaria Moldova and Romania and provide the guidelines for seismic risk reduction in the target countries Related to the study of intermediate depth Vrancea earthquakes it became operational in 2005 The project co coordinators were as follows Prof G ney zcebe Ankara Turkey Dr Anton Zaicenco Chisinau Moldova Dr Iolanda Craifaleanu Bucharest Romania Prof Ivanka Paskaleva Sofia Bulgaria The project has brought together leading research personalities in the area of earthquake engineering seismology and earth physics from several countries for brainstorming sessions informal discussions and exchanges of ideas One of its key components was an upgrade of the strong motion seismic networks of the countries participants which created a foundation for a long term collaboration A number of papers have been published as a result of the work conducted under this project The present book contains the Proceedings of the Closing Workshop for Project SfP 980468 which was organized in Chisinau Moldova on May 20 2008 From hazard analyses to protection of the historical buildings from study of the dynamic properties of the soft soils to paleoseismology there are few areas of interest that remain untouched Research from the NATO members and partner countries in South Eastern Europe that forms the components of NATO Project SfP 980468 has made solid contributions to the Workshop theme *Multi-hazard Approaches to Civil Infrastructure Engineering* Paolo Gardoni, James M. LaFave, 2016-06-22 This collection focuses on the development of novel approaches to address one of the most pressing challenges of civil engineering namely the mitigation of natural hazards Numerous engineering books to date have focused on and illustrate considerable progress toward mitigation of individual

hazards earthquakes wind and so forth The current volume addresses concerns related to overall safety sustainability and resilience of the built environment when subject to multiple hazards natural disaster events that are concurrent and either correlated e g wind and surge uncorrelated e g earthquake and flood cascading e g fire following earthquake or uncorrelated and occurring at different times e g wind and earthquake The authors examine a range of specific topics including methodologies for vulnerability assessment of structures new techniques to reduce the system demands through control systems instrumentation monitoring and condition assessment of structures and foundations new techniques for repairing structures that have suffered damage during past events or for structures that have been found in need of strengthening development of new design provisions that consider multiple hazards as well as questions from law and the humanities relevant to the management of natural and human made hazards

National Earthquake Resilience National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on Seismology and Geodynamics, Committee on National Earthquake Resilience—“Research, Implementation, and Outreach, 2011-09-09 The United States will certainly be subject to damaging earthquakes in the future Some of these earthquakes will occur in highly populated and vulnerable areas Coping with moderate earthquakes is not a reliable indicator of preparedness for a major earthquake in a populated area The recent disastrous magnitude 9 earthquake that struck northern Japan demonstrates the threat that earthquakes pose Moreover the cascading nature of impacts the earthquake causing a tsunami cutting electrical power supplies and stopping the pumps needed to cool nuclear reactors demonstrates the potential complexity of an earthquake disaster Such compound disasters can strike any earthquake prone populated area National Earthquake Resilience presents a roadmap for increasing our national resilience to earthquakes The National Earthquake Hazards Reduction Program NEHRP is the multi agency program mandated by Congress to undertake activities to reduce the effects of future earthquakes in the United States The National Institute of Standards and Technology NIST the lead NEHRP agency commissioned the National Research Council NRC to develop a roadmap for earthquake hazard and risk reduction in the United States that would be based on the goals and objectives for achieving national earthquake resilience described in the 2008 NEHRP Strategic Plan National Earthquake Resilience does this by assessing the activities and costs that would be required for the nation to achieve earthquake resilience in 20 years National Earthquake Resilience interprets resilience broadly to incorporate engineering science physical social economic behavioral and institutional governing dimensions Resilience encompasses both pre disaster preparedness activities and post disaster response In combination these will enhance the robustness of communities in all earthquake vulnerable regions of our nation so that they can function adequately following damaging earthquakes While National Earthquake Resilience is written primarily for the NEHRP it also speaks to a broader audience of policy makers earth scientists and emergency managers

Disaster Resilience National Academies,Policy and Global Affairs,Committee on Science, Engineering, and Public Policy,Committee on Increasing National Resilience to Hazards and Disasters,2012-12-29 No person or place is immune from disasters or disaster related losses Infectious disease outbreaks acts of terrorism social unrest or financial disasters in addition to natural hazards can all lead to large scale consequences for the nation and its communities Communities and the nation thus face difficult fiscal social cultural and environmental choices about the best ways to ensure basic security and quality of life against hazards deliberate attacks and disasters Beyond the unquantifiable costs of injury and loss of life from disasters statistics for 2011 alone indicate economic damages from natural disasters in the United States exceeded 55 billion with 14 events costing more than a billion dollars in damages each One way to reduce the impacts of disasters on the nation and its communities is to invest in enhancing resilience the ability to prepare and plan for absorb recover from and more successfully adapt to adverse events Disaster Resilience A National Imperative addresses the broad issue of increasing the nation s resilience to disasters This book defines national resilience describes the state of knowledge about resilience to hazards and disasters and frames the main issues related to increasing resilience in the United States It also provide goals baseline conditions or performance metrics for national resilience and outlines additional information data gaps and or obstacles that need to be addressed to increase the nation s resilience to disasters Additionally the book s authoring committee makes recommendations about the necessary approaches to elevate national resilience to disasters in the United States Enhanced resilience allows better anticipation of disasters and better planning to reduce disaster losses rather than waiting for an event to occur and paying for it afterward Disaster Resilience confronts the topic of how to increase the nation s resilience to disasters through a vision of the characteristics of a resilient

nation in the year 2030 Increasing disaster resilience is an imperative that requires the collective will of the nation and its communities Although disasters will continue to occur actions that move the nation from reactive approaches to disasters to a proactive stance where communities actively engage in enhancing resilience will reduce many of the broad societal and economic burdens that disasters can cause *IRIS Newsletter* ,2006 **Artificial Intelligence, Geographic**
