Excerpt from *An Introduction to Machine Drawing and Design* It is now generally recognised that the old fashioned method of teaching machine drawing is very unsatisfactory In teaching by this method an undimensioned scale drawing often of a very elaborate description is placed before the student who is required to copy it Very often the student succeeds in making a good copy of the drawing placed before him without learning very much about the object represented by it and this state of matters is sometimes not much improved by the presence of the teacher who is often simply an art master knowing nothing about machine design It is related of one school that a pupil after making a copy of a particular drawing had a discussion with his teacher as to whether the object represented was a sewing machine or an electrical machine Evidently the publisher of the drawing example in this case did not adopt the precaution which a backward student used at an examination in machine design he put on a full title above his drawing for the information of his examiner Now if machine drawing is to be of practical use to any one he must be able to understand the form and arrangement of the parts of a machine from an inspection of suitable drawings of them without seeing the parts themselves Also he ought to be able to make suitable drawings of a machine or parts of a machine from the machine or the parts themselves About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
