Ahead of the Flaming Front Jerry D. Mathes, 2013 Nothing provided Fire in California's Ecosystems Neil G. Sugihara, 2006-11-29 Focusing on California and issues specific to fire ecology and management in the state's bioregions this work provides scientific information for use in land restoration and other management decisions made in the field It introduces the basics of fire ecology and includes an overview of fire vegetation and climate in California and more **Hell's Gate** Stephen Frey, 2009-08-18 It's fire season in Montana From New York Times bestselling author Stephen Frey comes a riveting new thriller about a disillusioned star litigator who goes west to forge a new life in Big Sky Country and stumbles onto the toughest case of his career When thirty five year old lawyer Hunter Lee decides to turn his back on the New York City rat race that has made him rich but cost him his marriage he takes his brother's advice and sets out to build a new life in the beautiful but isolated town of Fort Mason Montana However escape is hardly what he finds there Hunter befriends Paul Brule a Fire Jumper one of an elite corps of firefighters who parachute into remote wilderness areas to put out blazes before they become infernos and gets a terrifying firsthand look at the reality of vast tracts of forest being reduced to ash in seconds by hundred foot walls of flame In this tiny town where everyone seems to have a secret Hunter comes to suspect that this particular rash of summer fires is anything but accidental and could in fact be serving a more sinister purpose As Hunter follows his instincts Montana becomes a crucible where good and evil collide and where one man running from his past takes on the burden of exposing the guilty while saving himself and those he cares about most from the greatest danger they have ever faced *Fire Management Today*, 2005 *Building Services Engineering* David Vincent Chadderton, 2013 Engineering services within buildings account for ongoing energy use greenhouse gas contribution and life safety provisions This fully updated sixth edition of David Chadderton's leading textbook is the perfect preparation for those intending to enter this increasingly important field Chapters addressing heating climate change air conditioning transportation systems water gas electricity drainage and room acoustics cover all the key responsibilities of the building services engineer As well as introductory material and the underpinning theory practical guidance is provided in the form of sample calculations and spreadsheets New material includes trends and recent applications in lowering the energy use by mechanical and electrical services systems heating cooling and lighting of buildings case studies modelled from post occupancy reports to provide realistic discussion topics examples of the use of photovoltaic solar panels chilled beams under floor air distribution labyrinths ground sourced heat pumps district heating and cooling energy performance certificates energy auditing and wind turbines outlines of the concepts of global warming carbon trading and zero carbon buildings exercises in each chapter and online self study questions A significantly expanded companion site offers over 1 000 self test questions powerpoint slides for lecturers and an instructors manual enabling the rapid generation of lectures assignments and tests This is the ideal textbook for students of building services engineering as well as a comprehensive guide for those about to start work Design by

Fire Emily Schlickman, Brett Milligan, 2023-08-31 Across the world the risks of wildfires are increasing and expanding Due to past and current human actions we dwell in the age of fire the Pyrocene and the many challenges and climate adaptation questions it provokes Exploring our past and current relationships with fire this book speculates on the pyro futures yet to be designed and cared for Drawing upon fieldwork mapping drone imagery and interviews this publication curates 27 global design case studies within the vulnerable and dynamic wildland urban interface and its adjacent wildlands The book catalogs these examples into three approaches those that resist the creative and transformative power of fire and forces of landscape change those that embrace and utilize those forces and those that intentionally try to retreat and minimize human intervention in fire prone landscapes Rather than serving as a book of neatly packaged solutions it is a book of techniques to be considered tested and evaluated in a time of fire *Report of the Fourth Agricultural Aviation Research Conference Held at University of California, Davis* United States. Agricultural Research Service, 1962 **The Pyrocene** Stephen J.

Pyne, 2022-08-02 A provocative rethinking of how humans and fire have evolved together over time and our responsibility to reorient this relationship before it's too late The Pyrocene tells the story of what happened when a fire wielding species humanity met an especially fire receptive time in Earth's history Since terrestrial life first appeared flames have flourished Over the past two million years however one genus gained the ability to manipulate fire swiftly remaking both itself and eventually the world We developed small guts and big heads by cooking food we climbed the food chain by cooking landscapes and now we have become a geologic force by cooking the planet Some fire uses have been direct fire applied to convert living landscapes into hunting grounds forage fields farms and pastures Others have been indirect through pyrotechnologies that expanded humanity's reach beyond flame's grasp Still preindustrial and Indigenous societies largely operated within broad ecological constraints that determined how and when living landscapes could be burned These ancient relationships between humans and fire broke down when people began to burn fossil biomass lithic landscapes and humanity's firepower became unbounded Fire catalyzed climate change globalized the impacts into a new geologic epoch The Pleistocene yielded to the Pyrocene Around fires across millennia we have told stories that explained the world and negotiated our place within it The Pyrocene continues that tradition describing how we have remade the Earth and how we might recover our responsibilities as keepers of the planetary flame Graham's Lady's and Gentleman's Magazine, 1842
