Aids Sexual Behavior And Intravenous Drug Use:

AIDS, Sexual Behavior, and Intravenous Drug Use National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on AIDS Research and the Behavioral, Social, and Statistical Sciences, 1989-02-01 The AIDS virus is spread by human behaviors enacted in a variety of social situations In order to prevent further infection we need to know more about these behaviors This volume explores what is known about the number of people infected risk associated behaviors facilitation of behavioral change and barriers to more effective prevention efforts

Outreach/risk Reduction Strategies for Changing HIV-related Risk Behaviors Among Injection Drug Users, 1994 *HIV/AIDS and Sexuality* Michael W Ross, 2012-11-12 In this important book editor Michael Ross brings together the latest knowledge and research concerning the relationship between HIV and AIDS and sexual functioning *HIV/AIDS and Sexuality* explores the experiences of being HIV infected and the impact of infection on an individual's sexuality It describes differences that may be associated with individuals who are infected or concerned about infection and it provides new in depth analyses of the effect of HIV on sexuality and sexual risks The book provides clinical perspectives on sexual problems associated with HIV infection as well as some treatment approaches Contributing authors represent the United States Australia and Europe and discuss heterosexual men and women gay men lesbians and injecting drug users This diversity provides a more complete picture of the experiences of people with HIV in terms of explicit and implicit sexuality Chapters include cross sectional and cohort study designs as well as qualitative quantitative and clinical approaches Some of the topics explored are the centrality of sexuality to equality of life and identity and the impact of HIV on sexuality in gay identified men the psychological impact of making changes in sexual behavior on gay men with HIV infection risk behaviors in seropositive and seronegative women a study of a cohort of HIV infected women associated with the military sexual addiction in gay men and its association with HIV risks overt and subtle communications processes that occur between health care providers and clients about sexuality and HIV stages of change in safer sexual practices in a cohort of gay men personality variables associated with risk and infection in both homosexual and heterosexual men *HIV/AIDS and Sexuality* opens up the area of sexuality in people living with HIV and focuses much needed attention on the issues involved in sexual expression HIV transmission risk and living with HIV infection This book is an illuminating exploration into the subject that helps professionals better understand their clients and thus provide more compassionate and effective care

AIDS and Intravenous Drug Use Don Des Jarlais, 1988 *The Effectiveness of drug abuse treatment : implications for controlling AIDS HIV infection.*, 1990 **Behavioral Aspects of AIDS** David G. Ostrow, 2013-06-29 As we enter the last decade of the twentieth century the AIDS epidemic looms ever larger and threatening The specter of upwards of a million deaths in the United States and perhaps many millions worldwide from a sexually transmitted virus shakes our belief in modern medical science while challenging the foundations of democratic society Almost ten years into the epidemic and with

an enormous body of basic science research on the Human Immunodeficiency Virus HIV we still do not know why AIDS emerged when it did or how to stop its spread A very humbling experience for scientists clinicians public health experts politicians and the general public Yet there are signs that a well coordinated multidisciplinary research program can conquer the epidemic and perhaps provide the basis for preventing future epidemics The HIV family of viruses is now better understood both in terms of structure and function than any other virus Genetically engineered peptides and nucleic acids are being tested as specific treatments or vaccines against HIV infection disease Most promising are the strides which have been made in understanding those aspects of human behavior which have contributed to the spread of HIV infection and which must be substantially modified if AIDS is to be controlled and eventually eradicated The basis of that understanding has roots in a diverse set of disciplines which have converged in the work presented in this book **Public Health Reports**, 1991 **The NIDA HIV Counseling and Education Intervention Model** Susan L. Coyle, 1993 *AIDS*, 1989

Preventing HIV Transmission National Research Council and Institute of Medicine, Institute of Medicine, Panel on Needle Exchange and Bleach Distribution Programs, 1995-10-14 This volume addresses the interface of two major national problems the epidemic of HIV AIDS and the widespread use of illegal injection drugs Should communities have the option of giving drug users sterile needles or bleach for cleaning needs in order to reduce the spread of HIV Does needle distribution worsen the drug problem as opponents of such programs argue Do they reduce the spread of other serious diseases such as hepatitis Do they result in more used needles being carelessly discarded in the community The panel takes a critical look at the available data on needle exchange and bleach distribution programs reaches conclusions about their efficacy and offers concrete recommendations for public policy to reduce the spread of HIV AIDS The book includes current knowledge about the epidemiologies of HIV AIDS and injection drug use characteristics of needle exchange and bleach distribution programs and views on those programs from diverse community groups and a discussion of laws designed to control possession of needles their impact on needle sharing among injection drug users and their implications for needle exchange programs

AIDS National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on AIDS Research and the Behavioral, Social, and Statistical Sciences, 1990-02-01 Expanding on the 1989 National Research Council volume *AIDS Sexual Behavior and Intravenous Drug Use* this book reports on changing patterns in the distribution of cases and the results of intervention efforts under way It focuses on two important subpopulations that are becoming more and more at risk adolescents and women The committee also reviews strategies to protect blood supplies and to improve the quality of surveys used in AIDS research *AIDS The Second Decade* updates trends in AIDS cases and HIV infection among the homosexual community intravenous drug users women minorities and other groups presents an overview of a wide range of behavioral intervention strategies directed at specific groups discusses discrimination against people with AIDS and HIV infection and presents available data on the proportion of teenagers

engaging in the behaviors that can transmit the virus and on female prostitutes and HIV infection AIDS Elizabeth Fee, Daniel M. Fox, 1992 Finally several contributors provide a sampling of international perspectives on the impact of AIDS in other nations When AIDS was first recognized in 1981 most experts believed that it was a plague a virulent unexpected disease They thought AIDS as a plague would resemble the great epidemics of the past it would be devastating but would soon subside perhaps never to return The media as well as many policy makers accepted this historical analogy Much of the response to AIDS in the United States and abroad during the first five years of the epidemic assumed that it could be addressed by severe emergency measures that would reassure a frightened population while signaling social concern for the sufferers and those at risk of contracting the disease By the middle 1980s however it became increasingly clear that AIDS was a chronic infection not a classic plague **AIDS Bibliography** ,1994 Evaluating AIDS Prevention Programs National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on AIDS Research and the Behavioral, Social, and Statistical Sciences, Panel on the Evaluation of AIDS Interventions, 1991-02-01 With insightful discussion of program evaluation and the efforts of the Centers for Disease Control this book presents a set of clear cut recommendations to help ensure that the substantial resources devoted to the fight against AIDS will be used most effectively This expanded edition of Evaluating AIDS Prevention Programs covers evaluation strategies and outcome measurements including a realistic review of the factors that make evaluation of AIDS programs particularly difficult Randomized field experiments are examined focusing on the use of alternative treatments rather than placebo controls The book also reviews nonexperimental techniques including a critical examination of evaluation methods that are observational rather than experimental a necessity when randomized experiments are infeasible **Cumulated Index Medicus** ,1989 Biomedical Index to PHS-supported Research ,1988 Public Health Reports ,1998 **ADAMHA News on Alcohol, Drug Abuse, and Mental Health** ,1989 **Research Awards Index** ,1989 Drugs of Abuse ,1988
