Challenging Medical Neutrality Daniel Messelken, Ana Elisa Barbar, 2024-10-16 In this volume the concept of medical neutrality which states that medical services should not be interfered with during armed conflicts and other emergencies is challenged based on the experience and expertise of the authors who come from diverse military humanitarian and academic backgrounds The principle of medical neutrality is grounded in International Humanitarian Law as well as in Human Rights Law and it can be justified by ethical rationales such as the principle of Humanity and ordinary medical ethics Health workers often understand medical neutrality as an obligation not to engage in anything else other than medical outcomes In this book a variety of problems and ethical issues in the application of medical neutrality in the professional practice of healthcare personnel are analyzed The contributors expand the debate around medical neutrality and aim at better informing policy and operational decisions regarding the application of medical ethics the protection of medical missions in conflict and the training of healthcare professionals to operate ethically and safely in volatile environments The volume is of great interest to academics practitioners policymakers and students who are looking for analyses and guidance regarding medical neutrality

An Illusion of Equity Wendy Zagray Warren, 2023-08-01 Public education plays a crucial role in crafting a nation's future In the United States education reform policy particularly the reliance on large scale standardized testing is a growing topic of national conversation and concern An Illusion of Equity The Legacy of Eugenics in Today's Education demonstrates how centuries of propaganda have led us to accept the idea that test scores indicate something so valuable about human beings that they should be used to organize society Drawing on decades of experience as an educator author Wendy Zagray Warren unpacks the origins of this practice inviting us to probe the ideologies underlying testing procedures and score interpretation and to evaluate the rationale for using test scores as the sole markers for academic achievement From the beginning large scale tests have produced scores divided by race and class Initially these results aligned with the eugenic ideology of its creators Warren shows that while the rhetoric used to justify test based policy has changed the model used to

produce test scores remains much the same Therefore so do the outcomes of test based policies which continue to reproduce and reinforce the existing social hierarchy of the United States The hope of equity lies in educators charting new paths and scholars around the world who are dreaming new educational paradigms into being Ultimately Warren invites policymakers educators and parents to explore the richness of possibility when education is designed around the belief that every child is worthy of the opportunity to thrive Benchmark Experiments, Development and Needs in Support of Advanced Reactor Design Mark David DeHart, John Darrell Bess, Michael Fleming, Germina Ilas, 2023-08-01 *Military Review*, 2013
