Tree Of Codes By Jonathan Safran Foer:

Tree of Codes Jonathan Safran Foer, 2010 A masterful work of storytelling a unique sculptural object created through a collaborative process between Visual Editions and author A curiosity with the die cut technique was combined with the pages physical relationship to one another and how this could somehow be developed to work with a meaningful narrative This led to Jonathan deciding to use an existing piece of text and cut a new story out of it his favourite book The Street of Crocodiles by Bruno Schulz Writing cutting and proto typing has created a new story cut from the words of an old favourite Seven Modes of Uncertainty C. Namwali Serpell, 2014-04-30 Literature is uncertain Literature is good for us These two ideas are often taken for granted But what is the relationship between literature s capacity to perplex and its ethical value Seven Modes of Uncertainty contends that literary uncertainty is crucial to ethics because it pushes us beyond the limits of our experience **The 360° Gaze** Christian Stiegler, 2021-05-25 A comprehensive study of the pervasive role of immersion and immersive media in postmodern culture from a humanities and social sciences perspective Virtual reality augmented reality mixed reality and other modes of digitally induced immersion herald a major cultural and economic shift in society Most academic discussions of immersion and immersive media have focused on the technological aspects In The 360 Gaze Christian Stiegler takes a humanities and social science approach emphasizing the human implications of immersive media in postmodern culture Examining characteristics common to all immersive experiences he uncovers dominant metaphors such as the rabbit hole and prevailing ideologies He raises fundamental questions about opportunities and risks associated with immersion as well as the potential effects on individuals communities and societies **Handbook of the American Novel of the Twentieth and Twenty-First Centuries** Timo Müller, 2017-01-11 Increasing specialization within the discipline of English and American Studies has shifted the focus of scholarly discussion toward theoretical reflection and cultural contexts These developments have benefitted the discipline in more ways than one but they have also resulted in a certain neglect of close reading As a result students and researchers interested in such material are forced to turn to scholarship from the 1960s and 1970s much of which relies on dated methodological and ideological presuppositions The handbook aims to fill this gap by providing new readings of texts that figure prominently in the literature classroom and in scholarly debate from James s The Ambassadors to McCarthy s The Road These readings do not revert naively to a time before theory Instead they distil the insights of literary and cultural theory into concise introductions to the historical background the themes the formal strategies and the reception of influential literary texts and they do so in a jargon free language accessible to readers on all levels of qualification **The Near-Death of the Author** John Potts, 2022-11-01 In the modern world of networked digital media authors must navigate many challenges Most pressingly the illegal downloading and streaming of copyright material on the internet deprives authors of royalties and in some cases it has discouraged creativity or terminated careers Exploring technology s impact on the status and idea of authorship in today s world The Near Death of the Author reveals the many

obstacles facing contemporary authors John Potts details how the online culture of remix and creative reuse operates in a post authorship mode with little regard for individual authorship The book explores how developments in algorithms and artificial intelligence AI have yielded novels newspaper articles musical works films and paintings without the need of human authors or artists It also examines how these AI achievements have provoked questions regarding the authorship of new works such as Does the author need to be human And more alarmingly Is there even a need for human authors Providing suggestions on how contemporary authors can endure in the world of data the book ultimately concludes that network culture has provoked the near death but not the death of the author *The Cambridge Companion to Literature in a Digital Age* Adam Hammond,2024-11-14 Literature has experienced two great medium shifts each with profound implications for its forms genres and cultures that from orality to writing and that from writing to printing Today we are experiencing a third shift from printed to digital forms As with the previous shifts this transformation is reconfiguring literature and literary culture The Cambridge Companion to Literature in the Digital Age is organized around the question of what is at stake for literary studies in this latest transition Rather than dividing its chapters by methodology or approach this volume proceeds by exploring the major categories of literary investigation that are coming under pressure in the digital age concepts such as the canon periodization authorship and narrative With chapters written by leading experts in all facets of literary studies this book shows why all those who read study and teach literature today ought to attend to the digital *A Theory of Adaptation* Linda Hutcheon,2012-08-21 A Theory of Adaptation explores the continuous development of creative adaptation and argues that the practice of adapting is central to the story telling imagination Linda Hutcheon develops a theory of adaptation through a range of media from film and opera to video games pop music and theme parks analysing the breadth scope and creative possibilities within each This new edition is supplemented by a new preface from the author discussing both new adaptive forms platforms and recent critical developments in the study of adaptation It also features an illuminating new epilogue from Siobhan O Flynn focusing on adaptation in the context of digital media She considers the impact of transmedia practices and properties on the form and practice of adaptation as well as studying the extension of game narrative across media platforms fan based adaptation from Twitter and Facebook to home movies and the adaptation of books to digital formats A Theory of Adaptation is the ideal guide to this ever evolving field of study and is essential reading for anyone interested in adaptation in the context of literary and media studies *The Routledge Companion to Experimental Literature* Joe Bray,Alison Gibbons,Brian McHale,2012-07-26 What is experimental literature How has experimentation affected the course of literary history and how is it shaping literary expression today Literary experiment has always been diverse and challenging but never more so than in our age of digital media and social networking when the very category of the literary is coming under intense pressure How will literature reconfigure itself in the future The Routledge Companion to Experimental Literature maps this expansive and multifaceted field with essays on the history of literary experiment from the

beginning of the twentieth century to the present the impact of new media on literature including multimodal literature digital fiction and code poetry the development of experimental genres from graphic narratives and found poetry through to gaming and interactive fiction experimental movements from Futurism and Surrealism to Postmodernism Avant Pop and Flarf Shedding new light on often critically neglected terrain the contributors introduce this vibrant area define its current state and offer exciting new perspectives on its future This volume is the ideal introduction for those approaching the study of experimental literature for the first time or looking to further their knowledge Succeeding Postmodernism Mary K. Holland, 2013-04-25 While critics collect around the question of what comes after postmodernism this book asks something different about recent American fiction what if we are seeing not the end of postmodernism but its belated success Succeeding Postmodernism examines how novels by DeLillo Wallace Danielewski Foer and others conceptualize threats to individuals and communities posed by a poststructural culture of mediation and simulation and possible ways of resisting the disaffected solipsism bred by that culture Ultimately it finds that twenty first century American fiction sets aside the postmodern problem of how language does or does not mean in order to raise the reassuringly retro question of what it can and does mean it finds that novels today offer language as solution to the problem of language Thus it suggests a new way of reading antihumanist late postmodern fiction and a framework for understanding postmodern and twenty first century fiction as participating in a long and newly enlivened tradition of humanism and realism in literature 9/11: Culture, Catastrophe and the Critique of Singularity Diana Gonçalves, 2016-10-24 Even though much has been said and written about 9 11 the work developed on this subject has mostly explored it as an unparalleled event a turning point in history This book wishes to look instead at how disruptive events promote a network of associations and how people resort to comparison as a means to make sense of the unknown i e to comprehend what seems incomprehensible In order to effectively discuss the complexity of 9 11 this book articulates different fields of knowledge and perspectives such as visual culture media studies performance studies critical theory memory studies and literary studies to shed some light on 9 11 and analyze how the event has impacted on American social and cultural fabric and how the American society has come to terms with such a devastating event A more in depth study of Don DeLillo's *Falling Man* and Jonathan Safran Foer's *Extremely Loud and Incredibly Close* draws attention to the cultural construction of catastrophe and the plethora of cultural products 9 11 has inspired It demonstrates how the event has been integrated into American culture and exemplifies what makes up the 9 11 imaginary
