Good Cascade Impactor Practices, AIM and EDA for Orally Inhaled Products Terrence P. Tougas, Jolyon P. Mitchell, Svetlana A. Lyapustina, 2013-04-10 The purpose of this publication is to introduce a new simpler and more effective way in which to interpret pharmaceutical aerosol particle size data from orally inhaled products OIPs Currently the compendial and regulatory requirements dictate the need for measurements by full resolution multi stage cascade impactor CI a process that is demanding for the operator time consuming prone to experimental error and challenging for method transfers from one laboratory to another Furthermore we shall show that the current practice of reducing information from mass weighted aerodynamic particle size distribution APSD measurements through the use of CI stage groupings is not the most effective decision making tool for OIP quality control QC in comparison with newly introduced mutually independent efficient data analysis EDA metrics that can be derived either from full resolution or abbreviated impactor measurements AIM

Statistical Design and Analysis of Experiments Robert L. Mason, Richard F. Gunst, James L. Hess, 2003-04-25 Emphasizes the strategy of experimentation data analysis and the interpretation of experimental results Features numerous examples using actual engineering and scientific studies Presents statistics as an integral component of experimentation from the planning stage to the presentation of the conclusions Deep and concentrated experimental design coverage with equivalent but separate emphasis on the analysis of data from the various designs Topics can be implemented by practitioners and do not require a high level of training in statistics New edition includes new and updated material and computer output
