Aviation Systems Andreas Wittmer, Thomas Bieger, Roland Müller, 2021-10-13 This book provides an overview of the aviation sector by focusing on all major aspects embedded in the environment subsystems and the market of aviation The book explains the linkages between subsystems politics society technology economy environment and regulation and how these subsystems influence each other and the market The book starts by describing the aviation system then focuses on the supply side and the demand side of the system and in a final part focuses on steering and controlling the system of aviation from a managerial economic and regulatory perspective Examples and case studies of airports airlines and the production industry in each chapter support the application oriented approach The summary and review questions help the reader to understand the focus and main messages of each chapter Students and researchers in business administration with a focus on aviation as well as professionals in the industry looking to refresh or broaden their knowledge in the field will benefit from this book

Absent Aviators Donna Bridges, Jane Neal-Smith, Albert Mills, 2016-03-16 The objective of this book is to present a number of related chapters on the subject of gender issues in the workplace of the aviation industry More specifically the chapters address the

continuing shortfall in the number of women pilots in both civilian and military aviation Considerable research has been carried out on gender issues in the workplace and for example women represent about 10% of employees in engineering This example is often used to show that the consequences of gender discrimination are embedded and difficult to overcome in masculine dominated occupations However women represent only 5 6% of the profession of pilot Clearly there are many factors which mitigate women seeking to become pilots The chapters within this volume raise both theoretical and practical issues endeavouring to address the imbalance of women pilots in this occupation Absent Aviators consolidates a diverse range of issues from a number of authors from Australia Austria the United States Canada South Africa and the United Kingdom Each of the chapters is research based and aims to present a broad picture of gender issues in aviation gendered workplaces and sociology underpinned by sound theoretical perspectives and methodologies One chapter additionally raises issues on the historical exclusion of race from an airline The book will prove to be a valuable contribution to the debates on women in masculine oriented occupations and a practical guide for the aviation industry to help overcome the looming shortfall of pilots It is also hoped it will directly encourage young women to identify and overcome the barriers to becoming a civilian or military pilot
