to education Identification and de termination of the relevance of Piagetian theory to education is of course not new The bibliographies in this volume do attest to that assertion Then why the persistent interest and why still another volume Rather than deal with the relevance of each article to these issues let us deal with the basic question of why such continued interest in application of Piagetian theory to education and further raise the problem of the feasibility of such a task Three questions come immediately to mind Why the interest in applicability What are some of the problems that arise in application Is Piagetian theory applicable to education Why the continued interest in application of Piagetian theory in education The answer to this question resides in the sociological and educational issues that arose twenty years ago and still persist in American education namely the need to upgrade the quality of education by providing a coherent conceptual system with a developmental emphasis People gravitated to Piaget because it was the only major system sufficiently comprehensive as well as substantive While learning theories abound they do not tie together general cognitive development with specific relevant content areas e g development of such knowledge domains as number time space geometry etc Thus Piaget offers a development framework within which content areas are embedded
