Images of the Byzantine World Angeliki Lymberopoulou, 2016-12-05 The main themes of this volume are the identification of visions messages and meanings in various facets of Byzantine culture and the possible differences in the perception of these visions messages and meanings as seen by their original audience and by modern scholars The volume addresses the methodological question of how far interpretations should go whether there is a tendency to read too much into too little or whether not enough attention is paid to apparent minutiae that may have been important in their historical context As the essays span a wide chronological era they also present a means of assessing the relative degrees of continuity and change in Byzantine visions messages and meanings over time Thus as highlighted in the concluding section the book discusses the validity of existing notions regarding the fluidity of Byzantine culture when continuity was a matter of a rigid adherence to traditional values and when a manifestation of the ability to adapt old conventions to new circumstances and it shows that in some respects Byzantine cultural history may have been less fragmented than is usually assumed Similarly by reflecting not just on new interpretations but also on the process of interpreting itself the contributors demonstrate how research within Byzantine studies has evolved over the past thirty years from a set of narrowly defined individual disciplines into a broader exploration of interconnected cultural phenomena

Chemical/Instrumental Approaches to the Evaluation of Wine Chemistry Rosa Perestrelo, José S.

Câmara, 2020-05-27 Wine is a widely consumed beverage due to its unique and pleasant sensory properties Wine is composed of more than one thousand chemical compounds e.g. alcohols esters acids terpenoids phenolic compounds flavonoids anthocyanins minerals and vitamins among others resulting from several chemical and biochemical processes

Microextraction techniques in tandem with high resolution analytical instruments have been applied by wine researchers to expand the knowledge of wine's chemical composition with the purposes of improving wine quality supporting winemaker decisions related to the winemaking process and guaranteeing the authenticity of wine As a result we proposed Chemical Instrumental Approaches to the Evaluation of Wine Chemistry as a topic for a Special Issue in Molecules This Special Issue aims to provide an update on state of the art extraction procedures e.g. solid phase microextraction SPME and analytical tools e.g. nuclear magnetic resonance NMR inductively coupled plasma mass spectrometry ICP MS ultra performance liquid chromatography tandem mass spectrometry UPLC MS MS emphasizing their use as suitable platforms for the establishment of the chemical composition of wine volatile profile antioxidants phenolic pattern and elemental composition among others Information related to wine sensorial properties contaminants authenticity and chemometric tools used for data treatment are described in this Issue

Freud, Manfred Oeming, Yuval Gadot, 2021-04-13 This is part of a three-volume final report of the renewed excavations at Ramat Ra el by the Tel Aviv Heidelberg Expedition 2005-2010. It presents the finds from the Babylonian/Persian pit, one of the most dramatic find spots at Ramat Ra el. The pit yielded a rich assemblage of pottery vessels and yhw'd lion and sixth-century private stamp impressions, including for the first time complete restored stamped jars bearing two handles stamped with different yhw'd impressions and jars bearing both lion and private stamp impressions on their bodies. Residue analysis was conducted on many of the vessels excavated from the pit to analyze their contents, yielding surprising results. The finds contribute to our understanding of the pottery of the Babylonian and early Persian periods (6th-5th centuries BCE) and to the study of the development of the stamped jar administration in the province of Yehud under Babylonian and Persian rule.
