Minorities in Science Vijaya L. Melnick,2013-04-17 Change is the essence of progress We now stand at the crossroads of our civilization where change is essential in the conduct of our institutions in the plans and models we project for the future and in the very patterns of our thinking if we are to survive as one nation under God with liberty and justice for all Opportunity to participate and fulfill the responsibility of building the nation must be available to all citizens in a true republic For the viability of governmental institutions in a modern democratic nation state rests on the diversity of the genius of her citizens and this enables the nation to accommodate herself better to changes of the times But if the nation becomes impervious to change and resistant to modify its institutions to keep in pace with the times then the nation will indeed be doomed to wither and perish History is replete with examples of civilizations that have gone that course It is therefore our responsibility to insure that our government institutions are kept receptive to change and reflective of the needs and concerns of her citizenry In America today economic and social powers generally go to those who can claim a superior education and professional experience As our society and indeed the world becomes
