High-Performance Subaru Builder's Guide Jeffrey Zurschmeide, 2007 Now more than ever Subaru fanatics have a wealth of factory and aftermarket performance upgrades at their disposal In High Performance Subaru Builder's Guide author Jeff Zurschmeide explains in detail the similarities and differences between the Subaru models and describes how to modify each for performance on the street and at the track He uses over 300 color photos to show you how to modify your Impreza Legacy WRX or STI for improved acceleration handling braking and style The book provides detailed chapters explaining how to modify the intake exhaust turbocharger and computer systems for more horsepower and torque plus info on upgrading your drivetrain to handle all that power If taking corners is your thing you'll find chapters on the suspension steering chassis brakes and wheels and tires A special chapter even shows you how to get started in your favorite type of racing including examples of successful racers and their cars *Lemon-Aid Used Cars and Trucks 2012-2013* Phil Edmonston, 2012-05-19 A guide to buying a used car or minivan features information on the strengths and weaknesses of each model a safety summary recalls warranties and service tips *Autocar*, 2006 Subject Guide to Books in Print, 1971 Rise and Fall of the Carbon Civilisation Patrick Moriarty, Damon Honnery, 2010-10-27 A vast amount has been written on climate change and what should be our response Rise and Fall of the Carbon Civilisation suggests that most of this literature takes a far too optimistic position regarding the potential for conventional mitigation solutions to achieve the deep cuts in greenhouse gases necessary in the limited time frame we have available In addition global environmental problems as exemplified by climate change and global resource problems such as fossil fuel depletion or fresh water scarcity have largely been seen as separate issues Further proposals for solution of these problems often focus at the national level when the problems are global The authors argue that the various challenges the planet faces are both serious and interconnected Rise and Fall of the Carbon Civilisation takes a global perspective in its treatment of various solutions renewable energy nuclear energy energy efficiency carbon sequestration and geo engineering It also addresses the possibility that realistic solutions cannot be achieved until the fundamentally ethical question of global equity both across nations today and also inter generational is fully addressed Such an approach will also involve reorienting the global economy away from an emphasis on growth and toward the direct satisfaction of basic human needs for all the Earth's people Rise and Fall of the Carbon Civilisation is aimed at the many members of the public with an awareness of climate change but who wish to find out more about how we need to respond to the challenge It will also be of interest to technical professionals as well as postgraduate students and researchers from the environmental and engineering science sectors Mathematical Methods for Accident Reconstruction Harold Franck, Darren Franck, 2025-09-17 This book demonstrates the application of mathematics to modeling accident reconstructions involving a range of moving vehicles including automobiles small and large trucks bicycles motorcycles all terrain vehicles and construction equipment such as hoists and cranes The book is anchored on the basic principles of

physics that may be applied to any of the above named vehicles or equipment Topics covered include the foundations of measurement the various energy methods used in reconstruction momentum methods vehicle specifications failure analysis geometrical characteristics of highways and softer scientific issues such as visibility perception and reaction The authors examine the fundamental characteristics of different vehicles discuss the retrieval of data from crash data recorders and review low speed impacts with an analysis of staged collisions Finally it details established standards and protocols for accident reconstruction for use in both investigations and in the courtroom In addition this new edition covers nonvehicle related topics like slip and fall analysis fall protection and engine and mechanical failure as well as federal rules and laws that have been established for the work environment Many reconstructions of incidents require extensive analysis that may require a variety of methods in order to properly model the incident Exploring a broad range of accident scenarios the breadth and depth of this book s coverage makes Mathematical Methods for Accident Reconstruction Second Edition a critical reference for engineers and scientists who perform vehicular accident reconstructions
