**Post-fire Treatment Effectiveness for Hillslope Stabilization** Peter R. Robichaud, 1998 This synthesis of post fire treatment effectiveness reviews the past decade of research monitoring and product development related to post fire hillslope emergency stabilization treatments including erosion barriers mulching chemical soil treatments and combinations of these treatments In the past ten years erosion barrier treatments contour felled logs and straw wattles have declined in use and are now rarely applied as a post fire hillslope treatment In contrast dry mulch treatments agricultural straw wood strands wood shreds etc have quickly gained acceptance as effective though somewhat expensive post fire hillslope stabilization treatments and are frequently recommended when values at risk warrant protection This change has been motivated by research that shows the proportion of exposed mineral soil or conversely the proportion of ground cover to be the primary treatment factor controlling post fire hillslope erosion Erosion barrier treatments provide little ground cover and have been shown to be less effective than mulch especially during short duration high intensity rainfall events In addition innovative options for producing and applying mulch materials have adapted these materials for use on large burned areas that are inaccessible by road Although longer term studies on mulch treatment effectiveness are on going early results and short term studies have shown that dry mulches can be highly effective in reducing post fire runoff and erosion Hydromulches have been used after some fires but they have been less effective than dry mulches in stabilizing burned hillslopes and generally decompose or degrade within a year

Rotator Cuff Across the Life Span Andreas B. Imhoff, Felix

H. Savoie III, 2019-04-27 This book presents the consensus findings of the ISAKOS Shoulder Committee regarding the treatment options in patients suffering from shoulder pain and reduced function or dead arm syndrome as a consequence of rotator cuff injuries. The aim is twofold: to equip readers with a precise knowledge of the presenting characteristics of these injuries in different age groups and to describe in detail the initial management and surgical and non-surgical approaches taking into account the age-specific features. Readers will find clear descriptions of all the latest arthroscopic techniques which allow repair of even the largest tears. The indications for and performance of tendon transfer procedures, biceps tenotomy, tenodesis, hemiarthroplasty, anatomic shoulder arthroplasty, reverse total shoulder arthroplasty, and revision surgery are explained. Helpful guidance is also provided on the use of strategies to promote rotator cuff healing including stem cell therapy and scaffolds. The authors are leading experts in the field and the book will be of value for all shoulder surgeons and orthopaedic trainees and consultants as well as sports medicine specialists. **PostFire Treatment Effectiveness for**

**Hillslope Stabilization**, *The United States Government Manual, 2005-2006*, 2005-09 The latest edition of this authoritative official publication provides information on the agencies of the executive, judicial, and legislative branches of the Federal government. Also includes details about boards, commissions, committees, and quasi-official agencies and organizations in which the United States participates. Each agency entry contains a summary of the agency's purpose and general role, a description of its programs and activities, names and titles of major officials, and a list of sources of information. Many entries also provide organization charts. Also contains a section on terminated or transferred agencies.

**Traumatic Scar Tissue Management** Nancy Keeney Smith, Catherine Ryan, 2016-03-01 The management of scar tissue is a huge and growing problem for massage and other manual therapists. Research has shown that appropriate massage treatment can have significant results both physically and psychologically. Existing books have chapters on the problem but there is no practical manual available on the subject at the present time which tells the therapist what to do and what not to do. This book fills that gap, explaining the physiologic and pathophysiologic background and providing practical guidance about how to help patients. **Catalog of Copyright Entries.
