slimy bar and single seat. That same year, the short-stroke 750 cc motor bowed out of the range, but it went with a bang not a whimper not in a final batch of Tridents but in a limited-edition run of 750 Speed Triples. The bigger Speed Triple's motor was inserted in the Sprint and the result called the Sprint Sport. The reason for using up all those motors was the advent of the new range of fuel-injected and heavily revised three-cylinder engines that first powered the T500 Speed Triple and T595 Daytona of 1997.

The first fuel-injected Triumph, the Daytona T595, was a major milestone for the Factory. It

represented a change of policy, the first time Triumph would venture to confront their opposition on the cutting edge of technology. In early 1997, the Honda Fireblade and Ducati 916 ruled. The T595 was able to play in the same ball park. Only on a race track could the Japanese and Italian machines be shown to be better. In the real world the T595 was at least as good a bike. The old long stroke of 85 mm was retained but everything else was new. It was a radical departure from the modular concept that had dominated production until now. You could see how the new motor was a lightened version of the

Speedmaster

old triple, but fuel injection was new and the frame was a radical departure from previous practice. Serpentine tubing ran from steering head to swingarm pivot and it was aluminium. Bodywork looked tasty too. Despite what Triumph had said about not taking on the Japanese back in 1991, the T595 came out of comparative tests with the 'Blade and 916 on equal terms. The new bike was also given the Speed Triple treatment and adorned with bug-eyed twin headlights in the fashionable 'streetfighter' style. You liked it or loathed it, but you couldn't ignore it.

The trouble with the Supersports end of the market is that the goal posts keep moving, so Triumph hedged their bets by softening the 955's nominal 125 PS to 108, housing it in a simpler twin-beam frame and calling the result the Sprint ST. This continuation of the original Sprint concept was one of the hits of 1999. As a sports tourer, the fuel-injected Sprint ST was right up there with Honda's class leader, the VFR. Some magazines even preferred the British bike. High praise. The Tiger got the fuel-injected 855 cc motor in '99. Not that development of the carburetted bikes was neglected. Triumph got a Thunderbird derivative right in 1998 with the Thunderbird Sport. The Legend TT is the same bike with a different exhaust system and graphics.

Up to 1999 Triumph concentrated on big bikes but then they took another giant step towards the big time by taking on the Japanese in the most competitive market sector of them all, Supersports 600, with the TT600. For 2001 the most famous name of all was bought out of retirement: Bonneville. The new Bonneville shared the name, engine configuration and style of its predecessors, the T120 and T140, but that was where the similarity ended. It used a 360° carburetted air-cooled twin engine in a utterly non-traditional capacity of 790 cc. The nostalgic picture was
