Astronomy Calendar Multilingual Edition:

Multilingualism from Manuscript to 3D Matylda Włodarczyk, Jukka Tyrkkö, Elżbieta Adamczyk, 2023-01-24 This collection explores the links between multimodality and multilingualism charting the interplay between languages channels and forms of communication in multilingual written texts from historical manuscripts through to the new media of today and the non verbal associations they evoke The volume argues that features of written texts such as graphics layout boundary marking and typography are inseparable from verbal content Taken together the chapters adopt a systematic historical perspective to investigate this interplay over time and highlight the ways in which the two disciplines might further inform one another in the future as new technologies emerge The first half of the volume considers texts where semiotic resources are the sites of modes where multiple linguistic codes interact on the page and generate extralinguistic associations through visual features and spatial organisation The second half of the book looks at texts where this interface occurs not in the text but rather in the cultural practices involved in social materiality and text transmission Enhancing our understandings of multimodal resources in both historical and contemporary communication this book will be of interest to scholars in multimodality multilingualism historical communication discourse analysis and cultural studies Chapters 1 4 and 5 of this book are available for free in PDF format as Open Access from the individual product page at www.routledge.com Chapters 1 4 have been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license with Chapter 5 being made available under a Creative Commons Attribution 4.0 license [Medieval Latin Christian Texts on the Jewish Calendar](#) C. Multilingual Practices in Language History Päivi Pahta, Janne Skaffari, Laura Wright, 2017-12-18 Texts of the past were often not monolingual but were produced by and for people with bi or multilingual repertoires the communicative practices witnessed in them therefore reflect ongoing and earlier language contact situations However textbooks and earlier research tend to display a monolingual bias This collected volume on multilingual practices in historical materials including code switching highlights the importance of a multilingual approach The authors explore multilingualism in hitherto neglected genres periods and areas introduce new methods of locating and analysing multiple languages in various sources and review terminology theories and tools The studies also revisit some of the issues already introduced in previous research such as Latin interacting with European vernaculars and the complex relationship between code switching and lexical borrowing Collectively the contributors show that multilingual practices share many of the same features regardless of time and place and that one way or the other all historical texts are multilingual This book takes the next step in historical multilingualism studies by establishing the relevance of the multilingual approach to understanding language history *Central Eurasian Reader* Stéphane A. Dudoignon, 2021-10-11 No detailed description available for *Central Eurasian Reader* **Scientific and Technical Aerospace Reports**, 1986 *And Yet It Is Heard* Tito M. Tonietti, 2014-05-16 We bring into full light some excerpts on musical subjects which were until now scattered throughout the most famous scientific texts The main scientific and musical cultures outside of Europe are also taken into consideration The first and most important property to underline

in the scientific texts examined here is the language they are written in This means that our multicultural history of the sciences necessarily also becomes a review of the various dominant languages used in the different historical contexts In this volume the history of the development of the sciences is told as it happened in real contexts not in an alienated ideal world
