Such practice is necessary to understand calculus, the study of measuring infinitesimal change. According to 1980s psychologist Howard Gardner, learners assimilate information using a variety of senses and abilities: musical, rhythmic, visual, spatial, verbal, linguistic, logical, mathematical, bodily, kinesthetic, interpersonal, intra-personal and naturalistic, by name. For visual learners, a flow chart mapping the proper math to apply to a problem would help them solve it.      **Precalculus Mathematics** Harley Flanders and Justin J.
