Epley,1996 Teaching Recent Global History Diana B. Turk,Laura J. Dull,Robert Cohen,Michael R. Stoll,2014-03-05 Teaching Recent Global History explores innovative ways to teach world history beginning with the early 20th century The authors unique approach unites historians social studies teachers and educational curriculum specialists to offer historically rich pedagogically innovative and academically rigorous lessons that help students connect with and deeply understand key events and trends in recent global history Highlighting the best scholarship for each major continent the text explores the ways that this scholarship can be adapted by teachers in the classroom in order to engage and inspire students Each of the eight main chapters highlights a particularly important event or theme which is then complemented by a detailed discussion of a particular methodological approach Key features include An overarching narrative that helps readers address historical arguments Relevant primary documents or artifacts plus a discussion of a particular historical method well suited to teaching about them Lesson plans suitable for both middle and secondary level classrooms Document based questions and short bibliographies for further research on the topic This invaluable book is ideal for any aspiring or current teacher who wants to think critically about how to teach world history and make historical discussions come alive for students **Cold War Flashpoints** Cold War International History Project,1998 Featuring new evidence on the Polish Crisis 1980 1981 Poland in the early Cold War the Sino American opening the Korean War the Berlin Crisis 1958 1962 Teaching World History Using the Internet Carol Krup,2000 Reproducible activities for the classroom With teachers guide **The History of Information Security** Karl Maria Michael de Leeuw,Jan Bergstra,2007-08-28 Information Security is usually achieved through a mix of technical organizational and legal measures These may include the application of cryptography the hierarchical modeling of organizations in order to assure confidentiality or the distribution of accountability and responsibility by law among interested parties The history of Information Security reaches back to ancient times and starts with the emergence of bureaucracy in administration and warfare Some aspects such as the interception of encrypted messages during World War II have attracted huge attention whereas other aspects have remained largely uncovered There has never been any effort to write a comprehensive history This is most unfortunate because Information Security should be perceived as a set of communicating vessels where technical innovations can make existing legal or organisational frame works obsolete and a breakdown of political authority may cause an exclusive reliance on technical means This book is intended as a first field survey It consists of twenty eight contributions written by experts in such diverse fields as computer

science law or history and political science dealing with episodes organisations and technical developments that may be considered to be exemplary or have played a key role in the development of this field These include the emergence of cryptology as a discipline during the Renaissance the Black Chambers in 18th century Europe the breaking of German military codes during World War II the histories of the NSA and its Soviet counterparts and contemporary cryptology Other subjects are computer security standards viruses and worms on the Internet computer transparency and free software computer crime export regulations for encryption software and the privacy debate Interdisciplinary coverage of the history Information Security Written by top experts in law history computer and information science First comprehensive work in Information Security **Resources in Education** ,2000-10 **The Internet for Surgeons** Jeff W. Allen,2012-12-06

Advances in surgery have reached an exponential scale and the changes of the last decade of the twentieth century have become common practice Imagination and foresight are the more visible standards for professional appointments than ever before The fiber optic cable computer and Internet are the workhorses of this sea change and surgeons must master all of them to remain intellectually and technically up to date There can be no better explanation for the genuine need for this book The transmission of knowledge and technical skills from one generation to another has been a common practice in surgery for nearly 200 years Past experiences of surgeons have focused upon an understanding of disease states a prompt diagnosis of a correctable illness and its appropriate evaluation and most importantly the technical conduct of an operation where indicated to provide relief to and or cure of the patient Fascinatingly this little book tends to fulfill that same role with respect to the newly emerged technology of the Internet computation and telemedicine In essence this book seeks and to a remarkable degree achieves the transmission of both knowledge and technical skill in an easily usable and clearly written format Jeff W Allen has provided an educational orientation with which he is familiar both as a recent pupil and now as a teacher of surgical procedures This is not unlike the kind of education that has gone on between trainee surgeons and master surgeons around the world In this case Dr *Clio Wired* Roy Rosenzweig,2011 In these essays Rosenzweig pioneering historian and self proclaimed technorealist weighs the effect of new media digital technology and the Internet on recording researching and teaching history English for academic purposes : learning english through the web Barahona Fuentes, Claudia; Arnó Macià, Elisabet;,2001 This is a virtual elective course for university students who need to use English in their academic work This means that this subject is not related to a particular degree course engineering biology law etc but it aims to help students develop their language learning skills and at the same time to foster extensive practice in language use with the Internet as the basic learning tool Therefore this is an instrumental course which is essentially practical and emphasizes communication rather than language study It differs from a traditional language course in that it has been designed basically as a tool to help students learn to learn English That is to say the syllabus is not based on specific language content graded in terms of difficulty but it is composed of a series of practical activities to encourage

students to learn English effectively and independently by choosing materials suited to their level of English and to their learning style For this reason this course can be taken by students with different levels of English as long as they are familiar with the basic structures of the language and can more or less communicate in English Beyond the Trans-Siberian L.

Saull,2007-04-11 This new study shows how the American led war on terror has brought about the most significant shift in the contours of the international system since the end of the Cold War A new imperial moment is now discernible in US foreign policy in the wake of the neo conservative rise to power in the USA marked by the development of a fresh strategic doctrine based on the legitimacy of preventative military strikes on hostile forces across any part of the globe Key features of this new volume include an alternative critical take on contemporary US foreign policy a timely accessible overview of critical thinking on US foreign policy imperialism and war on terror the full spectrum of critical view sin a single volume many of these essays are now contemporary classics The essays collected in this volume analyse the historical socio economic and

political dimensions of the current international conjuncture and assess the degree to which the war on terror has transformed the nature and projection of US global power Drawing on a range of critical social theories this collection seeks to ground historically the analysis of global developments since the inception of the new Bush Presidency and weigh up the political consequences of this imperial turn This book will be of great interest for all students of US foreign policy contemporary international affairs international relations and politics *Bulletin* ,1998 *Virtuosi Abroad* Kiril Tomoff,2015-08-12 In the 1940s and 1950s Soviet musicians and ensembles were acclaimed across the globe They toured the world wowing critics and audiences projecting an image of the USSR as a sophisticated promoter of cultural and artistic excellence In *Virtuosi Abroad* Kiril Tomoff focuses on music and the Soviet Union's star musicians to explore the dynamics of the cultural Cold War He views the competition in the cultural sphere as part of the ongoing U S and Soviet efforts to integrate the rest of the world into their respective imperial projects Tomoff argues that the spectacular Soviet successes in the system of international music competitions taken together with the rapturous receptions accorded touring musicians helped to persuade the Soviet leadership of the superiority of their system This combined with the historical triumphalism central to the Marxist Leninist worldview led to confidence that the USSR would be the inevitable winner in the global competition with the United States Successes masked the fact that the very conditions that made them possible depended on a quiet process by which the USSR began to participate in an international legal and economic system dominated by the United States Once the Soviet leadership transposed its talk of system superiority to the economic sphere focusing in particular on consumer goods and popular culture it had entered a competition that it could not win **The Aesthetic Cold War** Peter J. Kalliney,2024-12-10 How decolonization and the cold war influenced literature from Africa Asia and the Caribbean How did superpower competition and the cold war affect writers in the decolonizing world In *The Aesthetic Cold War* Peter Kalliney explores the various ways that rival states used cultural diplomacy and the political police to influence writers In response many writers from Africa Asia and the Caribbean such as Chinua Achebe Mulk Raj Anand Eileen Chang C L R James Alex La Guma Doris Lessing Ng g wa Thiong o and Wole Soyinka carved out a vibrant conceptual space of aesthetic nonalignment imagining a different and freer future for their work Kalliney looks at how the United States and the Soviet Union in an effort to court writers funded international conferences arts centers book and magazine publishing literary prizes and radio programming International spy networks however subjected these same writers to surveillance and intimidation by tracking their movements tapping their phones reading their mail and censoring or banning their work Writers from the global south also suffered travel restrictions deportations imprisonment and even death at the hands of government agents Although conventional wisdom suggests that cold war pressures stunted the development of postcolonial literature Kalliney's extensive archival research shows that evenly balanced superpower competition allowed savvy writers to accept patronage without pledging loyalty to specific political blocs Likewise writers exploited rivalries and the emerging

discourse of human rights to contest the attentions of the political police A revisionist account of superpower involvement in literature The Aesthetic Cold War considers how politics shaped literary production in the twentieth century **The Oxford Handbook of the Cold War** Richard H. Immerman, Petra Goedde, 2013-01-31 The Oxford Handbook of the Cold War offers a broad reassessment of the period war based on new conceptual frameworks developed in the field of international history Nearing the 25th anniversary of its end the cold war now emerges as a distinct period in twentieth century history yet one which should be evaluated within the broader context of global political economic social and cultural developments The editors have brought together leading scholars in cold war history to offer a new assessment of the state of the field and identify fundamental questions for future research The individual chapters in this volume evaluate both the extent and the limits of the cold war s reach in world history They call into question orthodox ways of ordering the chronology of the cold war and also present new insights into the global dimension of the conflict Even though each essay offers a unique perspective together they show the interconnectedness between cold war and national and transnational developments including long standing conflicts that preceded the cold war and persisted after its end or global transformations in areas such as human rights or economic and cultural globalization Because of its broad mandate the volume is structured not along conventional chronological lines but thematically offering essays on conceptual frameworks regional perspectives cold war instruments and cold war challenges The result is a rich and diverse accounting of the ways in which the cold war should be positioned within the broader context of world history **The Root of Wild Madder** Brian Murphy, 2006-08-01 Told in exquisite prose befitting one of the world s loveliest art forms Brian Murphy eloquently chronicles how carpets embody humanity s endless striving for unattainable perfection Every Persian carpet has a story to tell from the remote villages of Afghanistan and Iran down the ancient trade routes traveled for centuries to the bazaars of Tehran and the markets of the Western world Carpet making is one of this tumultuous region s few constants an art form that transcends religious and political turmoil Part travelogue and part exploration into the meaning and worth of these mystical artifacts The Root of Wild Madder presents practical information about carpets while exploring the artistic religious and cultural complexities of these enigmatic lands *Martha Graham's Cold War* Victoria Phillips, 2020 I am not a propagandist declared the matriarch of American modern dance Martha Graham while on her State Department funded tour in 1955 Graham s claim inspires questions the United States government exported Graham and her company internationally to over twenty seven countries in Europe Eastern Europe the Middle East the Near and Far East and Russia representing every seated president from Dwight D Eisenhower through Ronald Reagan and planned under George H W Bush Although in the diplomatic field she was titled The Picasso of modern dance and Forever Modern in later years Graham proclaimed I am not a modernist During the Cold War the reconfigured history of modernism as apolitical in its expression of the heart and soul of mankind suited political needs abroad In addition she declared I am not a feminist yet she intersected with politically powerful women from Eleanor
