Read the two passages below. Think about similarities and differences between the two passages.

Rebounding Problems

Jaylin was warming up with his teammates before the big game. Although he was trying to focus on practicing his layups, Jaylin couldn't help but glance at the other team every now and then. Their center was so tall! Usually Jaylin was the best rebounder on the court, but he was worried that he wouldn't be able to rebound when that tall center was anywhere near him.

After the game started, Jaylin continued to watch the center, whose name was Gregory. Just as he had feared, Gregory was excellent at getting rebounds. Jaylin was running out of energy trying to keep up with him.

Coach Mike noticed his exhaustion and pulled him out of the game. "Take a break and catch your breath," Coach Mike said. "But while you're resting, watch Gregory closely. See if you can figure out what his weakness is."

As Jaylin watched, he realized that Gregory always stood to the left of the basketball net, even if it was more likely that the ball would rebound to the right. When Jaylin went back into the game, he decided he would head to the right side of the net any time he was going to try for a rebound.

This strategy worked! Jaylin started getting more rebounds, and his team stayed in the lead for the rest of the game, eventually winning!

Basketball Worries

Autumn had been biting her nails for the last 5 minutes. She always did that when she was nervous. Her son Jaylin had been playing great, but the center for the opposing team, Gregory, was really tall. Autumn was worried that Jaylin was going to get hurt as he tried to get as many rebounds as he could.

Every time Jaylin and Gregory jumped for a rebound, Autumn held her breath, hoping that Jaylin would be ok. The two boys had collided in the air several times. Once, Jaylin had even crashed to the ground. He had laid unmoving on the floor, eyes closed, for what seemed like hours to Autumn. Just as Autumn had started to run towards the court, Jaylin opened his eyes, jumped up, and acted like nothing had happened.

Autumn walked down to the court anyways to talk with Coach Mike.

"I know you're nervous," Mike had said, "but you shouldn't be. Jaylin knows what he's doing and how far he can push himself."

Autumn knew Coach Mike was right, but she was Jaylin's mom. She couldn't help but worry. The game was almost over, and then Autumn would be able to breath easy. But for now, Autumn would continue to bite her nails as she nervously watched the game.

Learning and Doing Policy Analysis in Education: Examining Diverse Approaches to Increasing Educational Access Maria Teresa Tatto, Justin Bruner, Fida Hussain Chang, Corvell George Cramfield, Tara Miyoko Kintz, Nai-Cheng Kuo, Sandra Kurtti Pylvainen, Andleeb Sharif, 2012-09-17 This book originated in a policy analysis class at Michigan State University taught during 2010 Using Professor Tatto's unique approach to teaching policy analysis the professor and students agreed to construct a class that represented a reflective and grounded experience in the policy analysis of a current and relevant issue with global ramifications we began exploring policies that were developed at the global level and that were implemented locally We investigated the surge of globally developed standards and regulations in an effort to improve education Our goal was to learn cross nationally about policies that seek to reform curriculum and instruction under efficiency and global competitiveness arguments such as Education for All EFA and its USA cousin No Child Left Behind NCLB We knew our work would be bounded by the time available in a one semester class and by resource constraints We did exploratory inquiry supported by literature reviews reports on rigorous research studies and in one case an exploratory case study The policies we chose to explore such as EFA and NCLB offered us the opportunity to examine current reform tendencies that are intended to provide access to quality education for all children the preparation of teachers to support diverse populations the organization of schools to accommodate these children in response to vague policy mandates and power issues affecting the different constituencies and stakeholders The effects of these and other policies were difficult to track because research is scant and decisions are frequently made based on ideology or political persuasion Our purpose was to explore the critical issues that originated such policies and to search for documented evidence regarding policy implementation and effectiveness We investigated the factors that seemed to interfere with successful implementation from conceptual theoretical and methodological perspectives In this class we learned that there are not ready set frameworks for policy analysis but rather that these have to be constructed according to the issues that emerge as policies are conceptualized and implemented to fit local contexts and needs The book pays particular attention to the contexts of policy including the evolving conceptualization of global and local systems of governance knowledge regimes and policy spaces The book is designed for faculty and doctoral students in education who are interested in understanding

diverse frameworks for policy analysis and for those in the general public who are interested in the policies we analyze here

Revolutionizing English Education Clarice M. Moran, 2024-04-30 Artificial Intelligence or AI has seemingly burst into public consciousness with sudden vigor Previously relinquished to computer science journals it erupted as the unrelenting topic of public media with most of the furor surrounding chatbots like ChatGPT Although many educators began worrying about the implications of AI in student learning and creative activity this book will demonstrate that AI can be harnessed as a source of inspiration and meaningful instruction With an emphasis on useful classroom strategies as well as a consideration of the ethics of AI this book seeks to start a conversation in this nascent area of research and practice The primary focus is on the use of AI in the secondary English classroom but educators in other disciplines will find plenty of ideas and information
