

COMPARE & CONTRAST

Passages & Worksheets

Name: Cecilia

Read the passage about orca whales and beluga whales below. Then fill in the Venn diagram to compare and contrast what you know about each whale. How are they the same and how are they different?

Orcas are large marine mammals that live in the ocean. These 12,000-pound animals are carnivores and are known to swallow sea lions and small toothed whales. They also graze on fish, squid, sea turtles, and sharks. These spectacular hunters can eat up to 500 pounds of food each day. They live in family groups, or pods, and grow to be 22-32 feet long. Their lifespan is between 50-60 years.

Beluga whales are large sea mammals that live in the ocean. The average weight of a beluga whale is between 2,000-3,000 pounds. They are carnivores and commonly eat fish, worms, and crustaceans. Their large foreheads and flexible necks make them easily identifiable among other large sea mammals. They live in pods and grow to be 12-20 feet long. Their lifespan is between 35-50 years.

Orca Whale

Beluga Whale

Name: Cecilia

Use the passage and the Venn diagram about orca whales and beluga whales to answer the following questions. Use complete sentences.

Write two complete sentences about how orca whales and beluga whales are the same.

1. _____
