Logicism Renewed Paul C. Gilmore, 2005-11-18 Logicism as put forward by Bertrand Russell was predicated on a belief that all of mathematics can be deduced from a very small number of fundamental logical principles In *Logicism Renewed* the author revisits this concept in light of advances in mathematical logic and the need for languages that can be understood by both humans and computers th *Antarctic Journal of the United States* ,1989 *Machines, Computations, and Universality* Jérôme Durand-Lose, Sergey Verlan, 2018-06-04 This book constitutes the refereed proceedings of the 8th International Conference on Machines Computations and Universality MCU 2018 held in Fontainebleau France in June 2018 The 9 revised full papers presented together with 5 invited talks were carefully reviewed and selected from numerous submissions MCU explores computation in the setting of various discrete models Turing machines register machines cellular automata tile assembly systems rewriting systems molecular computing models neural models concurrent systems etc and analog and hybrid models BSS machines infinite time cellular automata real machines quantum computing etc
