

**Concept-Development
Practice Page****6-1****Friction**

1. A crate filled with delicious junk food rests on a horizontal floor. Only gravity and the support force of the floor act on it, as shown by the vectors for weight W and normal force n .

- a. The net force on the crate is (zero) (greater than zero).
b. Evidence for this is no acceleration.

2. A slight pull P is exerted on the crate, not enough to move it.

- a. The force of friction f acting on the crate is (less than) (equal to) (greater than) P .
b. The net force on the crate is (zero) (greater than zero).

3. Pull P is increased until the crate begins to move. It is pulled so that it moves with constant velocity across the floor.

- a. Friction f is (less than) (equal to) (greater than) P .
b. Constant velocity means acceleration is (zero) (greater than zero).
c. The net force on the crate is (less than) (equal to) (greater than) zero.

4. Pull P is further increased and is now greater than friction f .

- a. The net force on the crate is (less than) (equal to) (greater than) zero.
b. The net force acts toward the right, so acceleration acts toward the (left) (right).

5. If the pulling force P is 150 N and the crate doesn't move, what is the magnitude of f ? 150 N
6. If the pulling force P is 200 N and the crate doesn't move, what is the magnitude of f ? 200 N
7. If the force of sliding friction is 250 N, what force is necessary to keep the crate sliding at constant velocity? 250 N
8. If the mass of the crate is 50 kg and sliding friction is 250 N, what is the acceleration of the crate when the pulling force is 250 N? 0 m/s² 300 N? 1 m/s² 500 N? 5 m/s²

Techniques and Concepts of High-Energy Physics VIII Thomas Ferbel, 2012-12-06

For the eighth Advanced Study Institute ASI on Techniques and Concepts of High Energy Physics we returned once again to the Hotel on the Cay on that speck of land in the harbor of Christiansted St Croix U S Virgin Islands This time the ASI brought together a total of 73 participants from 21 countries The primary support for the meeting was provided as usual by the Scientific Affairs Division of the North Atlantic Treaty Organization NATO The ASI was cosponsored by the U S Department of Energy by the Fermi National Accelerator Laboratory Fermilab by the U S National Science Foundation and by the University of Rochester A special contribution from the Oliver S and Jennie R Donaldson Charitable Trust provided an important degree of flexibility as well as support for worthy students from developing countries In addition the International Science Foundation contributed very generously to the support of a participant from Russia As in the case of the previous ASIs the scientific program was designed for advanced graduate students and recent PhD recipients in experimental particle physics The present volume of lectures although unfortunately short of three contributions should complement the material published in the first seven ASIs and prove to be of value to a wider audience of physicists It is a pleasure to acknowledge the encouragement and support that I have continued to receive from colleagues and friends in organizing this meeting

Saraswati Physics Class 10 Sanjay Bhatnagar, A text book on Physics **Teaching-Learning Contemporary Physics** Beata Jarosievitz, Csaba Sükösd, 2021-09-15 This book presents research contributions focussing on the introduction of contemporary physics topics mainly but not exclusively quantum physics into high school curricula Despite the important advances and discoveries in quantum physics and relativity which have revolutionized our views of nature and our everyday lives the presence of these topics in high school physics education is still lacking In this book physics education researchers report on the teaching and learning of quantum physics from different perspectives and discuss the design and use of different pedagogical approaches and educational pathways There is still much debate as to what content is appropriate at high school level as well what pedagogical approaches and strategies should be adopted to support student learning Currently there is a greater focus on how to teach modern physics at the high school level rather than classical physics

However teachers still lack experience and availability of appropriate teaching and learning materials to support the coherent integration of Quantum Physics in high school curricula All of the 19 papers presented in this book discuss innovative approaches for enhancing physics education in schools
