## Chapter 7 Energy Momentum and Energy

Show your work and include units!

$t = 0 \text{ s}$   
momentum =  $0 \text{ kg}(\text{m/s})$

$t = 1 \text{ s}$   
momentum =  $100 \text{ kg}(\text{m/s})$

$t = 2 \text{ s}$   
momentum =  $200 \text{ kg}(\text{m/s})$

$t = 3 \text{ s}$   
momentum =  $200 \text{ kg}(\text{m/s})$

$t = 5 \text{ s}$   
momentum =  $0 \text{ kg}(\text{m/s})$

Bronco Brown wants to put  $Ft = \Delta mv$  to the test and try bungee jumping. Bronco leaps from a high cliff and experiences 3 s of free fall. Then the bungee cord begins to stretch, reducing his speed to zero in 2 s. Fortunately, the cord stretches to its maximum length just short of the ground below.

Fill in the blanks:

Bronco's mass is 100 kg.

Acceleration of free fall is  $10 \text{ m/s}^2$ .

Express values in SI units (distance in m, velocity in  $\text{m/s}$ , momentum in  $\text{kg} \cdot \text{m/s}$ , impulse in  $\text{N} \cdot \text{s}$ , and deceleration in  $\text{m/s}^2$ ).

$d = 1/2 at^2$

The 3-s free-fall distance of Bronco just before the bungee cord begins to stretch =  $15 \text{ m}$

$\Delta mv$  during the 0 to 3-s interval of free fall =  $200 \text{ kg}(\text{m/s})$

$\Delta mv$  during the 3 to 5-s of slowing down =  $-200 \text{ kg}(\text{m/s})$

Impulse during the 3 to 5-s of slowing down =  $-200 \text{ N} \cdot \text{s}$

Average force exerted by the cord during the 3 to 5-s interval of slowing down =  $-100 \text{ N}$

How about work and energy? How much KE does Bronco have 3 s after he first jumps?

$11,250 \text{ J}$

How much does gravitational PE decrease during this 3 s?

$-15,000 \text{ J}$

$1/2(100 \text{ kg})(15 \text{ m/s}^2)$   
 $50 \text{ kg}(250 \text{ m/s}^2)$

What two kinds of PE are changing during the 3 to 5-s slowing-down interval?

Gravitational Potential Energy

Christoph Bublitz, 2021-12-06 Freedom of thought is one of the great and venerable notions of Western thought often celebrated in philosophical texts and described as a crucial right in American European and International Law and in that of other jurisdictions What it means more precisely is however anything but clear surprisingly little writing has been devoted to it In the past perhaps there has been little need for such elaboration As one Supreme Court Justice stressed freedom to think is absolute of its own nature because even the most tyrannical government is powerless to control the inward workings of the mind But the rise of brain scanning cognition enhancement and other emerging technologies make this question a more pressing one This volume provides an interdisciplinary exploration of how freedom of thought might function as an ethical principle and as a constitutional or human right It draws on philosophy legal analysis history and reflections on neuroscience and neurotechnology to explore what respect for freedom of thought or an individual's cognitive liberty or autonomy requires

Hewitt, 1977 From Atoms to Galaxies Sadri Hassani, 2011-06-13 College students in the United States are becoming increasingly incapable of differentiating between proven facts delivered by scientific inquiry and the speculations of pseudoscience In an effort to help stem this disturbing trend From Atoms to Galaxies A Conceptual Physics Approach to Scientific Awareness teaches heightened scientific acuity as it educates students about the physical world and gives them answers to questions large and small Written by Sadri Hassani the author of several mathematical physics textbooks this work covers the essentials of modern physics in a way that is as thorough as it is compelling and accessible Some of you might want to know How did Galileo come to think about the first law of motion Did Newton actually discover gravity by way of an apple and an accident Or maybe you have mulled over Is it possible for Santa Claus to deliver all his toys Is it possible to prove that Elvis does not visit Graceland every midnight Or perhaps you've even wondered If ancient Taoism really parallels modern physics If psychoanalysis can actually be called a science How it is that some philosophies of science may imply that a 650 year old woman can give birth to a child No Advanced Mathematics Required A primary textbook for undergraduate students not majoring in physics From Atoms to Galaxies examines physical laws and their consequences from a conceptual perspective that requires no advanced mathematics It explains quantum physics relativity nuclear and particle physics gauge theory quantum field theory quarks and leptons and cosmology Encouraging students to subscribe to proven causation rather than dramatic speculation the book Defines the often obscured difference between science and technology discussing how this confusion taints both common culture and academic rigor Explores the various philosophies of science demonstrating how errors in our understanding of scientific principles can adversely impact scientific awareness Exposes how pseudoscience and New Age mysticism advance unproven conjectures as dangerous alternatives to proven science Based on courses taught by the author for over 15 years this textbook has been developed to raise the scientific awareness of the untrained reader who lacks a technical or mathematical background To accomplish this the book lays the foundation of the laws that govern our universe in a nontechnical way emphasizing topics that excite the mind namely those taken from modern physics and exposing the abuses made of them by the New Age gurus and other mystagogues It outlines the methods developed by physicists for the scientific

investigation of nature and contrasts them with those developed by the outsiders who claim to be the owners of scientific methodology Each chapter includes essays which use the material developed in that chapter to debunk misconceptions clarify the nature of science and explore the history of physics as it relates to the development of ideas Noting the damage incurred by confusing science and technology the book strives to help the reader to emphatically demarcate the two while clearly demonstrating that science is the only element capable of advancing technology Cutnell & Johnson Physics John D.
