Magic and Divination in the Middle Ages Charles Burnett,2024-10-28 After discussing the terminology of talismanic magic or necromancy and its position in divisions of science in the Middle Ages this book traces the history of talismanic texts from the Classical period through the Arabic world to the Latin Middle Ages The principal authorities are Hermes and Aristotle and the search for the secret knowledge of these ancient sages is shown to have been a catalyst for the translating activity from Arabic into Latin in 12th century Spain The second half of the volume is devoted to examples of the kinds of divination prevalent in Arabic and Latin reading societies chiromancy onomancy scapulimancy geomancy and fortune telling The book ends with advice on when to practice alchemy and a prophetic letter of supposed Arabic provenance warning of the coming of the Mongols Several editions of previously unedited texts are included with translations **The Biologist's**

Mistress: Rethinking Self-Organization in Art, Literature, and Nature V. N. Alexander,2023-11-22 A secular redescription of teleology the study of purpose As 20th century geneticist J B S Haldane famously quipped Teleology is like a mistress to the biologist he dare not be seen with her in public but cannot live without her Teleology is the study of the purposes of nature As a scientific discipline it began its celebrated decline in the 17th century with the birth of modern empiricism and continued to plummet apace the rise of the Enlightenment Darwinism and quantum mechanics Those who continued to think nature could be purposeful were primarily spiritualists artists or madmen who credited the guidance of gods muses or fate But could a wholesale rejection of teleology be an overreaction Is there something in the idea as Haldane implies that we need Drawing on her experiences as a complexity theorist novelist and art theorist Victoria N Alexander examines the history and practices of teleology the study of purpose in nature as well as in human behavior She takes us inside paradoxically purposeful self organizing entities which somehow make themselves without having selves yet to do the making and she shows us how poetic like relationships things coincidentally like each other or metaphoric and things coincidentally near each other or metonymic help form organization where there was none before She suggests that it is these chance language like processes that result in emergent design and selfhood thereby offering an alternative to postmodern theories that have unfairly snubbed the purposeful artist Alexander claims that what has been missing from the

general discussion of purposefulness is a theory of creativity without which there can be no purposeful action only robotic execution of inherited design Thus revising while reviving teleology she offers us a secular non essentialist conception of selfhood as an achievement that can be more than a momentary stay against the second law Pastense Robert Gordon Johnson,2023-07-05 About the Book In the 1980s Mary Edwards watches as her daughter Emily fights for her life against leukemia With each visit to the hospital Mary finds herself drawn to the research floor and meeting with a mysterious man named Bun who educates her on the advancement of stem cells and the critical work being done by Dr Randall Byrne before he abandoned his research after a psychotic break and disappeared into the night many years ago As Emily finally succumbs to her cancer Mary in her grief finds herself on the park bench outside the hospital where Emily suffered and fought and meets the long lost Dr Byrne Miraculously he has found a way to travel back in time to a pivotal moment Mary takes a leap and is sent twenty four years into the past to save Dr Byrne and through his research her Emily A bittersweet story of grief love reconnections and reflection Pastense is a heartbreakingly beautiful take of one woman s journey through the past present and hopeful future About the Author Robert Gordon Johnson is an orthopedic surgeon who trained in Toronto where Pastense takes place He has been involved in stem cell research and the science presented in this novel is real Johnson loves to read write and exercise at the gym He has run a dozen marathons and participated in the Ironman Triathlon in Hawaii three times Johnson still practices orthopedic surgery in San Antonio where he lives with his wife Andrea son Colin and two cats He has a son and daughter Richard and Rachel from a previous marriage Much of the inspiration for Pastense came from the death of a friend s child from leukemia *EVERY MAN IS A STAR In search of our Mother Star: the identification of the stellar signifiers in a birth chart* Giacomo Albano,2019-06-11 The constellations and the fixed stars are the true origin and the foundation of astrology Paracelsus claimed that each of us is the manifestation of a star but by this we mean a certain cosmic principle one of the ideas this idea is also typical of a certain star but we have not derived it from the star it is only that we are related to it and therefore we attract each other Thus we understand the importance of the techniques shown in the first part of this book for identifying stellar and planetary signifiers in a birth chart We will see how to identify the constellations the fixed stars and also the planets with which the native is in particular sympathy and how to use them both in the common astrological practice both in spiritual or magical astrology In the following the book deals with the relevance of the heliacal phases in world astrology The last chapter focuses on the analysis of sympathetic attraction mechanisms between terrestrial and celestial realities **Catalog of Copyright Entries** Library of Congress.
