Manuale di economia e politica dei beni culturali Francesco Forte, Michela Mantovani, 2004 **Urban Heritage Management** Anna Maria Colavitti, 2018-01-02 This book explores the in depth relationship between historic cultural heritage and landscape urban and regional planning It analyzes recent cultural and discipline positions and addresses research to interpret legacy values and the necessity for conservation within the urban setting It also presents a method that helps urban planners to implement the suggestions based on extensive knowledge of topographic methods and urban archaeology to enhance the shaping and planning of the historic and present day city A rapid evolution of techniques and methods that provide innovative planning instruments and contribute to conservation projects involving cities and territories is now being witnessed in urban planning Actors involved in the planning process use an organic and multidisciplinary vision of techniques and methods to understand the relation between the historic cultural goods and their settlement context Through urban archaeology it is now possible to orient in a systematic way interventions in the historic centers of European cities and document the origin and evolution of the urban shape to reconcile renewal demand and preservation of ancient heritage Valorizzazione degli edifici dimenticati.
