## **Personality Tests And Assessments Psychology Revivals:**

Personality Tests and Assessments (Psychology Revivals) Philip E. Vernon, 2014-01-27 Originally published in 1953 this book provided the first comprehensive account of methods of personality assessment by a British author. It starts with a short survey of personality theory pointing out the difficulties in any method of testing or assessment. Next it describes the weaknesses of the common interview method. Throughout the emphasis is on methods which are usable in educational or vocational guidance and selection, not on methods which are mainly of scientific interest. Thereafter it takes up each main type of technique: tests based on physique or psychological measures; on expressive movement such as gestures and handwriting; tests of behaviour including War Office Selection Board, house party methods, ratings and rating scales, questionnaires, and so-called projective techniques. The evidence for or against each test or method is surveyed and numerous references provided for relevant literature. Illustrative excerpts are given of many of the more promising tests and some pictorial illustrations. British work in this field at the time is covered completely and an attempt is made to provide a fair summary of the main contributions of American and other psychologists of the day. **Personality Assessment**

**(Psychology Revivals)** Philip E. Vernon, 2014-01-27 Originally published in 1964 the aim of this book was to analyse the psychological processes involved in understanding personality and to consider how the psychologist could help in making more accurate assessments. Professor Vernon discusses in detail the scientific status of psychoanalytic and other depth theories of motivation, the value of different types of psychotherapeutic treatment and counselling, the influence of upbringing on the development of personality and the effectiveness of projective techniques. He also examines the reasons for the highly variable results obtained with personality tests and questionnaires. As well as providing a balanced review of theories of personality and of various types of test, this work made a fresh contribution to developing improved techniques of assessment.

### **Race and Culture in Psychiatry (Psychology Revivals) Suman**

Fernando,2014-10-14 As psychiatry has developed it has proved to be susceptible to the influence of contemporary social and political mores With its origins in nineteenth century Europe psychiatry evolved as an ethnocentric body of knowledge the vehicle of implicit and overt racism Originally published in 1988 this author however saw no reason why the contemporary psychiatrist should not challenge this ethnocentrism He provides a critical account of the development of psychiatry in relation to its cultural context and then examined contemporary practice of the time in the light of this development Throughout the book is informed by an awareness of issues of race and culture and of their difficult interactions the author emphasising both the frequency of racist attitudes and the very real cultural distinctions in our society distinctions that can be used to mask what are actually racist sentiments What emerges is not just a plea for an anti racist culture sensitive psychiatry but a blueprint for how this can be brought about He argued that the shift towards community work and social psychiatry could reorientate the profession by confronting it with its social setting and responsibilities This book represented a significant contribution to this literature for all mental health professionals and social scientists with an interest in this field at the time the author has gone on to write many more

### **Radical Approaches to Social Skills Training (Psychology Revivals) Peter Trower,2013-12-16**

Originally published in 1984 one of the few facts that emerged clearly in the beleaguered field of psychology and mental health at the time was the extent of poor social skills in psychiatric patients the mentally handicapped and problem adolescents As a result during the 1970s social skills training espoused as a form of behaviour therapy seemed to offer great promise based on the

notion that social skills like any other skills are learnt and can be taught if lacking However in evaluating social skills training many investigators found that skills did not endure and generalise This book attempts a major re assessment of social skills training It examines the underlying paradigms which are shown to be fundamentally behaviourist Such paradigms it is argued severely constrain the aims and method of current types of training Thus the book develops what is termed an agency approach based on man as a social agent who actively constructs his own experiences and generates his own goal directed behaviour on the basis of those constructs This new model is developed in both theoretical and practical ways in the main body of the book and should even today be of great interest to all those involved with social skills training

**Personality** Paul Kline,2015-06-11 Originally published in 1983 and written in the tradition of the British School of Psychology Spearman Burt Eysenck Cattell this book from a well known author was exceptional at the time in its attempt to wed quantification and psychological theory in the study of personality The student is presented with a discussion of the different methods of measuring personality and the various findings which have been made The results are then discussed in the light of psychological theories of personality and here the author stresses the need for a theory with a properly quantified bias However the emphasis on findings from measurement and not the measurement itself makes the book psychological truly about personality and not simply another text on psychological measurement

**Psychology and Visual Aesthetics** R. W. Pickford,2025-09-01 Originally published in 1972 the aim of Psychology and Visual Aesthetics was to present a study mainly concerned with experimental work on visual aesthetics From the rather restricted approaches of Fechner the

pioneer of experimental aesthetics whose book *Vorschule der Aesthetik* was published in 1876 there had been a spread of interest out of the confines of the psychological laboratory to statistical studies personality problems and social psychology Although not a history of experimental aesthetics it was hoped that the various phases of development would be apparent as follows at first laboratory studies mainly on individuals then statistically oriented studies with numbers of subjects in the 1940s the beginnings of the mathematical analysis of aesthetic judgments then the introduction of personality studies including the problems of the aesthetic judgments of psychiatric patients and in the 1950s and 1960s the development of studies based on social psychology and the cross cultural approaches These changes had taken place hand in hand with developments in psychology as a whole and of psychological techniques as will be evident in the chapters that follow The changes correspond to the successive developments of Fechnerian experimental work then of Gestalt Psychology then intelligence tests and tests of special capacities and abilities then personality tests and the understanding of abnormal psychology and finally the expansion of research into what was now often called experimental social psychology Today it can be read in its historical context This book is a re issue originally published in 1972 The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this re publication Psychology and Social Problems (Psychology Revivals) Michael Argyle, 2014-01-27 First published in 1964 *Psychology and Social Problems* looks at a changing society and research into problems of the time Many of the themes in the book such as delinquency mental health and racial conflict are still familiar and current topics of discussion today Social scientists had carried out extensive research into problems of urgent public concern yet their findings were not widely known or understood and they had often been diffident in advocating policies based on their conclusions Michael Argyle discussed the recent psychological and social research bearing on the origins of aggression delinquency mental disorder racial and international prejudice and industrial discontent he went on to consider the implications of these studies for prevention and control and for the guidance of social change This sophisticated and well documented critique is presented with such lucidity and verve that it will appeal equally to laymen and to students and professional workers and can now be enjoyed in its historical context The Book Review Digest, 2003

Assessment and Testing Harry Schofield, 2020-03-12 Originally published in 1972 there were many classics dealing with assessment and testing on the market at the time but most of these left the inexperienced reader bewildered in the early stages because of their size and insufficient explanation of the many technical terms used There were a distinct lack of books which gave students in Colleges of Education dealing with psychology for the first time a simple explanation of basic terms in assessment and testing and which introduced them briefly to the different types of tests available *Assessment and Testing* aimed to fill this large gap It looks at such key psychological terms as sample objectivity subjectivity and such basic statistical terms such as mean standard deviation and normal curve of distribution Because it assumes that the reader has no knowledge of such terms it gives careful and simply illustrated explanations of each In the same way in simple language with

any technical terms explained and illustrated it explains intelligence and personality tests questionnaires sociometric measures projection techniques and other areas of assessment and testing which every practising teacher will meet The book aims to be essentially practical It is appreciated all the time that the readers are those who will teach children It is designed to provide a solid foundation upon which the reader can build later to augment his own experience of identifying children s particular needs
