## HUMAN MALE REPRODUCTIVE SYSTEM

The male reproductive system is located in the pelvic region. It is a system of sex organs and accessory glands.

It has functions like:

- Production of sperm by spermatogenesis.
- Deposition of male sex hormones (testosterone).
- Ensures internal fertilisation.

### Primary sex organs

- Produce male gametes (sperm).
- Secrete male sex hormone (testosterone).

#### Testes in scrotum

- Adipose tissue found in the cryptorchid testis.
- Secrete and pump the sperm by 7th month of embryonic development through inguinal canal.
- Ascent of testes supported by **cremasteric muscle**.
- Temperature is  $3-3.5^{\circ}\text{C}$  (lower than normal body temperature).
- Under hormonal control of **FSH** and **LH** from anterior lobe of pituitary.

#### Seminal vesicles

- A pair of small glands near the base of bladder.
- Produce an alkaline secretion, **seminal fluid** (pH 7.4, which forms 10% of volume of semen).
- Seminal fluid is rich in fructose for nourishing sperm, **prostaglandins**, which stimulate uterine contractions for upward movement of sperm and **clotting proteins** for coagulation of semen after ejaculation.

#### Prostate gland

- Single gland, produces a milky secretion (pH 6.2, which forms 25% of volume of semen).
- Prostate secretion contains zinc and enzymes (acid phosphatase, arylsulphatase, phosphatase), and secretions nourish and activate the spermatozoa to swim.

#### Cooper's bulbourethral glands

- A pair of glands present in either side of urethra.
- Secrete alkaline fluid and mucus that lubricate the end of penis and lining of urethra.

### Accessory glands

- Secrete seminal plasma or semen rich in fructose, calcium, prostaglandins, clotting proteins and certain enzymes.

### Secondary sex organs

#### Accessory ducts

- Store and transport sperm from the testes to the scrotum through urethra.
- Include vas deferens, duct of seminal vesicle and vas deferens.

#### Intercavernosal genital duct system

#### Vasa testis

- Network of 20-30 fine channels into which seminiferous tubules open.

#### Vasa deferentia

- 15-20 fine tubules connecting sex ducts with epididymis, lined by many **climacoid cells** which help in conducting sperm, and **endothelial cells** that remove debris accompanying sperm.

#### Epididymis

- Differentiated into anterior **caput epididymis**, middle **corpus epididymis** and posterior **cauda epididymis**.
- Sperm opens and sex secretions required for maturation of spermatozoa.

#### Vasa deferentia

- Conduct sperm.
- Leave the scrotum and enter abdominal cavity through inguinal canal.
- Assisted by duct from seminal vesicle (vas deferens) duct.

#### Ejaculatory ducts

- 2 short tubes each formed by union of duct from a seminal vesicle and vas deferens.
- They pass through prostate gland and join prostatic urethra to produce **semen** **urethra** **duct**.
- Muscular walls of ejaculatory ducts quickly contract (spasms) through **urethra** **duct**.

#### Urethra

- Each longer, as compared to testis, about 25 cm, common pathway for urine and semen functioning regulated by internal and external sphincters.
- Differentiated into anterior **prostatic urethra**, surrounded by prostate gland (carrying urea only), middle **membranous urethra**, which involves duct from Cooper's gland and dorsal **penile urethra**, which opens to the outside through penile meatus.

#### Penis

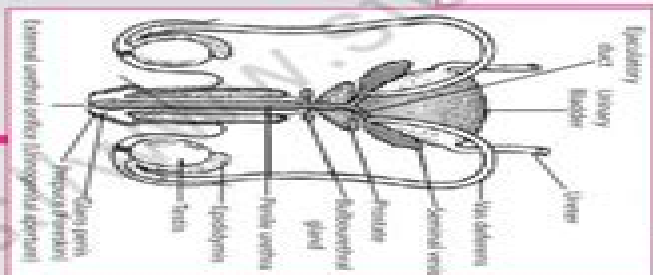

- Intra-urethral cavity (spongy).
- Conducts both urine and semen, opens to the outside by unpaired **urethral opening** (penis) covered by prepuce.
- Consists three cylindrical masses of erectile tissue - two dorsal **corpora cavernosa** and one ventral **corpus spongiosum**, which helps in rigidity during erection.
- Helps to transfer semen to female reproductive tract (vaginal) during fertilisation.

#### Prostate cancer

- Common malignancy, accounting for 25% male deaths.
- Develops difficulty in urinating, increased frequency of urination.
- Treatment involves surgical removal of testes.

#### Sterility

- Inability of sperm to fertilise the ovum due to low sperm count or low sperm motility.

### Disorders of the male reproductive system

#### Epit or Benign prostatic hypertrophy

- Enlargement of prostate gland, common in old age.
- May cause urinary tract infection (UTI).

#### Impotence

- Inability of adult male to achieve or hold erection.
- Occurs due to psychological, physiological or neuromuscular defects.

## Concept Map Of The Male Reproductive System Introduction

In the digital age, access to information has become easier than ever before. The ability to download Concept Map Of The Male Reproductive System has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Concept Map Of The Male Reproductive System has opened up a world of possibilities. Downloading Concept Map Of The Male Reproductive System provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Concept Map Of The Male Reproductive System has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Concept Map Of The Male Reproductive System. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Concept Map Of The Male Reproductive System. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Concept Map Of The Male Reproductive System, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Concept Map Of The Male Reproductive System has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
