CHAPTER 8

Section 1: How Organisms Obtain Energy

In your textbook, read about how organisms obtain energy.

Match the definition in Column A with the term in Column B.

Column A

- C 1. the idea that energy cannot be created or destroyed
- E 2. all the chemical reactions in a cell
- F 3. anabolic pathway that converts energy from the Sun to chemical energy for use by cells
- A 4. ability to do work
- H 5. series of chemical reactions in which the product of one reaction is the substrate for the next reaction
- I 6. biological molecule that provides chemical energy
- B 7. study of the flow and transformation of energy
- J 8. source of nearly all energy for life
- G 9. catabolic pathway that breaks down organic molecules
- D 10. spontaneous increase in disorder, or entropy

Column B

- A. energy
- B. thermodynamics
- C. first law of thermodynamics
- D. second law of thermodynamics
- E. metabolism
- F. photosynthesis
- G. cellular respiration
- H. metabolic pathway
- I. adenosine triphosphate (ATP)
- J. sunlight

Use each of the terms below only once to complete the passage.

energy

Organisms obtain energy in a process called (1) cellular respiration. This process harvests electrons from carbon compounds, such as (2) glucose, and uses that energy to make (3) ATP. ATP is used to provide (4) energy for cells to do work. In (5) Glycolysis, glucose is broken down into pyruvate. Glycolysis is a(n) (6) anaerobic process because it does not require oxygen. Glycolysis takes place in the (7) cytoplasm. Two molecules of ATP and two molecules of (8) NADH are formed for every glucose molecule that is broken down. (9) aerobic respiration takes place in the (10) mitochondria. It is aerobic because the process requires (11) oxygen.

Sarcina,2009-08-14 1 1 1 The book The book in your hand is not a scientific book although it is based just as much on science as on my own experience in consultancy and management As its title suggests we want to build a bridge between the leadership that is typical of facilitation techniques and that of project and network management Therefore this book does more than provide you with insights into the mainly methodical Messages we want to transmit It will also make suggestions for how to train facilitators and in the centre of the book you will find a wealth of 40 carefully selected and reality proof Tools many of which have never been previously published in English and in some case have never been published at all With all of these you will find a presentation of our way of using them Our sole objective is to offer our views and experience in improving communication for effective cooperation i.e. we want people who collaborate in some way to find and decide on the best courses of action then share and implement these decisions better We want to promote learning by doing just as well as doing by learning So this book is for people who in some way are responsible for successful cooperation in projects in and across organisations or networks of organisations Action Learning has many fathers but few mothers and roots

Conceptual Developments of 20th Century Field Theories Tian Yu Cao,1998-05-14 This book gives a broad synthesis of conceptual developments of twentieth century field theories from the general theory of relativity to quantum field theory and gauge theory The author gives a historico critical exposition of the conceptual foundations of the theories revealing a pattern to the evolution of these conceptions Theoretical physicists and students of theoretical physics will find in this book an account of the foundational problems of their discipline that will help them understand the internal logic and dynamics of their subject In addition the book will provide professional historians and philosophers of science and especially philosophers of physics with a conceptual basis for further historical cultural and sociological analysis of the theories discussed The book also contains much material for philosophical metaphysical methodological and semantical reflection Finally the scientifically qualified general reader will find in this book a deeper analysis of contemporary conceptions of the physical world than can be found in popular accounts of the subject

Computer Supported Cooperative Work in Design IV Weiming Shen,Jianming Yong,Yun Yang,Jean-Paul A. Barthès,Junzhou Luo,2008-12-18 Design of complex artifacts and systems requires the cooperation of multidisciplinary design teams using multiple sophisticated commercial and non commercial engineering tools such as CAD tools modeling simulation and optimization software engineering databases and knowledge based systems Individuals or individual groups of multidisciplinary design teams usually work in parallel and independently with various engineering tools which are located on different sites often for quite a long period of time At any moment individual members may be working on different versions of a design or viewing the design from various perspectives at different levels of details In order to meet these requirements it is necessary to have efficient computer supported collaborative design systems These systems should not only automate individual tasks in the manner of traditional computer aided engineering tools but also enable individual members to share information collaborate and coordinate their activities within the context of a design

project Based on close international collaboration between the University of Technology of Compi gne in France and the Institute of Computing Technology of the Chinese Academy of Sciences in the early 1990s a series of international workshops on CSCW in Design started in 1996 In order to facilitate the organization of these workshops an International Working Group on CSCW in Design CSCWD was established and an International Steering Committee was formed in 1998 The series was converted to international conferences in 2000 building on the success of the four previous workshops *Becoming Re-Successful* Demeron Skouson, 2008-11-20 Know the thinking behind the powerful product development principles used by Japanese automakers that propelled them to their extraordinary success in the US market place How do they think How does it affect what do they do Why did they become so highly effective Use these very same principles in your business to remarkably increase your product development efficiency and to improve your bottom line profitability The key to success is how individual businesspeople think as you become skilled in thinking Japanese you will achieve the same success
