to industrial practice The authors demonstrate various aspects of smart corrosion management and persuasively make the case that there is a real difference between corrosion management and corrosion knowledge management The book contains seven chapters that each focuses on one important aspect of corrosion and corrosion management Corrosion management is an issue that is not just corrosion science or corrosion engineering but rather a combination of both elements To cover this paradoxical aspect of corrosion management chapter 2 deals with some basic introductory concepts and principles of corrosion and coating painting an important corrosion protection method while chapter 3 explains the elements of smart corrosion management in detail Another important principle of smart corrosion management is to be able to study the cost of corrosion chapter 4 introduces important points in the economics involved in a smart corrosion management As indicated earlier corrosion engineering is also an integral part of corrosion management and thus chapter 5 looks at the engineering side of corrosion by detailing the example of Process Additives EMPA Chapter 6 for the first time looks at the possibility of using TRIZ algorithm of invention in corrosion management Finally chapter 7 presents the necessary elements for building a model that would explore the mutual interaction between corrosion and environment mainly by exploring the difference between environmental impact and environmental effect Chapter 7 is also very important because the four models so far applied to estimate the cost of corrosion Uhlig Method Hoar Method I O method and LCC method are not capable of suggesting any clear model or a sensible way of exploring the elements necessary to explain the impact of indirect costs of corrosion the most important of which being environmental damages imposed by corrosion This book is ideal for engineers students and managers working or studying corrosion Corrosion Policy Decision Making is also an indispensable resource for professionals in the fields of upstream and downstream on shore off shore oil and gas transportation mining power generation as well as major sectors of other strategic industries
