

Questions 5–7 refer to the following material.

Figure 1

Figure 2

Note: Figures not drawn to scale.

The figures above show a small block of mass 0.20 kg on a track in the shape of a circular arc. The block is released from rest at a height H above the floor, as shown in Figure 1. The block slides along the track with negligible friction and leaves it at a height of 0.40 m above the floor and a speed of 3.0 m/s at a 30° angle, as shown in Figure 2.

5. The height H is most nearly
- (A) 0.45 m
 - (B) 0.51 m
 - (C) 0.86 m
 - (D) 1.7 m
6. The magnitude of the gravitational force exerted on the block is F_g , and the magnitude of the normal force exerted by the track on the block is F_n . Which of the following correctly compares the magnitudes of these two forces when the block is at the lowest point on the track?
- (A) $F_n > F_g$
 - (B) $F_n = F_g$
 - (C) $F_n < F_g$
 - (D) The magnitudes cannot be compared without knowing the radius of the arc of the track.
7. After the block leaves the track, what is the block's speed when it reaches the highest point of its motion?
- (A) 0
 - (B) 1.5 m/s
 - (C) 2.6 m/s
 - (D) 3.0 m/s

Analytic Metaphysics Grivas Muchineripi Kayange, 2021-05-04 The main aim of this book is to discuss fundamental developments on the question of being in Western and African philosophy using analytic metaphysics as a framework It starts with the two orthodox responses to the question of being namely the subject verb object language view and the rheomodic language view In the first view being is conceived through the analysis of language structure where it is represented by subjects particulars objects and relations often universals In the second view there are different variations however the common idea is that the world s structure is revealed in the root verb of terms This suggests a holistic and dynamic conception of being where everything is in a continuous process of action The book builds on analytic philosophy and explores metaphysical concepts such as space time modality causation indeterminism versus determinism and mind and body The book shows that in both Western and African thought i similarities in different studies confirm that philosophy is a universal activity ii differences within a context and beyond confirm the perspectival nature of human knowledge as individuals attempt to interpret reality and iii language influences the conceptualization of being in a particular area One of the novel aspects is the development of visual and mathematical African models of space and time
