European Yearbook of Constitutional Law 2019 Ernst Hirsch Ballin, Gerhard van der Schyff, Maarten Stremler,2019-12-02 The European Yearbook of Constitutional Law EYCL is an annual publication initiated by the Department of Public Law and Governance at Tilburg University and devoted to the study of constitutional law It aims to provide a forum for in depth analysis and discussion of new developments in the field both in Europe and beyond This inaugural volume examines the safeguards and limits of judicial power in a variety of constitutional systems both at the national and supranational level The book approaches the judiciary as part of the constitutional system operating within a

legal order that connects the citizens and institutions of the state to each other Looking at the judiciary from this broader perspective the traditional doctrine of the separation of powers would appear no longer to adequately represent the diversity and complexity of constitutional systems and their democratic legitimacy Judicial independence does not mean isolation but should better be understood as institutionalizing relationships that legitimize the power of the courts The notions of safeguards and limits indicate the reciprocally enabling and protecting nature of these relationships In recognition of this the contributions to this volume analyse these safeguards and limits as relations existing within a complex constitutional architecture State institutions today are involved in a fundamental transformation of their selfunderstanding as a result of changes in political culture Several contributions to this volume provide examples of political criticism and pressure on the judiciary against which the usual guarantees are unable to provide adequate protection A convincing and effective response to threats to the judiciary s independence requires a detailed and precise analysis of the judiciary s constitutional safeguards and limits This book offers a step in that direction

Why They Can't Write John Warner,2020-03-17 An important challenge to what currently masquerades as conventional wisdom regarding the teaching of writing There seems to be widespread agreement that when it comes to the writing skills of college students we are in the midst of a crisis In *Why They Can t Write* John Warner who taught writing at the college level for two decades argues that the problem isn t caused by a lack of rigor or smartphones or some generational character defect Instead he asserts we re teaching writing wrong Warner blames this on decades of educational reform rooted in standardization assessments and accountability We have done no more Warner argues than conditioned students to perform writing related simulations which pass temporary muster but do little to help students develop their writing abilities This

style of teaching has made students passive and disengaged Worse yet it hasn't prepared them for writing in the college classroom Rather than making choices and thinking critically as writers must undergraduates simply follow the rules such as the five paragraph essay designed to help them pass these high stakes assessments In *Why They Can't Write* Warner has crafted both a diagnosis for what ails us and a blueprint for fixing a broken system Combining current knowledge of what works in teaching and learning with the most enduring philosophies of classical education this book challenges readers to develop the skills attitudes knowledge and habits of mind of strong writers

Animals and the Constitution John Olusegun Adenitire, Raffael Fasel, 2025-03-23 Constitutionalism the idea that constitutions should limit and direct government power has emerged as the global standard for the exercise of public authority Its appeal lies in the simple idea that constitutions should secure governance in the interests of the governed Yet its popularity has obscured a significant problem constitutions are centred on the interests of rational human beings neglecting those who lack such capacities most notably non human animals *Animals and the Constitution* breaks new ground by challenging the human centredness of current constitutional theory and practices It pioneers a more capacious account of constitutionalism sentience based constitutionalism which is grounded in respect for the interests of all governed sentient beings The book demonstrates how this account can be implemented in modern constitutions by rethinking four key principles of constitutionalism fundamental rights proportionality rule of law and democracy To illustrate how these principles can be reimaged to protect the interests of both humans and animals the book draws on and examines numerous real world examples ranging from judicial recognitions of wild animal rights in Ecuador to direct democratic votes on primate rights in Switzerland to entire proposed bills of rights for animals in Finland A unique combination of constitutional theory animal ethics and comparative constitutional law this book offers a practical blueprint for constitutions to address the moral and legal status of sentient beings
