Fractions, Tilings, and Geometry Bowen Kerins, Darryl Yong, Al Cuoco, Glenn Stevens, Mary Pilgrim, 2018-01-25 Designed for precollege teachers by a collaborative of teachers educators and mathematicians Fractions Tilings and Geometry is based on a course offered in the Summer School Teacher Program at the Park City Mathematics Institute The overall goal of the course is an introduction to non periodic tilings in two dimensions and space filling polyhedra While the course does not address quasicrystals it provides the underlying mathematics that is used in their study Because of this goal the course explores Penrose tilings the irrationality of the golden ratio the connections between tessellations and packing problems and Voronoi diagrams in 2 and 3 dimensions These topics all connect to precollege mathematics either as core ideas irrational numbers or enrichment for standard topics in geometry polygons angles and constructions But this book isn't a course in the traditional sense It consists of a carefully sequenced collection of problem sets designed to develop several interconnected mathematical themes These materials provide participants with the opportunity for authentic mathematical discovery participants build mathematical structures by investigating patterns use reasoning to test and formalize their ideas offer and negotiate mathematical definitions and apply their theories and mathematical machinery to solve problems Fractions Tilings and Geometry is a volume of the book series IAS PCMI The Teacher Program Series published by the American Mathematical Society Each volume in this series covers the content of one Summer School Teacher Program year and is independent of the rest

Common Core Math Workouts, Grade 6 Karice Mace, Keegen Gennuso, 2014-01-15 Each page in Common Core Math Workouts for grade 6 contains two workouts one for skills practice and one for applying those skills to solve a problem These workouts make great warm up or assessment exercises They can be used to set the stage and teach the content covered by the standards They can also be used to assess what students have learned after the content has been taught Content is aligned with the Common Core State Standards for Mathematics and includes Geometry Ratio and Proportional Relationships The Number System Expressions and Equations and Statistics and Probability The workbooks in the Common Core Math Workouts series are designed to help teachers and parents meet the challenges set forth by the Common Core State Standards They are filled with skills practice and problem solving practice exercises that correspond to each standard With a little time each day your students will become better problem solvers and will acquire the skills they need to meet the mathematical expectations for their grade level

Facilitator's Guidebook for Use of Mathematics Situations in Professional Learning Rose Mary Zbiek, Glendon W. Blume, M. Kathleen Heid, 2018-01-01 The depth and breadth of a mathematics teacher's understanding of mathematics matter most as the teacher engages in the daily work of teaching One of the major challenges to teachers is to be ready to draw on the relevant mathematical ideas from different areas of the school curriculum and from their postsecondary mathematics experiences that can be helpful in explaining ideas to students making instructional decisions creating examples and engaging in other aspects of their daily work Being mathematically ready and confident requires teachers to engage in ongoing professional learning that helps them to connect mathematics to events like those they live on a daily basis The purpose of this volume is to provide teachers teacher educators and other facilitators of professional learning opportunities with examples of authentic events and tools for discussing those events in professional learning settings The work shared in Facilitator's Guidebook for Use of Mathematics Situations in Professional Learning Guidebook resulted from a collaborative effort of school mathematics supervisors and university mathematics educators The collaborators joined their varied experiences as teachers coaches supervisors teacher educators and researchers to suggest ways to scaffold activities encourage discussion and instigate reflection with teacher participants of differing mathematics backgrounds and with varying teaching assignments Each guide has ideas for engaging and furthering mathematical thought across a range of facilitator and participant mathematics backgrounds and draws on the collaborators' uses of the Situations with in-service and prospective teachers The events and mathematical ideas connected to each event come from Situations in Mathematical Understanding for Secondary Teaching A Framework and Classroom Based Situations A Situation is a description of a classroom related event and the mathematics related to it For each of six Situations school and university collaborators developed a facilitator's guide that presents ideas and options for engaging teachers with the event and the mathematical ideas The Guidebook also contains suggestions for how teachers and others might develop new

Situations based on events from their own classrooms as a form of professional learning Both teacher educators and school based facilitators can use this volume to structure sessions and inspire ideas for professional learning activities that are rooted in the daily work of mathematics teachers and students
