The Cost of Racial Equality Major G. an ambitious cryptographic research agenda that sought to build privacy anonymity and accountability into the very infrastructure of the Internet Yet markets for cryptographic products collapsed in the aftermath of the dot com boom and bust along with cryptography s social projects Blanchette describes the trials of French bureaucracies as they wrestled with the application of electronic signatures to real estate contracts birth certificates and land titles and tracks the convoluted paths through which electronic documents acquire moral authority These paths suggest that the material world need not merely succumb to the virtual but rather can usefully inspire it Indeed Blanchette argues in renewing their engagement with the material world cryptographers might also find the key to broader acceptance of their design goals **Video Source**
