Between Past And Future Between Past And Future:

The Future of the Past Tamara L. Bray, 2001 To date the notion of repatriation has been formulated as a highly polarized debate with museums archaeologists and anthropologists on one side and Native Americans on the other This volume offers both a retrospective and a prospective look at the topic of repatriation By juxtaposing the divergent views of native peoples anthropologists museum professionals and members of the legal profession it illustrates the complexity of the repatriation issue *The Judge and the Spectator* Joke Johannetta Hermsen, Dana Richard Villa, 1999 Since early texts as *Thinking and Politics* Arendt had highlighted the contrast between philosophical and political thinking and compelled herself to find a satisfactory answer to the question how do philosophy and politics relate In her last work *Lectures on Kant's Political Philosophy* 1982 Arendt analyses the political dimensions of Kant's critical thinking To think critically implies taking the viewpoints of others into account one has to enlarge one's own mind by comparing our judgement with the possible judgements of others While thinking remains a solitary activity it does not cut itself off from all others The essays in this book address the philosophical and moral questions raised by Arendt's attempt to draw out the political implications of critical thinking in Kant's sense In one way or another they all address the place of judgment in Arendt's thought Arendt's turn to Kant and *The Critique of Judgment* was motivated by her desire to find a form of philosophizing that was not hostile to politics and the public realm But did she really think that Kant's characterization of the judging spectator pointed the way out of the opposition between the universal and the particular between looking at things *sub specie aeternitatis* and looking at things from a political point of view To what extent did she think that Kant was successful in revealing a mode of thought oriented towards public persuasion yet one which retained its critical independence Each of the essays wrestles with the complexities of a complex thinker They remind us that critical thinking or *Selbstdenken* is among the most difficult and rare arts even though it is an art potentially accessible to everyone They also remind us that Hannah Arendt was a virtuoso of this art and of how her example points the way toward a renewal of judgment as the political faculty *par excellence* *Visions of the Future in Comics* Francesco-Alessio Ursini, Adnan Mahmutovic, Frank Bramlett, 2017-10-18 Across generations and genres comics have imagined different views of the future from unattainable utopias to worrisome dystopias These presaging narratives can be read as reflections of their authors and readers hopes fears and beliefs about the present This collection of new essays explores the creative processes in comics production that bring plausible futures to the page The contributors investigate portrayals in different stylistic traditions manga bande dessinée from a variety of theoretical perspectives The picture that emerges documents the elaborate storylines and complex universes comics creators have been crafting for decades **Proceedings of the ... World Congress of the International Association for Philosophy of Law and Social Philosophy (IVR)** Internationale Vereinigung für Rechts- und Sozialphilosophie, 2004 **Modernism** Ástráður Eysteinnsson, Vivian Liska, 2007 The two volume work *Modernism* has been awarded the prestigious 2008 MSA Book Prize

Modernism has constituted one of the most prominent fields of literary studies for decades. While it was perhaps temporarily overshadowed by postmodernism, recent years have seen a resurgence of interest in modernism on both sides of the Atlantic. These volumes respond to a need for a collective and multifarious view of literary modernism in various genres, locations, and languages. Asking and responding to a wealth of theoretical, aesthetic, and historical questions, 65 scholars from several countries test the usefulness of the concept of modernism as they probe a variety of contexts from individual texts to national literatures, from specific critical issues to broad cross-cultural concerns. While the chief emphasis of these volumes is on literary modernism, literature is seen as entering into diverse cultural and social contexts. These range from inter-art conjunctions to philosophical, environmental, urban, and political domains, including issues of race and space, gender, and fashion, popular culture, and trauma, science, and exile, all of which have an urgent bearing on the poetics of modernity.

Diverging Time David Carvounas, 2002-01-01 Temporal divergence creates a need for new narratives and paradigms. In *Diverging Time*, David Carvounas supports this assertion through detailed expository and diagnostic readings of Kant, Hegel, and Marx. He focuses on their contribution to our understanding of modernity as an epochal shift in the relationship between past and future, recasting the significance of the past and future of the modern present. Despite their different solutions to the problem of temporal coordination, they urged the modern world to look not to the past but to the newly opened future for continuity, meaning, and purpose. This book not only offers a fresh look at a defining characteristic of modernity but also makes a compelling case that a coherent modern temporal structure requires a sustainable orientation toward the future, an orientation that Kant, Hegel, and Marx delineate in distinctive and powerful ways. **A Research Agenda for**

Organisational Continuity and Change Tor Hernes, Miriam Feuls, 2023-10-06 Research has overlooked the need for modern organisations to enact continuity during periods of change. This Research Agenda addresses this by considering continuity and change as engaging in various forms of mutual interplay. The underlying theme of this book is that change needs continuity just as continuity needs change. **Managing Risk** Romney Beecher Duffey, John Walton Saul, 2008-09-15

The human element is the principle cause of incidents and accidents in all technology industries; hence, it is evident that an understanding of the interaction between humans and technology is crucial to the effective management of risk. Despite this, no tested model that explicitly and quantitatively includes the human element in risk prediction is currently available. *Managing Risk: The Human Element* combines descriptive and explanatory text with theoretical and mathematical analysis, offering important new concepts that can be used to improve the management of risk, trend analysis, and prediction, and hence affect the accident rate in technological industries. It uses examples of major accidents to identify common causal factors or echoes and argues that the use of specific experience parameters for each particular industry is vital to achieving a minimum error rate as defined by mathematical prediction. New ideas for the perception, calculation, and prediction of risk are introduced, and safety management is covered in depth, including for rare events and unknown outcomes. Discusses

applications to multiple industries including nuclear aviation medical shipping chemical industrial railway offshore oil and gas Shows consistency between learning for large systems and technologies with the psychological models of learning from error correction at the personal level Offers the expertise of key leading industry figures involved in safety work in the civil aviation and nuclear engineering industries Incorporates numerous fascinating case studies of key technological accidents Managing Risk the Human Element is an essential read for professional safety experts human reliability experts and engineers in all technological industries as well as risk analysts corporate managers and statistical analysts It is also of interest to professors researchers and postgraduate students of reliability and safety engineering and to experts in human performance congratulations on what appears to be at a high level of review a significant contribution to the literature I have found much to be admired in your research Mr Joseph Fragola Vice President of Valador Inc The book is not only technically informative but also attractive to all concerned readers and easy to be comprehended at various level of educational background It is truly an excellent book ever written for the safety risk managers and analysis professionals in the engineering community especially in the high reliability organizations Dr Feng Hsu Head of Risk Assessment and Management NASA Goddard Space Flight Center I admire your courage in confronting your theoretical ideas with such diverse ecologically valid data and your success in capturing a major trend in them I should add that I find all this quite inspiring The idea that you need to find the right measure of accumulated experience and not just routinely used calendar time makes so much sense that it comes as a shock to realize that this is a new idea Professor Stellan Ohlsson Professor of Psychology University of Illinois at Chicago [Introduction to Anticipation Studies](#) Roberto Poli,2017-08-28 This book presents the theory of anticipation and establishes anticipation of the future as a legitimate topic of research It examines anticipatory behavior i e a behavior that uses the future in its actual decisional process The book shows that anticipation violates neither the ontological order of time nor causation It explores the question of how different kinds of systems anticipate and examines the risks and uses of such anticipatory practices The book first summarizes the research on anticipation conducted within a range of different disciplines and describes the connection between the anticipatory point of view and futures studies Following that its chapters on Wholes Time and Emergence make explicit the ontological framework within which anticipation finds its place It then goes on to discuss Systems Complexity and the Modeling Relation and provides the scientific background supporting anticipation It restricts formal technicalities to one chapter and presents those technicalities twice in formal and plain words to advance understanding The final chapter shows that all the threads presented in the previous chapters naturally converge toward what has come to be called Discipline of Anticipation

Physical Theory Lawrence Sklar,2014 In nine new essays distinguished philosophers of science discuss outstanding issues in scientific methodology especially that of the physical sciences and address philosophical questions that arise in the exploration of the foundations of contemporary science **Visions of the Future in Roman Frontier Kingdoms 100**

BCE-100 CE Richard Teverson, 2024-09-03 This is the first book length exploration of the ways art from the edges of the Roman Empire represented the future examining visual representations of time and the role of artwork in Roman imperial systems This book focuses on four kingdoms from across the empire Cottius s Alpine kingdom in the north King Juba II s Mauretania in the south west Herodian Judea in the east and Kommagene to the north east Art from the imperial frontier is rarely considered through the lens of the aesthetics of time and Roman provincial art and the monuments of allied rulers are typically interpreted as evidence of the interaction between Roman and local identities In this interdisciplinary study which explores statues wall paintings coins monuments and inscriptions readers learn that these artworks served as something more they were created to represent the futures that allied rulers and their people foresaw The pressure of Roman imperialism drove patrons and artists on the empire s borders to imbue their creations with increasingly sophisticated ideas about the future as they wrestled with consequential decisions made under periods of intense political pressure Comprehensively illustrated and providing an important new approach to Roman material culture at the edge of empire *Visions of the Future in Roman Frontier Kingdoms 100 BCE 100 CE* is suitable for students and scholars working on Rome and its frontiers as well as Roman material culture more broadly and those studying the aesthetics of time in art and art history

The Becoming of Time Lawrence W. Fagg, 1995 This lucid and wide ranging study sets out to reconcile the objective and subjective perspectives in the investigation of the phenomenon of time Lawrence W Fagg explores the wondrous subtleties of time that modern physics continues to reveal but complements them with the rich insights of the spiritual perspectives on time that the world s major religions have to offer Helga Nowotny Former President International Society for the Study of Time

Postnational Constitutionalism Paul Linden-Retek, 2023-03-29 At a time when the integration of the European Union s peoples through the rule of law is faltering this book develops a critical theory of postnational constitutionalism Today widely held conceptions of EU law continue to mislead citizens about the nature of political identity sovereignty and agency They lose sight of a critical idea on which post nationalism depends that constitutional self authorship is narrative and the polity is a subject whose identity history and legacy are still in formation Absent this vision EU law reproduces crises of legitimacy the depoliticization of public life emergency rule by executive decree a collapse of solidarity and the rise of nativist movements The book diagnoses this impasse as the product of a problem familiar to modernity reification a process in which social and historical relationships are misattributed as timeless relations among things Reification s shrinking of social dilemmas moral principles and political action to narrow perceptions of the present explains law s role in perpetuating crisis But this diagnosis also points to a remedy It suggests that to sustain the emancipatory potential of EU constitutionalism we must recover law s relationship to time Postnational Constitutionalism *Europe and the Time of Law* proposes a temporally attuned constitutional theory with principles of anti reification narrative

interpretation and non sovereign agency at its centre These principles reimagine essential domains of constitutional order social integration constitutional adjudication and constituent power Spanning various bodies of EU jurisprudence the book devotes particular attention to migration and asylum struggles where questions of solidarity law and belonging are most generative and acute

Time, Progress, Growth and Technology Filipe Duarte Santos, 2020-09-18 This book addresses the current challenges of sustainable development including its social economic and environmental components The author argues that we need to develop a new concept of time based on inter generational solidarity which focuses both on the long and the short term The evolution of man s notions of time are analyzed from prehistory to modern times showing how these concepts shape our worldviews our ecological paradigms and our equilibrium with our planet Practical approaches to dealing with the major medium and long term sustainability challenges of the 21st century are presented and discussed This is a thought provoking and timely book that addresses the main global socioeconomic and environmental challenges facing the current and future generations using science based analysis and perspectives It presents an historical narrative of the advent of progress economic growth and technology and discusses the structural changes needed to co create sustainable pathways It provides hope for our future on Earth mankind s common home Ant nio Guterres Secretary General of the United Nations This is an amazing almost mind boggling book The author takes a look at the true whole i e the development of the human enterprise since its very beginning This enterprise is evidently a possibility under the boundary conditions of cosmological dynamics and natural evolution but evidently also a highly improbable one It is all but a miracle that the Earth system in its present form exists and happens to support a technical civilization Will this civilization last long will it transform itself into something even more exceptional or will it perish in disgrace Santos dares to address these grandest of all questions equipped with a unique transdisciplinary wisdom drawing on physics cybernetics geology biology economics anthropology history and philosophy And he dares to dive into the deepest abysses of thinking where categorial monsters like time and progress lurk Thereby he takes us on fascinating journey during which we perceive and grasp things we have never seen and understood before One of the best essays I have ever read John Schellnhuber founding director of the Potsdam Institute for Climate Impact Research PIK and former chair of the German Advisory Council on Global Change

The Future of Equality Shlomi Segall, 2025-05-15 Philosophers have been preoccupied with the future from time immemorial But for egalitarians the future of humanity constitutes a relatively new challenge The premise of this book is that a complaint based ideal of egalitarianism faces problems when applied to the future For one thing if we suppose that future people are destined to fare better than us say in terms of overall wellbeing then allowing humanity to flourish would then represent a net increase in terms of egalitarian complaints With respect to equality at least it would be better to refrain from bringing new life into being That seems absurd This is the Anti Natalist objection to egalitarianism Second any policy aimed at reducing future inequalities and indeed any population policy at large will in all likelihood affect the identity of those who will be born This

familiar Non Identity problem poses unique problems for egalitarianism especially ones of the complaint model Arguably a person cannot have a complaint about being worse off than another when the only other alternative distribution is one in which she does not exist Put differently such a person lacks a standing to complain about this future inequality This can be referred to as the Non Identity objection or as the Standing objection to egalitarianism This book examines how to evaluate different scenarios for humanity s future from an egalitarian perspective It is argued that planning for the future does require egalitarian considerations but that egalitarianism also needs to be adapted to handle future persons As indicated a key challenge concerns how to evaluate mixed populations containing both necessary and possible persons The book proposes a pluralist approach combining egalitarianism with prioritarianism Prioritarianism itself also suffers unique problems when applied to the future chief among them the Separateness of Persons objection The book attempts to deflect these obstacles and aims to develop a coherent framework that maintains egalitarian principles while appropriately discounting the status of merely possible people Overall the book seeks to advance both our ethical assessment of humanity s future and our understanding of the nature of equality and distributive ethics more generally

The Coming of God Jürgen Moltmann, Margaret Kohl, 2004-07-27 Winner of Grawemeyer Award In this remarkable and timely work in many ways the culmination of his systematic theology world renowned theologian Jurgen Moltmann stands Christian eschatology on its head Moltmann rejects the traditional approach which focuses on the End an apocalyptic finale as a kind of Christian search for the final solution He centers instead on hope and God s promise of new creation for all things Christian eschatology he says is the remembered hope of the raising of the crucified Christ so it talks about beginning afresh in the deadly end Yet Moltmann s novel framework deeply informed by Jewish and messianic thought also fosters rich and creative insights into the perennially nettling questions of eschatology Are there eternal life and personal identity after death How is one to think of heaven hell and purgatory What are the historical and cosmological dimensions of Christian hope What are its social and political implications In a heartbreakingly fragile and fragment world Moltmann s comprehensive eschatology surveys the Christian vista bravely envisioning our horizons of expectation for personal social even cosmic transformation in God

The Future of the Philosophy of Time Adrian

Bardon, 2013-03-01 The last century has seen enormous progress in our understanding of time This volume features original essays by the foremost philosophers of time discussing the goals and methodology of the philosophy of time and examining the best way to move forward with regard to the field's core issues The collection is unique in combining cutting edge work on time with a focus on the big picture of time studies as a discipline The major questions asked include What are the implications of relativity and quantum physics on our understanding of time Is the passage of time real or just a subjective phenomenon Are the past and future real or is the present all that exists If the future is real and unchanging as contemporary physics seems to suggest how is free will possible Since only the present moment is perceived how does the experience as we know it come about How does experience take on its character of a continuous flow of moments or events What explains the apparent one way direction of time Is time travel a logical metaphysical possibility

Senses of the Future Gerard

Delanty, 2024-03-04 The future has become a problem for the present Almost every critical issue is now understood and experienced through the prism of the future since this is the primary focus for the playing out of crises Senses of the Future offers a wide ranging discussion of theories of the future It covers the main ideas of the future in modern thought and explores how we should view the future today in light of a plurality of very different and conflicting visions The key contribution of this book is to bring together the different approaches with an account that is grounded in sociological and philosophical analysis as opposed to visions of the future that are inspired by extreme visions of catastrophe or approaches that see the future as only the continuation of the present Given a revival of apocalyptic visions of the end times and dystopian views of the future of human societies there is urgent need for a new approach on how we should imagine the future The author explores the future as a field of tensions that is revealed in narratives utopian desires hope imaginaries and social struggles concerning the potential possibilities of the present the future does not just arrive it has to be fought for This book is an important contribution to a critical sociology of the future It is both a work of reconstruction and critique grounded in a historical and philosophical hermeneutics of the future
