Nature That Makes Us Human Michel Loreau, 2023 This book seeks to answer two fundamental questions Why do we keep destroying nature when science makes it clear that in doing so we risk our own destruction How can we stop doing so and regain the unity of humans and nature First the book shows that the inability of modern society to modify its relationship with nature has its roots in the collective fictions that have gradually shaped it since the Neolithic revolution The collective fictions that underpin modernity include in particular the subject object duality the matter mind duality the primacy of rationality and the superiority of the human species over all other living beings These deeply ingrained fictions prevent us from acting in the world in agreement with the needs and knowledge that we have Second the book argues that humans have a nature that defines them as a unique species beyond their cultural differences and this nature is not made only of flesh and bones but also of a set of fundamental needs Fundamental needs connect humans with nature spontaneously because they are the manifestation of life in them They also make it possible to re establish the unity of body and mind and of the different forms of knowledge and to give the economy a new direction focused on the development of the human being and of its living environment Challenging our collective fictions and reconnecting with our deepest nature is essential if we are to overcome the current ecological crisis and allow life on Earth to flourish

The Code for Global Ethics Rodrigue Tremblay, 2010 No Marketing Blurb [The End of Christianity](#) John W. Loftus, 2011-07-12 In this successor to his critically acclaimed anthology *The Christian Delusion Why Faith Fails* a former minister and now leading atheist spokesperson has assembled a stellar group of respected scholars to continue the critique of Christianity begun in the first volume Contributors include Victor Stenger Robert Price Hector Avalos Richard Carrier Keith Parsons David Eller and Taner Edis Loftus is also the author of the best selling *Why I Became an Atheist A Former Preacher Rejects Christianity* Taken together the Loftus trilogy poses formidable challenges to claims for the rationality of the Christian faith Anyone with an interest in the philosophy of religion will find this compilation to be intellectually stimulating and deeply thought provoking [God and the Folly of Faith](#) Victor J. Stenger, 2012-04-03 A thorough and hard hitting critique that is a must read for anyone interested in the interaction between religion and science It has become the prevalent view among sociologists historians and some theistic scientists that religion and science have never been in serious conflict Some even claim that Christianity was responsible for the development of science In a sweeping historical survey that begins with ancient Greek science and proceeds through the Renaissance and Enlightenment to contemporary advances in physics and cosmology Stenger makes a convincing case that not only is this conclusion false but Christianity actually held back the progress of science for one thousand years It is significant he notes that the scientific revolution of the seventeenth century occurred only after the revolts against established ecclesiastic authorities in the Renaissance and Reformation opened up new avenues of thought The author goes on to detail how religion and science are fundamentally incompatible in several areas the origin of the universe and its physical parameters the origin of complexity holism versus reductionism the nature of mind and consciousness and the source of morality In the end Stenger is most

troubled by the negative influence that organized religion often exerts on politics and society He points out antiscientific attitudes embedded in popular religion that are being used to suppress scientific results on issues of global importance such as overpopulation and environmental degradation When religion fosters disrespect for science it threatens the generations of humanity that will follow ours

The Art of Life and Death Andrew Irving, 2017-09-15 The Art of Life and Death explores how the world appears to people who have an acute perspective on it those who are close to death Based on extensive ethnographic research Andrew Irving brings to life the lived experiences imaginative lifeworlds and existential concerns of persons confronting their own mortality and non being Encompassing twenty years of working alongside persons living with HIV AIDS in New York Irving documents the radical but often unspoken and unvoiced transformations in perception knowledge and understanding that people experience in the face of death By bringing an experience near ethnographic focus to the streams of inner dialogue imagination and aesthetic expression that are central to the experience of illness and everyday life this monograph offers a theoretical ethnographic and methodological contribution to the anthropology of time finitude and the human condition With relevance well beyond the disciplinary boundaries of anthropology this book ultimately highlights the challenge of capturing the inner experience of human suffering and hope that affect us all of the trauma of the threat of death and the surprise of continued life The art of life and death is unlike anything I have ever read in its combination of theoretical ambition and methodological innovation The book is the fruit of Irving s close collaboration with a remarkable group of men and women diagnosed with AIDS at a time when there was little hope of surviving the disease With the help of their words and crucially their art Irving illuminates the complex inner life world created by the trauma of threatened death and the surprise of continued life Inner experience and the challenge of capturing it lie at the heart of this book Danilyn Rutherford author of Laughing at Leviathan The art of life and death is a monumental anthropological achievement Fusing long term fieldwork deeply sensitive observation and a refined sense the phenomenology of our deep existential fears of illness of death and the emotional quandaries of having survived a confrontation with mortality Andrew Irving demonstrates how imaginative ethnography can reveal to us the deep contours of human being The art of life and death is filled with gripping narratives not only of pain confusion but also of courage and resilience It is a theoretically informed text that will long remain open to the world Paul Stoller author of Yaya s story The art of life and death is a brilliantly engaging piece of work that invites us to rethink life itself and introduces new ways of carrying out anthropological research Through a compelling interweaving of ethnography and theory Irving takes us close to lives that have been lived under conditions of existential uncertainty and recovery This book goes beyond conventional anthropology to offer a thoroughly inspiring account from which we learn not only about what it means to live near death but how art and the senses are implicated in life It will endure as an outstanding example of

how do anthropology at its best Sarah Pink coauthor of *Uncertainty and possibility* In this imaginatively conceived book Andrew Irving asks compelling and daring questions on how to think of such categories as experience inner life or subjectivity in the face of imminent death He follows up with a very careful and caring ethnography of how art and life flow into each other Irving achieves perfect pitch in his writing A splendid achievement Veena Das author of *Affliction* Of the utmost importance a very worthwhile introduction to any medical anthropologist because it includes detailed ethnographic descriptions a variety of ethnographic methods and a range of key anthropological themes including a focus on embodied experiences social injustice and how individuals deal with death The narrative style of the book makes it easy to read and relate to This is a great feat given the complex and troubling themes discussed which lead one to question their very perception of life itself *Journal of the Anthropological Society of Oxford* Of interest to anyone looking to explore people's dynamic perceptive and reflective outlook on the world whether looking to the future contemplating death or simply being alive No curious anthropology student or for that matter person would be left un-inspired or non-transformed by this text and I implore as wide a readership as possible *Anthropology Aging* An exceptional achievement that gets under your skin from beginning to end Outstanding interweaving of theoretical critique and aspiration collaborative ethnography and methodological experimentation and innovation Inspiring essential reading for anyone interested in new ethnographic methods to more deeply access the complex inner dimensions of human experience *American Ethnologist* An excellent thought provoking book Brilliantly succeeding in drawing both a conceptual and empirical portrait of the patterns in which HIV as a socio-historically traceable illness tends to articulate the life-death dialectical relation on the discovery threshold of embodied mortality *Groundbreaking Mortality* This beautifully written and constructed book weaves together sophisticated social theory philosophy art work and vivid biographical narratives to offer insights into how HIV/AIDS patients have learned to live a meaningful existence in the pre and post antiretroviral eras while negotiating a terminal illness Basing his book on 20 years of work with adults living with HIV/AIDS in New York visual anthropologist Irving has carried out a compelling anthropological study of the complex inner world of those who struggle cope fight and ultimately come to terms with their own impending deaths The author draws on philosophical writings and social theories to contextualize his results but is at his best when allowing his subjects to speak for themselves The evocative words of subjects like artist Albert Velasco provide fascinating insights into the ways that dying persons with HIV/AIDS grapple with the mundane like keeping medical appointments as well as the profound reckoning with their own mortality and purpose An engaging read that will enrich upper level and graduate collections on death and dying ethnographic methods and HIV/AIDS Highly recommended *Choice*

Determinism and Chance William Martin, *AI*, 2025-02-26 *Determinism and Chance* explores the age-old question of whether the universe operates by immutable laws or if chance plays a fundamental role It examines how science and philosophy have grappled with the tension between predictable causality and inherent randomness noting that while classical

mechanics once envisioned a clockwork universe the emergence of statistical mechanics quantum mechanics and chaos theory introduced significant challenges to this deterministic view The book argues that neither strict determinism nor pure randomness fully explains the complexities of nature The book traces the evolution of these ideas beginning with classical physics and moving through quantum indeterminacy chaos theory and statistical mechanics illustrating how deterministic systems can exhibit unpredictable behavior For instance chaos theory demonstrates how even simple systems can produce wildly different outcomes based on tiny changes in initial conditions similar to how a butterfly flapping its wings might influence weather patterns across the globe Ultimately the book synthesizes philosophical analysis with scientific evidence offering a clear and accessible exploration of these profound topics Throughout its chapters Determinism and Chance connects physics mathematics philosophy and information theory demonstrating the interdisciplinary relevance of these concepts It considers the implications for understanding free will the nature of time and the limits of scientific knowledge while refraining from deep mathematical derivations The book aims to stimulate further discussion on fundamental questions about reality and our place in the cosmos

The Universe Is on Our Side Bruce Ledewitz, 2022 In *The Universe Is On Our Side* Bruce Ledewitz argues that there has been a breakdown in American public life that no election can fix Americans struggle to even converse about politics and the usual explanations for our condition have failed to make things better America's future requires that we begin a new story by each of us asking a question posed by theologian Bernard Lonergan Is the universe on our side According to Ledewitz when we commit to live honestly and fully by our answer to that question even if our immediate answer is no America can begin to heal

Tarot and the Path of Initiation Henry Ho, 2013-11-18 This book came into being from the authors exasperation at the ignorance of many users of the Thoth tarot deck They prefer to go by their intuition rather than study Crowleys companion book to the deck *The Book of Thoth* Its too dense they cry Im not interested in these philosophies I just want to read Tarot The above sentence is the greatest insult to Aleister Crowley the creator of the Thoth deck For the decks purpose was to convey the higher mysteries to the diviner Crowley intended for the deck never to be sold separately from the *Book of Thoth* And so heart full of elitist snobbery and sense of obligation to Crowley the author of this book set out to spoon feed this dense material to the masses without watering down its contents In the spirit of Crowley who sought to enlighten the world the author has added his own contribution to Crowleys legacy out of duty It was due to Crowleys belief in freedom of information during an era of politics and secrecy that the author was able to get his own hands on the gem of all spiritual writing the *Book of Thoth*
