Educational Policies and Youth in the 21st Century Sharon L. Nichols, 2016-07-01 As our student population diversifies rapidly there is a critical need to better understand how national regional and or local policies impact youth in school settings In many cases educational policies constructed with the goal of helping youth often have the unintended consequence of inhibiting youth s potential This is especially the case when it comes to youth from historically underrepresented groups Over and over educational legislation aimed at improving life for youth has had the negative effect of eroding opportunities for our most vulnerable and often times less visible youth The authors of this book examine the schooling experiences of Hispanic African American Indigenous poor and LGBT youth groups as a way to spotlight the marginalizing and shortsighted effects of national education language immigration and school reform policies Leading authors from across the country highlight how educational policies impact youth s development and socialization in school contexts In most cases policies are constructed by adults implemented by adults but are rarely informed by the needs and opinions of youth Not only are youth not consulted but also policymakers often neglect what we know about the psychological emotional and educational health of youth Therefore both the short and long term impact of these policies have but limited effects on improving students school performance or personal health issues such as depression or suicide In highlighting the demographic and cultural shifts of the 21st century this book provides a compelling case for policymakers and their constituents to become more sensitive to the diverse needs of our changing student population and to advocate for policies that better serve them
