A World After Climate Change And Culture Shift:

A World After Climate Change and Culture-Shift Jim Norwine, 2013-10-07 In this book an international team of environmental and social scientists explain two powerful current change engines and how their effects and our responses to them will transform Earth and humankind into the 22nd century c 2100 This book begins by detailing the current state of knowledge about these two ongoing accelerating and potentially world transforming changes climate change in the form of global warming and a profound emerging shift of normative cultural condition toward the assumptions and values often associated with so called postmodernity such as tolerance diversity self referentiality and dubiety replaced with certainty Next the contributors imagine explain and debate the most likely consequent transformations of human and natural ecologies and economies that will take place by the end of the 21st century In 16 compellingly original provocative and readable chapters *A World after Climate Change and Culture Shift* presents a one of a kind vision of our current age as a hinge or axial century one driven by the most radical combined change of nature and culture since the rise of agriculture at the end of the last Ice Age some 10 millennia ago This book is highly recommended to scholars and students of the environmental and social sciences as well as to all readers interested in how changes in nature and culture will work together to reshape our world and ourselves I cannot think of a book more geared to advancing the art and science of geography Yi Fu Tuan J K Wright and Vilas Professor Emeritus of Geography University of Wisconsin Madison Outstanding unique and exceptional timeliness of topic and ambition of vision Richard Marston University Distinguished Professor Kansas State University past president Association of American Geographers [Explaining Transformative Change in ASEAN and EU Climate Policy](#) Charanpal Bal, David Coen, Julia Kreienkamp, Paramitaningrum, Tom Pegram, 2023-04-13 The Paris Agreement embodies a flexible approach to global cooperation aimed at encouraging ever more ambitious climate action by a variety of players on all levels of governance Regional organizations play an important role in mobilizing such action This Element provides novel insights into the conditions under which policy entrepreneurs can bring about transformative policy change in regional settings with a focus on the European Union EU and the Association of Southeast Asian Nations ASEAN It finds that opportunity structures in the EU have been conducive to successful climate progressive policy entrepreneurship at several key junctures but not consistently In contrast the ASEAN governance context provides few access points for non elite interests making it fiendishly difficult for policy entrepreneurs to push for substantive policy change in the face of powerful domestic veto players This title is also available as Open Access on Cambridge Core [A Political Ecology of Women, Water and Global Environmental Change](#) Stephanie Buechler, Anne-Marie Hanson, 2015-03-02 This edited volume explores how a feminist political ecology framework can bring fresh insights to the study of rural and urban livelihoods dependent on vulnerable rivers lakes watersheds wetlands and coastal environments Bringing together political ecologists and feminist scholars from multiple disciplines the book develops solution oriented advances to theory policy and planning to tackle the

complexity of these global environmental changes Using applied research on the contemporary management of groundwater springs rivers lakes watersheds and coastal wetlands in Central and South Asia Northern Central and Southern Africa and South and North America the authors draw on a variety of methodological perspectives and new theoretical approaches to demonstrate the importance of considering multiple layers of social difference as produced by and central to the effective governance and local management of water resources This unique collection employs a unifying feminist political ecology framework that emphasizes the ways that gender interacts with other social and geographical locations of water resource users In doing so the book further questions the normative gender discourses that underlie policies and practices surrounding rural and urban water management and climate change water pollution large scale development and dams water for crop and livestock production and processing resource knowledge and expertise and critical livelihood studies This book will be of interest to students and scholars of environmental studies development studies feminist and environmental geography anthropology sociology environmental philosophy public policy planning media studies Latin American and other area studies as well as women s and gender studies

Biosystems Engineering Promoting Resilience to Climate Change - AIIA 2024 - Mid-Term Conference Luigi Sartori, Paolo Tarolli, Lorenzo Guerrini, Giulia Zuecco, Andrea Pezzuolo, 2025-04-12 This book gathers the latest advances and innovations in the field of innovative biosystems engineering for sustainable agriculture forestry and food production as presented at the International Mid Term Conference of the Italian Association of Agricultural Engineering AIIA held in Padova Italy on June 17 19 2024 Focusing on the challenges of implementing sustainability in various contexts in the fields of biosystems engineering it shows how the research has addressed the sustainable use of renewable and non renewable resources It also presents possible solutions to help achieve sustainable production The Mid Term Conference of the Italian Association of Agricultural Engineering AIIA is part of a series of conferences seminars and meetings that the AIIA organizes together with other public and private stakeholders to promote the creation and dissemination of new knowledge in the sector The contributions included in the book were selected by means of a rigorous peer review process and offer an extensive and multidisciplinary overview of interesting solutions in the field of innovative biosystems engineering for sustainable agriculture

Enhancing Agricultural Research and Precision Management for Subsistence Farming by Integrating System Models with Experiments Dennis J. Timlin, Saseendran S. Anapalli, 2022-05-17 Enhancing Agricultural Research and Precision Management for Subsistence Farming Insightful applications of crop system models to developing countries to explore climate change mitigation and management decision tools Enhancing Agricultural Research and Precision Management for Subsistence Farming by Integrating System Models with Experiments delivers an authoritative collection of applications of crop system models to Asian and African environments and evaluates current agricultural systems in developing nations The book provides models to assist in the precision management of soil water fertilizers and manures soil organic matter alternative crops and cultivars in both rainfed

and irrigated systems Contributions cover recent and ongoing research in knowledge gap areas such as modeling the long term effect of management soil health the effect of extreme temperatures and drought on evapotranspiration and crop growth root growth and the uptake of water and nutrients The book also includes An introduction to system models integrated with experiments as tools to develop improved management practices for subsistence farming Explorations of models of soil erosion impacts and trade offs for sustainable land management practices in Kenya Discussions of the crop simulation model as a tool to quantify the effects of crop management practices in northern Ethiopia In depth examinations of models of water dynamics for assessing and managing ecosystem services in India Perfect for field research scientists and graduate students studying cropping and range systems and essential reading for agricultural consultants progressive farmers plant breeders and policymakers Advances in Agricultural Systems Modeling Transdisciplinary Research Synthesis and Applications Lajpat R Ahuja Series Editor Agricultural system modeling has made substantial progress but there are still many critical gaps in our knowledge The American Society of Agronomy Crop Science Society of America and Soil Science Society of America are taking a leadership role with the initiation of this new series Future breakthroughs in science and technology lie at the boundaries of disciplines The new series will Advance critical transdisciplinary research and its synthesis and quantification Encourage collaboration among top researchers in building and improving models Promote the application of system models to solve practical problems Achieve better instruction in these models and their applications

Competing Arctic Futures Nina Wormbs, 2018-08-06 This edited collection explores how narratives about the future of the Arctic have been produced historically up until the present day The contemporary deterministic and monolithic narrative is shown to be only one of several possible ways forward This book problematizes the dominant prediction that there will be increased shipping and resource extraction as the ice melts and shows how this seemingly inevitable future has consequences for the action that can be taken in the present This collection looks to historical projections about the future of the Arctic evaluating why some voices have been heard and championed while others remain marginalised It questions how these historical perspectives have shaped resource allocation and governance structures to understand the forces behind change in the Arctic region Considering the history of individuals and institutions their political and economic networks and their perceived power the essays in this collection offer new perspectives on how the future of the Arctic has been produced and communicated

Ross Calvin Ron Hamm, 2016-03-03 Many people love the American Southwest without truly understanding it Ross Randall Calvin did and we are the richer for it Calvin began his search as a pilgrim health seeker believing he had left the known world behind when he fled the East for New Mexico There he soon found to our benefit that he could use his observational skills and intellect to fashion a picture that helped him and us comprehend those unique factors that make New Mexico what it is its history people culture climate and so much more Those lessons learned he shared with us His books and essays can open our eyes to New Mexico if we but heed them Calvin s story as discoverer and

interpreter unfolds in rich detail in this essential work

The Philosophical Foundations of Ecological Civilization

Arran Gare, 2016-08-05 The global ecological crisis is the greatest challenge humanity has ever had to confront and humanity is failing The triumph of the neo liberal agenda together with a debauched scientism has reduced nature and people to nothing but raw materials instruments and consumers to be efficiently managed in a global market dominated by corporate managers media moguls and technocrats The arts and the humanities have been devalued genuine science has been crippled and the quest for autonomy and democracy undermined The resultant trajectory towards global ecological destruction appears inexorable and neither governments nor environmental movements have significantly altered this or indeed seem able to The Philosophical Foundations of Ecological Civilization is a wide ranging and scholarly analysis of this failure This book reframes the dynamics of the debate beyond the discourses of economics politics and techno science Reviving natural philosophy to align science with the humanities it offers the categories required to reform our modes of existence and our institutions so that we augment rather than undermine the life of the ecosystems of which we are part From this philosophical foundation the author puts forth a manifesto for transforming our culture into one which could provide an effective global environmental movement and provide the foundations for a global ecological civilization

Cultural Shifts:

Understanding the Impact of Global Movements on Local Traditions Henrietta Dougherty, 2024-12-10 Understanding the profound impact of globalization immigration and other global movements on local traditions is crucial in today's interconnected world Cultural Shifts Understanding the Impact of Global Movements on Local Traditions explores these transformative processes providing valuable insights for readers seeking to navigate the complexities of cultural change This comprehensive book covers a wide range of topics including the influence of globalization immigration tourism urbanization and media on cultural beliefs and practices It examines the effects of these shifts on language religion values and social structures By analyzing case studies and examples from around the world the book highlights both the challenges and opportunities presented by cultural shifts Furthermore Cultural Shifts explores the rise of identity politics and its implications for inclusive societies It also discusses climate change and its impact on cultural practices and traditions emphasizing the role of culture in resilience and adaptation Additionally the book explores the ethical considerations in cross cultural interactions promoting cultural sensitivity and respect By understanding cultural shifts we can foster intercultural dialogue promote cultural diversity and create resilient communities This book provides a thought provoking analysis of these complex processes making it an essential read for scholars students policymakers and anyone seeking to navigate the changing cultural landscape
