Beyond Drought People Policy And Perspectives:

Beyond Drought Linda Courtenay Botterill, Melanie Fisher, 2003 Australia is the only country on the planet that has a non annual climate cycle and this poses real challenges for an agricultural sector based on practices which were developed for the relative predictability of a European climate Since 1989 official Government policy in Australia has moved towards acceptance of this reality and rejected the notion that drought is a natural disaster in favour of a policy approach based on risk management

Beyond Drought Linda Courtenay Botterill, Melanie Fisher, 2003-10-28 The unpredictability of Australia s climate poses real challenges for practices that were developed based on the relative predictability of a European climate More recently policy has been moving towards accepting drought as a reality rejecting the notion that it is a natural disaster in favour of an approach based on risk management However the level of public debate during a drought event suggests that this policy approach has not been widely understood or accepted Media reporting of drought rapidly adopts disaster related language and the organisation of relief appeals reinforces the impression that drought is an aberration rather than a normal part of Australia s climate patterns *Beyond Drought* provides a multi disciplinary discussion aimed at increasing the level of understanding of drought s many facets and its impact on the environment communities and the economy It introduces a range of perspectives in order to emphasise the complexity of drought policy The book cuts through the often emotional debate that occurs during a drought event aiming to stimulate reasoned discussion about the best way that Australian farmers and the broader community can live with the vagaries of an uncertain climate

Satellite Remote Sensing in Hydrological Data Assimilation Mehdi Khaki, 2020-01-02 This book presents the fundamentals of data assimilation and reviews the application of satellite remote sensing in hydrological data assimilation Although hydrological models are valuable tools to monitor and understand global and regional water cycles they are subject to various sources of errors Satellite remote sensing data provides a great opportunity to improve the performance of models through data assimilation

Telling Environmental Histories Katie Holmes, Heather Goodall, 2017-12-12 This collection explores the intersections of oral history and environmental history Oral history offers environmental historians the opportunity to understand the ways people s perceptions experiences and beliefs about environments change over time In turn the insights of environmental history challenge oral historians to think more critically about the ways an active more than human world shapes experiences and people The integration of these approaches enables us to more fully and critically understand the ways cultural and individual memory and experience shapes human interactions with the more than human world just as it enables us to identify the ways human memory identity and experience is moulded by the landscapes and environments in which people live and labour It includes contributions from Australia India the UK Canada and the USA

From Disaster Response to Risk Management Linda C. Botterill, Donald A. Wilhite, 2005-06-15 In 1992 Australia s Commonwealth and State governments announced the introduction of a National Drought Policy adopting an innovative risk management approach which received

broad support from Australia's major political parties and the policy community. This trail blazing attempt and the experiences with the development and implementation of this policy over the past decade have intrigued the international scientific and policy communities. The present book comprises an academically focused collection of papers which the Editors hope will provide others moving in a similar direction with the benefit of experience. The work highlights the successes and challenges of a move from disaster to risk management in responding to drought. As such it will be a valuable and useful addition to the international literature on drought preparedness and response.

Water Policy in Australia Lin Crase, 2011. In the last twenty years policy makers in Australia have been forced to acknowledge that it is not possible to perpetually supply more water at a low cost. Consequently the country has begun to focus on water resource management through legislative and institutional change attempting to allocate water in a more economically efficient and socially and environmentally acceptable manner. This book provides insight into the challenges of institutional change as well as valuable lessons on the design of property rights for complex resources. Contributors from across disciplines address pertinent issues such as irrigation in the Murray Darling basin, one of Australia's largest drainage divisions, the progression from common law riparian rights to share based entitlements that encourage sustainable water use and the potential outcomes of the recent National Water Initiative, a wide ranging strategy to improve water management and simultaneously maintain healthy groundwater and river systems.

Contemporary Meanings of Endurance Noel Salazar, Jeroen Scheerder, 2022-12-09. This book critically analyses the concept of endurance from different theoretical, conceptual, methodological and empirical perspectives. The first part of the book takes a closer look at endurance by examining how it relates to concepts such as resilience, perseverance and perdurance. By analysing how these concepts overlap but differ, we reach a better understanding of what constitutes endurance. Furthermore, endurance is reconfigured as a mundane aspect of everyday life. The latter part of the book focuses on embodied experiences of endurance, more specifically on endurance running, walking and physical performances. The different contributions focus on the meanings, values and attributes that people ascribe to endurance in various socio-cultural contexts. The book uncovers practices, environments and discourses in which endurance is applied and manifested, from drought affected communities in rural Australia to professional endurance runners in Ethiopia, as well as migrants in Greece and performance acts in domestic spaces in the United Kingdom and beyond. This book will be of interest to scholars of movement sciences, sports studies, mobilities, leisure studies and resilience studies.

Dry Times Mark Stafford Smith, Julian Cribb, 2009. With knowledge from our deserts, Australians can reshape the human story. *Dry Times* Blueprint for a Red Land provides new insights into how our desert environments and institutions work and how this affects the people living in them, Aboriginal and non-Aboriginal alike.

Ten Commitments Revisited David Lindenmayer, Stephen Dovers, Steve Morton, 2014-09-25. What are the 10 key issues that must be addressed urgently to improve Australia's environment? In this follow up to the highly successful book *Ten Commitments: Reshaping the Lucky Country's Environment*

Australia's leading environmental thinkers have written provocative chapters on what must be done to tackle Australia's environmental problems in terms of policies on ground actions and research. Each chapter begins with a brief overview of the 10 key tasks that need to be addressed in a given field and then each issue is discussed in more detail. Chapters are grouped into ecosystems sectors and cross-cutting themes. Topics include deserts, rangelands, temperate eucalypt woodlands, tropical savanna landscapes, urban settlements, forestry management, tropical and temperate marine ecosystems, tropical rainforests, alpine ecosystems, freshwater ecosystems, coasts, islands, soils, fisheries, agriculture, mining, grazing, tourism, industry and manufacturing, protected areas, Indigenous land and sea management, climate change, water, biodiversity, population, human health, fire, energy and more. **Ten Commitments Revisited** is a must-read for politicians, policy makers, decision makers, practitioners and others with an interest in Australia's environment.

Environmental Discourses in Public and International Law Brad Jessup, Kim Rubenstein, 2012-02-02 How do dominant views and arguments about environmental problems traverse and connect international and public law?

Rural and Regional Futures Anthony Hogan, Michelle Young, 2014-09-19 Agriculture, mining and related rural industries have been central to the development of Australia's economy. This book details the role that the Australian Government has played in the making of rural and regional Australia, particularly since World War II. The book reviews these policies and evaluates them with regards to the commitments undertaken by the Government to contribute towards vibrant rural communities. Policy areas addressed include agriculture, water, education, welfare and population, natural resource management, resource extraction, Indigenous and affairs, localism, rural research and regional innovation, Youth Affairs and the devolution of regional governance. Overall, two distinct policy strategies can be observed: one wherein the government saw its role as part of the entrepreneurial state and a sector wherein government has increasingly taken itself out of industry development, leaving this role to the market. Having considered these strategies and their impacts, the book concludes that policy over the past 40 years has not in fact contributed to a more vibrant, prosperous rural and regional Australia. **Rural and Regional Futures** concludes with several chapters looking to the future. One chapter explores what the role of the state can be within a social market economy, while the final chapter gives consideration to the initial steps rural communities will need to take to begin the process of revitalisation. While these materials present as a case study of developments in Australia, the policy shift from the Government as entrepreneur to a focus on markets is an international one and as such the insights offered by this book will have wide appeal.

Land, Water and Development Malcolm Newson, 2008-09-17 Tracing the evolution of river basin management and the history of applied hydrology, Newson provides a systematic review of policy and practice and argues for a sustainable approach to the changing environment of the world's rivers.

Developing Place-responsive Pedagogy in Outdoor Environmental Education Alistair Stewart, 2020-02-25 This book is a rhizomatic curriculum autobiography that charts the author's efforts to develop and promote Australian outdoor environmental education practices that are inclusive of and responsive to the places in which

they are performed Joining philosophical concepts created by Gilles Deleuze and Felix Guattari with William Pinar's autobiographical method for curriculum inquiry the author re considers the interrelated concepts contexts and complex conversations with colleagues students and others that have shaped his approach to curriculum pedagogy and research for fifteen years or more Emphasising the complexity of developing curricula and pedagogies that engage in a respectful and generative way with the natural and cultural history of the Australian continent the author explicates and enacts his attempts to think differently about the cultural curricular and pedagogical understandings that inform the practices of Australian outdoor environmental educators Outdoor environmental education in Australia has historically been influenced by imported universalist ideas particularly from the USA and the UK However during the last two decades a growing number of researchers in this field have challenged the applicability of such taken for granted approaches and advocated the development of curricula and pedagogies informed by the unique bio geographical and cultural histories of the locations in which educational experiences take place As this book demonstrates Alistair Stewart is prominent among the vanguard of Australian outdoor environmental educators who have led such advocacy by combining practical experience with theoretical rigour

Pastoral systems in marginal environments J.A. Milne, 2023-08-28 Pastoral systems are some of the most fragile human ecosystems that exist and are under threat from the expansion of cultivation changes in social patterns and climate change These ecosystems are of major importance since they contain a rich biological and cultural diversity The aim of the book is to take a holistic view of pastoral systems by bringing together papers written by specialists in plant and animal ecology with an interest in the application of their research with papers taking an economic and social perspective The focus is on marginal environments where the issues are in greatest relief with the papers tackling key issues in semi arid and disadvantaged temperate areas The key issues relate to identifying the biological constraints of these pastoral systems understanding soil plant animal relationships exploring biodiversity landscape and social issues in multi functional systems and providing solutions to constraints through a number of case studies By comparing and contrasting these two environments the book will be taking a completely new approach to understanding how pastoral systems function and how they will evolve in the future The book is of value to all those with an interest in pastoral systems by providing an up to date account of current understanding of these multi functional systems and new insights into how they function and how they will develop in the future
