## **Beyond Facts Understanding Quality Of Life:**

*Beyond Facts* Carmen Pagés, Carlos Scartascini, Rita Funaro, Lucía Madrigal, Suzanne Duryea, Juan Camilo Chaparro, María Victoria Rodríguez-Pombo, Eduardo Lora, Pablo Sanguinetti, William D. Savedoff, Juan Carlos Navarro, Aimee Verdisco, Mariana Alfonso, Andrew Powell, 2008-01-01 Traditionally the concept of quality of life has been viewed through objective indicators Beyond Facts looks at quality of life through a new lens namely the perceptions of millions of Latin Americans Using an enhanced version of the recently created Gallup World Poll that incorporates Latin America specific questions the Inter American Development Bank surveyed people from throughout the region and found that perceptions of quality of life are often very different from the reality These surprising findings have enormous significance for the political economy of the region and provide a wealth of information for policymakers and development practitioners to feast upon *The Quality of Life in Latin American Cities* Eduardo Lora, Andrew Powell, Bernard M.S. van Praag, Pablo Sanguinetti, 2010-05-04 A growing number of cities around the world have established systems for monitoring the quality of urban life Many of those systems combine objective information with subjective opinions and cover a wide variety of topics This book assesses a method that takes advantage of both types of information and offers criteria to identify and rank the issues of potential importance for urban dwellers This method which combines the so called hedonic price and life satisfaction approaches to value public goods was tested in pilot studies in six Latin American cities Bogot Buenos Aires Lima Medell n Montevideo and San Jos of Costa Rica It provides valuable insights to address key questions such as Which urban problems have the greatest impact on people s opinions of city management and the most widespread effects on their lives Do gaps between perception and reality vary from one area of the city to another especially between high and low income neighborhoods Where can homebuilders most feasibly seek solutions to problems such as inadequate road infrastructure a lack of recreational areas or poor safety conditions Which problems should government authorities address first in light of their impact on the well being of various groups of individuals and given private actors abilities to respond Which homeowners benefit the most from public infrastructure or services When can or should property taxes be used to finance the provision of certain services or the solution of certain problems *The Quality of Life in Latin American Cities Markets and Perception* proposes a monitoring system that is easy to operate and that entails reasonable costs but also has a solid conceptual basis Long the ideal of many scholars and practitioners such a system may soon become a reality and have the potential to make a significant contribution to the decision making processes in any city concerned with the well being of its residents *Happiness Around the World* Carol Graham, 2012-01-19 The book reviews the theory and concepts of happiness explaining how these concepts underpin a line of research that is both an attempt to understand the determinants of happiness and a tool for understanding the effects of a host of phenomena on human well being **Hierarchical Capitalism in Latin America** Ben Ross Schneider, 2013-09-02 This book argues that Latin America has a distinctive enduring form of hierarchical capitalism

characterized by multinational corporations diversified business groups low skills and segmented labor markets Over time institutional complementarities knit features of corporate governance and labor markets together and thus contribute to institutional resiliency Political systems generally favored elites and insiders who further reinforced existing institutions and complementarities Hierarchical capitalism has not promoted rising productivity good jobs or equitable development and the efficacy of development strategies to promote these outcomes depends on tackling negative institutional complementarities This book is intended to open a new debate on the nature of capitalism in Latin America and link that discussion to related research on comparative capitalism in other parts of the world

Honoring the Past, Building the Future Ricardo Ávila, 2009-01-01 Although science has unlocked the secrets of the human genome the causes of social and economic development remain stubbornly enigmatic Why do some countries adopt new technologies more readily than others Why does income inequality persist in some regions even in the face of rapid economic growth Why do some societies welcome the challenges of globalization while others attempt to turn back the tide *Honoring the Past Building the Future* examines these and many related questions through the experience of Latin America and the Caribbean In an accessible journalistic style author Ricardo Ávila explores a tumultuous half century in which the region went from backwater to breadbasket from dictatorship to democracy and from economic basket case to emerging power

*Population Aging* Daniel Cotlear, 2010-12-13 Latin America and the Caribbean will soon face the challenges of an aging population This process which took over a century in the rich world will occur in two or three decades in the developing world seven of the 25 countries that will age more rapidly are in LAC Population aging will pose challenges and offer opportunities This book explores three sets of issues First is a group of issues related to the support of the aging and poverty in the life cycle This covers questions of work and retirement income and wealth and living arrangements and intergenerational transfers It also explores the relation between the life cycle and poverty Second is the question of the health transition How does the demographic transition impact the health status of the population and the demand for health care And how advanced is the health transition in LAC Third is an understanding of the fiscal pressures that are likely to accompany population aging and to disentangle the role of demography from the role of policy in that process This book provides an introduction to the concepts and techniques at the intersection of demography and economics It summarizes the policy debate about potential reforms needed to make population aging an opportunity for development

*Job Creation in Latin America and the Caribbean* Carmen Pagés, Gaëlle Le Borgne Pierre, Stefano Scarpetta, 2009-06-19 More than a decade has passed since the introduction of comprehensive macroeconomic stabilization packages and trade fiscal and financial market reforms in Latin America and the Caribbean However growth prospects remain disappointing labor markets show lackluster performance with low participation rates high and persistent informality and in some cases open unemployment Creating viable and lasting employment is vital to reduce poverty and spread prosperity in the region The failure to create more and more productive and rewarding jobs

carries substantial political social and economic costs Job Creation in Latin America and the Caribbean Recent Trends and Policy Challenges provides a thorough examination of the labor market trends in the region in recent decades and assesses the role that labor demand and labor supply factors have played in shaping these outcomes

**International Differences in Well-Being** Ed Diener, Daniel Kahneman, John Helliwell, 2010-03-10 This book brings together the best of current global research on the measurement and understanding of international differences in well being

**The Oxford Handbook of Latin American Political Economy** Javier Santiso, Jeff Dayton-Johnson, 2012-04-11 Latin America's recent development performance calls for a multidisciplinary analytical tool kit This handbook accordingly adopts a political economy perspective to understand Latin American economies This perspective is not new to the region indeed this volume consciously follows the approach pioneered by political economist Albert O Hirschman a half century ago But the nature of the political and economic processes at work in Latin America has changed dramatically since Hirschman's critical contribution Military dictatorships have given way to an uneven democratic consolidation agricultural or primary product producers have transformed into middle income diversified economies some of which are leading examples of emerging markets So too the tools of political economy have developed by leaps and bounds It is therefore worthwhile to take stock of and considerably extend the explosion of recent scholarship on the two way interaction between political processes and economic performance A unique feature of the book is that it begins with a group of chapters written by high level academic experts on Latin American economics and policies who also happen to be current or past economic policy makers in the region including Fernando Henrique Cardoso former president of Brazil Andr s Velasco former Chilean finance minister Luis Carranza former Peruvian finance minister Mart n Redrado former governor of the Argentina central bank and Luciano Coutinho president of Brazil's national development bank These contributors draw upon their academic expertise to understand their experience in the trenches of policy making

**Disconnected** Marina Bassi, Mat as Busso, Sergio Urz a, Jaime Vargas, 2012-01-01 Disconnected is a path breaking analysis of the relationship between schooling and employers in Latin America It is sophisticated in its design using multiple surveys and multiple methods It distinguishes carefully among different types of skills and the relationship of each type to employment outcomes and employer needs It examines both the demand and the supply side of the labor market And it provides guidance for further work We commend this book to all readers scholars and practitioners concerned with schooling and job markets in Latin America

**Annual World Bank Conference on Development Economics 2011** Justin Yifu Lin, Claudia Paz Sepulveda, 2013-10-11 ABCDE 2011 presents papers from a global gathering of the world's leading development scholars and practitioners held May 31 June 2 2010 Paper themes include Environmental Commons and the Green Economy Post crisis Development Strategy the Political Economy of Fragile States Measuring Welfare and Social Programs and Transfers

**The Economic Development of Latin America Since Independence** Luis B rtola, Jos  Antonio Ocampo, 2012-10-25 A comprehensive and accessible overview of the economic

history of Latin America over the two centuries since Independence It considers its principal problems and the main policy trends and covers external trade economic growth and inequality

**Paradox and Perception** Carol L. Graham, Eduardo Lora, 2010-09-01 The quality of life concept of quality of life is a broad one It incorporates basic needs but also extends beyond them to include capabilities the livability of the environment and life appreciation and happiness Latin America s diversity in culture and levels of development provide a laboratory for studying how quality of life varies with a number of objective and subjective measures These measures range from income levels to job insecurity and satisfaction to schooling attainment and satisfaction to measured and self assessed health among others Paradox and Perception greatly improves our understanding of the determinants of well being in Latin America based on a broad quality of life concept that challenges some standard assumptions in economics including those about the relationship between happiness and income The authors analysis builds upon a number of new approaches in economics particularly those related to the study of happiness and finds a number of paradoxes as the region s respondents evaluate their well being These include the paradox of unhappy growth at the macroeconomic level happy peasants and frustrated achievers at the microlevel and surprisingly high levels of satisfaction with public services among the region s poorest They also have important substantive links with several of the region s realities such as high levels of income inequality volatile macroeconomic performance and low expectations of public institutions and faith in the capacity of the state to deliver Identifying these perceptions paradoxes and their causes will contribute to the crafting of better public policies as well as to our understanding of why populist politics still pervade in much of the region

Data-Based Child Advocacy William P. O'Hare, 2014-07-22 This book locates organizes and summarizes information about the use of child indicators in an advocacy context It provides a conceptual framework that allows readers to see a wide variety of work as part of a unified field It provides a description of key concepts and illustrates these concepts by offering many examples from a range of countries and a wide variety of applications It covers work from governments non governmental organization and academics It describes such aspects as the use of data to educate and increase public awareness as well as to monitor set goals and evaluate programs serving children A growing number of organizations and people are focusing on measuring and monitoring the well being of children and these child well being data are often employed in ways that go beyond what is typically considered scholarship Many of these applications involve some type of advocacy activity Yet there is very little in the literature about the use of child indicators in an advocacy context This book provides a framework for scholars in a variety of disciplines that will help them to structure their thinking about the use of such indicators in a public context
